

BUILT TO WEATHER THE STORM

Constructed and tested to withstand the harshest outdoor conditions, The ATON™ Storm Series Outdoor Speakers are guaranteed to provide years of reliable outdoor use. Each model's all-weather cabinet design effectively shields the speaker from the elements and makes the speaker ideal for any outdoor application.

But the test of a great outdoor speaker is more than its durability. It has to deliver high quality sound in an environment very different from indoor applications. As a result, all Storm Series Outdoor Speakers are voiced to provide adequate sound pressure levels and deliver big, indoor-quality sound even in outdoor, open-air conditions.

UNPARALLELED PERFORMANCE

All models feature 1" waveguide tweeters for controlled hi-frequency dispersion, excellent off-axis frequency response, high power handling, a unique bass reflex acoustic design, and custom Q crossovers and driver materials that provide the best price/performance ratio in the industry.

MULTIPLE OUTDOOR AND INDOOR APPLICATIONS

From the pool to the patio, in saunas or on a boat, each model can be easily mounted horizontally or vertically onto walls using the included custom C brackets. Once mounted, the speaker can be pivoted (up to 180°) to direct the sound to the intended location. And all models perform equally well indoors and can be used for distributed audio and surround sound applications where in-wall, ceiling or large box speakers are not desired or practical.

Model
041

The 041 delivers the same exceptional sound as the larger models to smaller outdoor areas. With its small footprint, yet surprising bass response and pleasant mids and highs, this 4.25" model will fit just about anywhere outdoors.

Model
051

An ideal choice for hi-powered outdoor sound in areas where a larger speaker is not ideal. Provides clean, articulate bass, smooth mids and clear highs.

Model
061

Provides big outdoor sound at a great price point. Features low, powerful bass, warm mids and open, airy highs.

Model
062

Designed to fill the largest outdoor areas with superior sound. Features excellent bass response, accurate highs and ultra-smooth mids.

Model
062ST

Delivers the same exceptional sound of a pair of 062s in a single location speaker. Utilizes a dual voice coil woofer and tweeter to deliver audio in areas where two separate speakers are not practical or desired.

OUTDOOR SPEAKER FEATURES

- All-weather cabinet construction withstands the harshest outdoor conditions
- Voiced to provide adequate sound pressure levels for outdoor applications
- Deliver big, indoor-quality sound
- Bass reflex box tuning for excellent bass response
- Custom Q crossovers and driver materials
- 1" waveguide tweeters on all models
- High power handling
- Excellent off-axis frequency response
- Custom C brackets (included) allow speaker to be pivoted up to 180°
- Mount vertically or horizontally on walls or under eaves
- Gold-plated, weather-resistant speaker terminals
- 10 Year Warranty
