

# Call Waiting ID Telephone

BellSouth's PID99 Call Waiting ID Telephone has been designed to provide a clear and crisp telephone calling experience while incorporating features that make the latest phone company services like Caller ID and Call Waiting easier to use.

The phone combines Call Waiting with Caller ID. As with Caller ID, the phone lets you know who is calling before you answer it. The service displays the caller's name and phone number, and the date and time of each call. All caller information is stored in the order in which it was received for up to 99 calls.

You can identify an incoming caller when you are already on the phone by viewing the call information on the Caller ID display. You can then choose to answer the new call or not. Call Waiting Deluxe options from BellSouth can send the waiting caller a message asking them to hold, add the incoming caller into your conversation, drop the existing call and answer the new call or send the call to voice mail.

## CHECK YOUR PACKAGE CONTENTS

Make sure you have received the following items in the package.  
If any items are missing, contact the BellSouth customer service center  
at 1-800-733-2355.

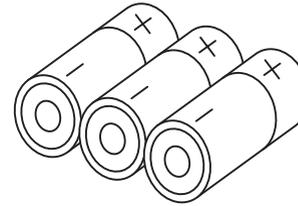

PID99 TELEPHONE BASE

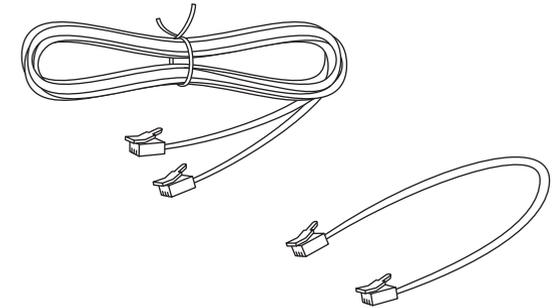

PID99 TELEPHONE HANDSET

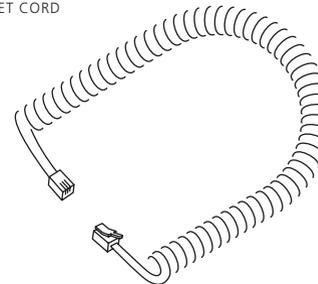

SIZE "C" BATTERIES (3) - INSTALLED

TELEPHONE LINE CORDS (2)

HANDSET CORD

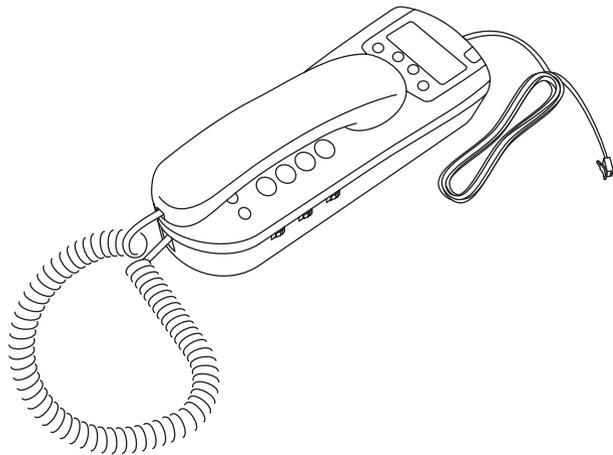

## SET-UP INSTRUCTIONS

### Step 1 Connect Cords

- Connect the handset cord from the jack at the bottom of the handset to the jack at the bottom of the phone.
- Connect telephone line cord from the jack at the top of the phone to the telephone wall jack.
- Place handset into cradle. Red light will flash twice.
- Lift the handset to confirm that a dial tone is present.

For diagram showing installation with an answering machine, see p.9  
For instructions on wall mounting, see p.10

### Step 2 Select the Language (English or Spanish):

- a) Press and hold the DIAL key while pressing the left ARROW key to see the selections.
- b) Release the DIAL key to confirm the setting.

### Step 3 Select Dialing Rule

The phone can automatically dial phone numbers that appear in the display. To do this, the settings must reflect your local dialing rules. If you use seven digits to dial local calls, select the DIAL 7 DIGITS setting. If you are required to dial 10 digits in your local area (area code + phone number), select the DIAL 10 DIGITS setting.

