

KEY FEATURES

- High-Definition Multimedia Interface (HDMI™)
- Upconversion to 720p/1080i Resolution
- HD JPEG

- Coaxial and Optical TosLink® Digital Audio Outputs
- HDMI™ w/ Dolby® Digital and DTS® Bitstream Output
- WMA & MP3 Playback
- 24-Bit/192kHz Audio D/A Converter
- 3-D Virtual Surround

- Universal Remote with TV Controls
- 9-in-2 Media Card Playback
- Digital Picture Zoom
- 2 Meter HDMI™ Cable Included

ADVANTAGE TOSHIBA

- >> High-Definition Multimedia Interface (HDMI™) brings Home Theater to the next level by streaming multi-channel digital audio and digital video information together on one cable to digital televisions and monitors with a compatible input.
- >> Video Up-conversion displays a pure digital signal at both 720p or 1080i, matching the resolution of the HDTV monitor and thus eliminates signal degrading A/D-D/A conversion.
- >> 9-In-2 Media card playback, will accept Secure Digital™, Mini Secure Digital™, Memory Stick™, Memory Stick Pro™, Memory Stick Duo™, Memory Stick PRO Duo™, XD Picture Card™, Compact Flash® and MultiMediaCard™. For JPEG, WMA and MP3 files.
- >> HD JPEG will provide the ability to view Megapixel images in their enhanced resolution when using HDMI™ and an HDTV display device

TECHNOLOGY & BENEFITS

VIDEO

- >> **High-Definition Multimedia Interface (HDMI™)** - HDMI™ (High-Definition Multimedia Interface) is the first industry-supported, uncompressed, all-digital audio/video connection. HDMI™ provides the best interface between a DVD player and compatible products, such as a digital television (DTV). When matched with a compatible TV, this single interconnecting cable combines: Multi-channel audio, uncompressed digital video, intercommunication between devices and simple control Protocols. This single cable connection ensures that all signals remain in their pure digital form and secure by use of High Definition Copy Protection (HDCP) regardless of signal output resolution.
- >> **Video Upconversion** - 720p/1080i - HDMI™ can support uncompressed digital video up to HDTV level resolution. Thus, the player makes use of this conduit by up-converting the standard DVD picture resolution to nearly HDTV-quality with output resolutions of 720p or 1080i. This makes a DVD player with an HDMI™ connection the perfect match for today's digital televisions. And because this conversion is performed in the player, the signal remains free from excessive digital-to-analog conversion artifacts.
- >> **ColorStream Pro® Component Video Outputs** - These outputs allow the video signal to be sent from the DVD player to a component video equipped interlaced or progressive scan TV. When this connection is utilized with today's HD-compatible sets, typical NTSC artifacts-like video noise, dot crawl, and flicker-are virtually eliminated, resulting in a low-noise, highly detailed picture with unequaled color purity.
- >> **Digital Cinema Progressive (3/2 Pulldown)** - Delivers the smoothest, most film-like images to any progressive scan television, such as an HD-compatible one, and ensures maximum resolution.
- >> **HD JPEG** - Thanks to a specialize chipset (MPEG Decoder and Scaler) and the HDMI™ interface with an HDTV display, Megapixel JPEG images are displayed in their enhanced resolution, versus the image compression that takes place with component interfaces.

AUDIO

- >> **WMA & MP3 Playback** - Recordable compact discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats can be enjoyed.
- >> **Coaxial and Optical TosLink® Dolby® Digital and DTS® Surround Sound Output** - Use the single RCA-type or optical output jack to send signature multi-channel audio to an audio/video receiver with a compatible input.

CONVENIENCE

- >> **Universal Remote w/ TV Controls** - Enjoy control of all DVD functions and basic television controls from the same remote.
- >> **9-in-2 Card Slot** - Media card playback, will accept Secure Digital, Mini Secure Digital, Memory Stick, Memory Stick Pro, Memory Stick Duo, Memory Stick Duo Pro, XD Picture Card, Compact Flash and Multimedia Card. By taking advantage of these different media formats; the DVD player will allow playback of JPEG, WMA and MP3 files.

Memory Stick, Memory Stick PRO, Memory Stick PRO Duo, Memory Stick Duo are trademarks of Sony, its partents and/or its affiliates. Secure Digital and Mini Secure Digital are trademarks of SD Card Association. XD Picture Card is a trademark of Fuji Photo Film Co., Ltd.
