

Your ultimate notebook workstation

Ergo-T 340

- Positions notebook screen at an ergonomic level for reduced neck torque and more comfort
- Money saver: no need for an external monitor, and saves desk space
- Unique, universal facility to integrate any advanced port replicator (docking station) or USB hub to preconnect all your peripherals
- Built-in (patented) document holder, pivotable for easy laptop set-up
- Cable management for clean workplace set-up
- Cooling sleeves and ribs ensure ventilation, prevent heat built-up
- Unique device that secures the Ergo-T 340 and all connected accessories with just one cable lock
- Sturdy, secure fit for all laptops up to 17 inch widescreen

The use of laptop computers certainly makes our lives easier. This convenience however comes with a drawback. Due to the low positioning of the laptop screen and the fixated keyboard, most laptop users maintain a hunched-over body posture while working. From an ergonomic point of view, the laptop is not desirable to use for extended periods of time.

The Ergo-T 340 provides the perfect solution for this problem and provides with a separate keyboard and mouse a true ergonomic workstation. By placing your laptop on the Ergo-T 340, you can adjust its height so that the monitor level is both comfortable and safe. The Ergo-T 340 also includes a document holder, which conveniently positions documents just below the laptop screen to minimize undue head and neck motion.

Other features are: integration of any advanced port replicator/ docking station or USB hub, cable management and security.
