Product highlights

DivX Ultra

DivX Ultra combines DivX playback with great features like integrated subtitles, multiple audio languages, multiple tracks and menus into one convenient file format.

Multi-format Movies with DivX

Multi format playability allows you to play most disc formats for maximum disc compatibility and viewing pleasure.

DTS, Dolby Digital, Pro Logic II

A built-in DTS and Dolby Digital decoder eliminates the need for an external decoder by processing all six channels of audio information to provide a surround sound experience and an astoundingly natural sense of ambience and dynamic realism. Dolby Pro Logic II provides five channels of surround processing from any stereo source.

12 bit Video DAC

12 bit Video DAC is a superior Digital to Analogue Converter that preserves every detail of the authentic picture quality. It shows subtle shades and smoother gradation of colours, resulting in a more vibrant and natural picture. The limitation of the usual 10bit DAC becomes apparent particularly while using large screens and projectors.

Wide Spectrum Speaker System

Wide spectrum speaker covers the entire audible audio frequency in order to capture and reproduce a more realistic sound. As there is one driver reproducing the entire audio range, this results in minimum phase distortion or time distortion to affect the audio quality.

Easy-fit™ connectors

Colour-coded connectors provide a simple and user-friendly solution to connect the speakers and subwoofer to the centre unit of the home entertainment system simply by plugging the connectors in the matching coloured interface at the rear of the centre unit.

Music: Windows Media™ Audio

Multi format playability allows you to play most disc formats for maximum disc compatibility and listening pleasure.
