New! IntraCore® IC38480 (top) and IC36240 managed Gigabit switches.

"**Asante has the switches of choice for the graphics market**," said Pat Taylor, president of Proactive Technologies. "We supply products to customers that operate multi-million dollar presses running around the clock. Downtime is very expensive. We needed to get a good price on networking equipment, without sacrificing performance. Asante had the vision to make Gig affordable right now."

Gigabit Switches (10/100/1000BaseT)

Asanté Gigabit Ethernet switches are ideal for:
- Aggregating traffic from other switches (IC38480, IC36240, IC35160-T)
- Workgroups connecting desktops, servers and peripherals

Model	Gigabit Ports	10/100/1000BaseT	GBIC	Rackmount	Management	Advanced Features
IC38480	48	48	4 SFP	Yes	Enterprise-Class	Layer 2, jumbo frame
IC36240	24	24	4 SFP	Yes	Enterprise-Class	Layer 2, jumbo frame
GX5-2400W	24	24	--	Yes	Smart	Trunk, VLAN, mirroring
GX5-800P	8	8	--	--	Unmanaged	
GX5-500	5	5	--	--	Unmanaged	

The integrated Gigabit ports will run 10/100/1000 Mbps using Category 5 UTP for 100 meters/328 feet.

Gigabit Fiber Switches (1000BaseSX, 1000BaseLX)

These Asanté IntraCore switches use industry-standard GBIC modules for all fiber connections. They are well-suited as backbone and aggregation switches.

Asanté GBIC modules include GBIC-1000SX (multimode, 850nm wavelength, 62.5µ core, 220 meters/721 feet) and GBIC-1000LX (single mode, 1300nm, 62.5µ core, 550 meters/1,804 feet).

Fast Ethernet Swit   ches (10/100BaseTX)

These economical 10/100 switches are used primarily in workgroups to connect desktops and printers. Gigabit ports, available on some models, provide high-speed connections to the network backbone.

Model	Gigabit Ports	GBIC	10/100/1000BaseT	10/100 Ports	Management	Advanced Features
GX5-424W	4	2 SFP	2	24	Smart	Trunk, VLAN, mirroring
FS4124R	--	--	--	24	Unmanaged	Rackmount
FS4116R	--	--	--	16	Unmanaged	Rackmount
FS5008	--	--	--	8	Unmanaged	
FS5005	--	--	--	5	Unmanaged	

Asante