- a) Press and hold the DIAL key while pressing the right ARROW key to see the selections.
- b) Release the DIAL key to confirm the setting.

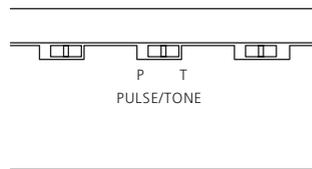

#### Step 4 Select Tone/Pulse Dialing Mode

Depending on your dialing system, set the Dial Mode switch as follows:

**If your dialing system is:**      **Set switch to:**

Tone	T
Pulse	P

If you are not sure of your dialing system, make a trial call with the Dial Mode switch set to T. If the call connects, leave the switch as is; otherwise, set to P.

#### Step 5 Programming Your Voice Mail Access Number

If you subscribe to Memory Call voice mail service through BellSouth, you can automatically dial your Voice Mail access number with a touch of the MESSAGE key.

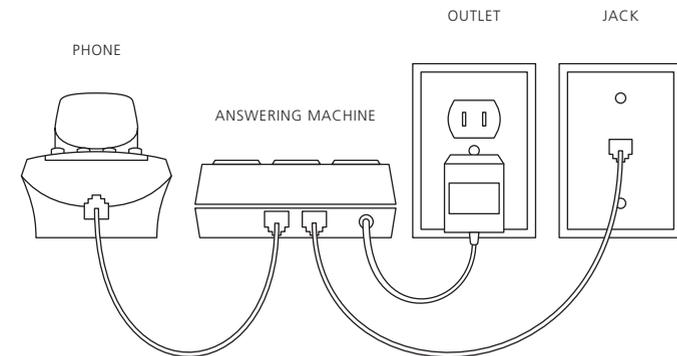

To program your Voice Mail access number:

- When the MESSAGE key is first pressed, the display will show ENTER PHONE NUM.
- Enter the Voice Mail access number exactly as you would normally dial it to retrieve your voice messages.
- Press the MESSAGE key again to store the number in memory. The display will show NUMBER STORED.

To change your Voice Mail access number previously stored in memory, press and hold the MESSAGE key until the display shows ENTER PHONE NUM. Then enter the new number and press the MESSAGE key again to store it in memory.

Once the number is stored, simply lift the handset, wait for dial tone and press the MESSAGE key. The phone will automatically dial your Voice Mail access number.

