Accessories	<ul style="list-style-type: none"><li>• Five sets of different-sized ear gels</li><li>• Premium carrying case and pouch</li><li>• Airplane and 1/4" Adaptor</li><li>• Ear Gel Cleaning Tool</li></ul>
Finishes	Anodized Copper
Built From	2007

Not only are Image headphones the world's smallest and lightest full-range in-ear headphone designs, the Image X10 fuses life-style, technology, and fashion to offer your customers a personalized fit and deliver a precision-tuned acoustic experience.

All of our Image earphones feature patent-pending Contour Ear Gels that are designed to fit comfortably inside the human ear canal. These soft, oval silicon tips reduce ear fatigue and provide an amazing seal for excellent noise isolation and increased bass response.

Because ear canal measurements vary, each Image model comes with five different sizes of washable ear gels: small, medium, and large single flange designs, as well as small and large double flange designs.

Image X10 earphones feature aluminum bodies finished in beautiful anodized copper and streamlined black "tails." Aside from aesthetic appeal, these flexible "tails" reduce cable stress and serve as an acoustic damper to minimize cable noise.

Klipsch has gone to great lengths to ensure the long-lasting durability of Image X10, including its 50-inch-long vinyl cables. Put through extensive "real world" testing, these headphones feature strain relief at every cable connection point to help prevent wire damage.

While they're great iPod headphones, Image X10 also works with the iPhone™ and virtually any device with a headphone jack. These earphones come with a carrying case and compact pouch, a 1/4-inch adaptor, an airplane adaptor, five sets of different-sized ear gels and an ear gel cleaning tool.
