

## Package contents

- HDMI splitter
- AC power adapter
- *Quick Setup Guide*

## You will need:

- High-speed HDMI cables

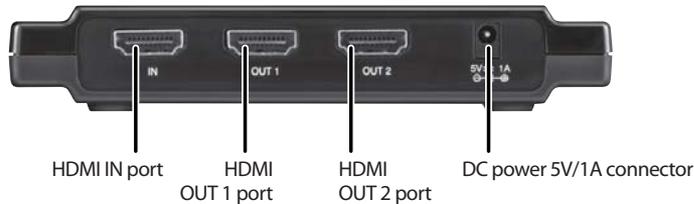

## Features

- Sends HDMI A/V signals from a single source, such as a Blu-ray/DVD player, set-top box, to two destinations, such as a TV and A/V receiver.
- Supports full 1080p video resolution
- Supports 3D video
- Compatible with most TV and PC monitor video resolutions

## Front

## Back

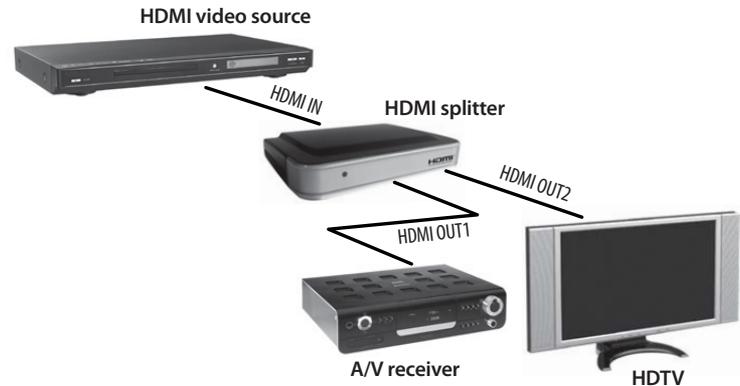

## HDMI splitter basics

This Rocketfish two-way HDMI splitter will send the HDMI audio and video signals from a single source, such as a Blu-ray/DVD player or cable/satellite box, to two destinations, such as a TV and A/V receiver. It is ideal for sending the audio signals from a 3D Blu-ray player to an A/V receiver that does not support 3D video pass-thru.

## Setting up your HDMI splitter

- 1 Connect one end of a high-speed HDMI cable (not included) to your video source and the other end to the **IN** port on the HDMI splitter.
- 2 Connect another high-speed HDMI cable to your HDMI splitter's **OUT 1** port to an HDTV.
- 3 Connect another high-speed HDMI cable to your HDMI splitter's **OUT 2** port to an A/V receiver.
- 4 Connect the included AC adapter from the DC jack on the HDMI splitter to a standard 110/120V AC outlet. Power on all connected devices and operate per the manufacturer's instructions.

## Connecting a TV and A/V receiver to a single HDMI source

## Troubleshooting

Symptom	Possible solution
LED is not ON or lit	<ol style="list-style-type: none"><li>1 Make sure that the HDMI splitter's power adapter is plugged in.</li><li>2 Make sure that the video device or TV's power cord is plugged in.</li></ol>
No video and/or audio	<ol style="list-style-type: none"><li>1 Make sure that your DVD movie is original. HDMI includes HDCP copy protection, which prevents playback of illegally copied movies.</li><li>2 Make sure that the HDMI cable is not broken and is securely connected.</li><li>3 Make sure that the audio and video formats of the content being used (i.e., Blu-ray disc) are supported by all connected devices.</li><li>4 Make sure that your destination components (i.e., TV and A/V receiver) are set to the HDMI inputs with which the splitter's HDMI outputs are connected.</li><li>5 Make sure that you are using high-speed HDMI cables for all connections. We recommend high-quality Rocketfish HDMI cables, available at your local Best Buy or Future Shop stores in lengths from 4 to 24 feet.</li><li>6 Unplug the HDMI splitter's AC power adapter, then plug it back in again.</li></ol> <p><b>NOTE:</b> If using with two TVs or monitors, connect the TV with the lowest resolution to the <b>OUT 1</b> port to make sure video is displayed on both TVs. The splitter uses the resolution, timing information, and audio formats of the TV with the lowest resolution for both TVs</p>
Video has some noise	<ol style="list-style-type: none"><li>1 Make sure that you are using high-speed HDMI cables for all connections. We recommend high-quality Rocketfish HDMI cables, available at your local Best Buy or Future Shop stores in lengths from 4 to 24 feet.</li><li>2 Make sure that the TV's video resolution supports the video source's output resolution.</li></ol>

## Specifications

HDMI version	1.4A
Video amplifier bandwidth	225 MHz / 6.75 Gbps
Single link range	480i to 1080p from source device
Vertical frequency range	25 Hz to 60 Hz
HDMI input connector	HDMI Type A (1)
HDMI output connector	HDMI Type A (2)
HDMI HDCP compliant	Pass HDCP data between source and monitor
Power consumption	5 Watts (maximum)
Power supply	5VDC/1000 mA
Dimensions	5.19 × 3.39 × 0.98 in. (130 × 86 × 25 mm)
Shipping weight	.82 lb (.372 kg)
