

Enhance your PC audio experience

Take your pick from 4 hi-fi stereo headsets – designed so you can get the most out of your PC audio experience. Ideal for voice and video chat, IP telephony, interactive training, and even gaming or music – in fact for just about anything you might want to listen to either from your PC or MAC.

Available with USB or sound card 3.5 mm gold-plated plug connection and in your choice of wearing styles, you can enjoy full, rich sound from stereo speakers and the convenience of in-line sound control. Add to this the comfort provided by adjustable headband, ergonomic design and a flexible microphone boom for optimal voice pick-up and you have some of the best stereo headsets for everyday PC audio.

With the Jabra GN5000 Series, Jabra offers a wide range of varieties – and all the features you need to enjoy your PC audio – without compromising on comfort and without disturbing the people around you.

Revolutionize your PC audio lifestyle.
