

Hub USB

DESCRIPTION

Just add 4 USB devices to your computer!

Hub USB can manage up to 127 devices and has overcurrent protection on each port.

It can operate with peripherals at 12Mbps and 1,5Mbps.

It is powered by the USB port or through the external power supply, in the package, and it guarantees up to 500mA for each port.

Each port has a current limiter that protects your computer, the hub and the connected peripherals from overcurrent damages.

Hub USB is Plug & Play and is fully compliant with USB specifications.

It can operate with Windows® and Macintosh® operating systems.

No driver or setup is required.

Code: 8E4059
