MT400 PROJECTOR

Bringing big screen magic home

Enjoy blockbuster movies anytime with your own MT400 Home Cinema Projector from Toshiba. Its advanced features such as Native Wide Screen (16:9) format and DLP™ reflective mirror technology set the scene for an authentic movie-going experience. And when the action stops, its elegant casing perfectly fits any living area.

BRING BIG SCREEN MAGIC HOME

The MT400 Home Cinema Projector brings the magic of the big screen home with its DLP™ Technology, Native Wide Screen (16:9) format and high 2500:1 contrast all combining for a superb viewing experience.

Picture quality is further enhanced using TrueVision™ Image Processing – a technology designed to create smooth image reproduction and eliminate the “jitters” often seen on inferior projectors.

Perfect colour reproduction is yours via three image modes (Dynamic, Standard or Cinema) catering for fast-moving sports, high quality gaming, or the delicate balance of movie cinematography. Multiple connections allow for a wide range of input devices whilst its quiet nature ensures your attention remains firmly on the big screen action.

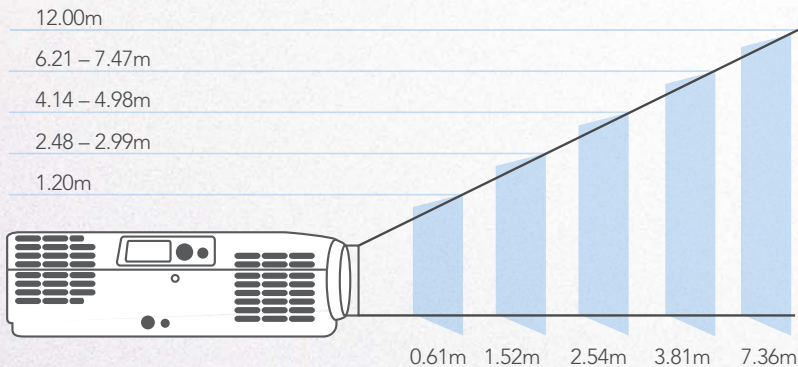

Peace of mind is also projected with a three year warranty and a complete 90 day product and lamp replacement period should a manufacturing fault arise.

KEY BENEFITS

- Superior DLP™ technology for clearer images at an affordable price
- Native Wide Screen (16:9) for a true cinema experience
- High contrast ratio of 3000:1 for picture perfect images
- TrueVision™ Image Processing for jitter-free, smooth video signals
- Three image modes (Dynamic, Standard, Cinema) to easily optimise colour
- Enhance gaming, computing and DVD sources with multiple connections at rear
- DVI-D-link enables the digital connection with HDMI or DVI–output of DVD players
- Elegant casing for any living environment
- 3 year warranty with a complete 90 day product and lamp replacement period
