

CamPocket Film camera bags

A practical camera bag for digital equipment

The CamPocket Film is equipped with a thick cushioned compartment to safely transport and store digital equipment. The front flap of the Film is secured with a velcro fastening keeping the camera safe but at the same time allowing for fast retrieval when needed. The two side flaps of the main compartment additionally protect the contents from above and prevent water and dirt from entering the bag and possibly damaging the equipment.

The CamPocket Film offers lots of room in the attached front compartment for batteries, whilst the small zip-locked integrated pocket can carry your memory cards.

The CamPocket Film can be carried in the hand, on the removable shoulder strap, or by using the button-activated belt loop.

Focus is made of high-quality, robust, artificial leather, available in black.
