

# Wireless Router

## PRODUCT HIGHLIGHTS

- Ensures the best streaming and content speeds are transmitted to TV
- 1-foot proximity auto setup to Samsung Smart TV™

**The smarter router: it puts the priority on streaming content to your HDTV first – and fast.**

Most routers give all linked devices equal priority. As a result, your HDTV seems to take forever to load programming from your PC and other digital sources. However, with the CY-SWR1100 Wireless Router, the best streaming content and fastest throughput speeds go to your HDTV first – thanks to Samsung's Auto Prioritized QoS (Quality of Service) feature. An auto-sync feature also makes setup easy: just put the router within a foot of your HDTV to sync up; then place the router anywhere. The CY-SWR1100: Fast. Easy. Smart.

## CY-SWR1100