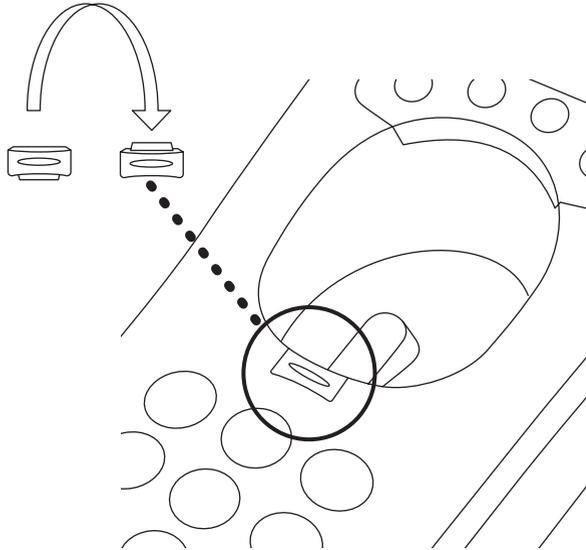

#### INSTALLATION WITH A TELEPHONE ANSWERING MACHINE

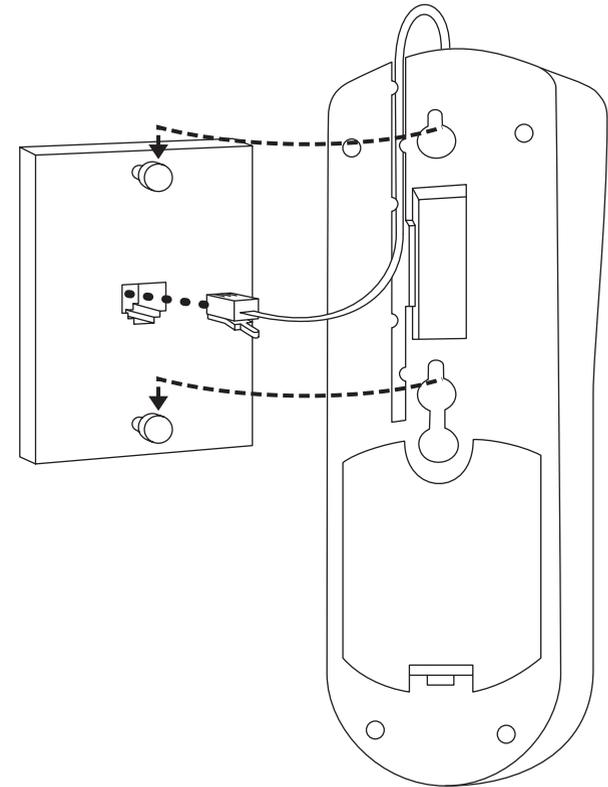

## WALL MOUNTING

The base of the phone is designed to be mounted on a standard telephone wall-mounting plate.

1. Reverse the handset tab. This tab holds the handset when you hang up. The end of the "hook" should face up when inserted back into the phone.

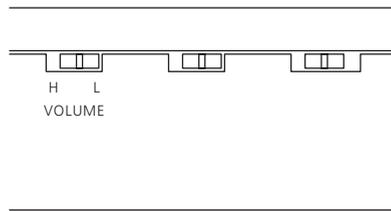

2. Using the short phone cord supplied, connect one end of the cord to the jack at the top of the phone and the other end to a telephone jack with wall plate.
3. Hook the phone onto the wall plate as shown.

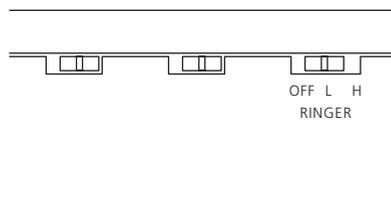

## ADJUSTING HANDSET VOLUME

The handset volume can be adjusted to High and Low volume settings. Using the Volume switch on the side of the phone, set it to H (high) or L (low).

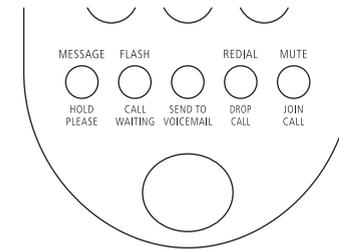

## ADJUSTING THE RINGER VOLUME

The ringer volume can be adjusted to High, Low or Off. Using the Ringer switch on the side of the phone, set it to H (high), L (low) or Off.

## FUNCTION KEYS

The phone has a row of keys that help you access to your local phone company's calling services.

You must subscribe to some of the phone company services in order for the associated features of the phone to work. For more information on these services and availability in your area, contact your local phone company.

## MESSAGE KEY

Voice Mail service provided by BellSouth takes your calls while you are away from your phone or even while you are on another call.

If the indicator light flashes red and the display shows MESSAGE WAITING, you know you have new voice messages waiting. To retrieve your messages, press the MESSAGE key to automatically dial your Voice Mail access phone number. When connected, enter your PIN code to retrieve your voice messages.

You must subscribe to Memory Call voice mail service through BellSouth in order to take advantage of this feature, and you must program your Voice Mail access phone number into the phone (see Programming Your Voice Mail Access Number on Page 8 for set-up instructions).

## **FLASH KEY**

When a Call Waiting call comes in, you can press the FLASH key to switch to the new call. To return to the original conversation, press the FLASH key again.

## **REDIAL KEY**

To redial the last number called, simply lift the handset and press the REDIAL key.

## **MUTE KEY**

To mute the line so that the calling party cannot hear you, simply press the MUTE key and MUTE will appear on the display. To take the line off mute, simply press the MUTE key again to resume the conversation.

## **CALL WAITING DELUXE KEYS**

The five function keys on the PID99 unit enable you to more effectively manage Call Waiting calls. These functions allow you to send the waiting caller a message asking them to hold, answer an incoming Call Waiting call, send the call to voice mail, drop the existing call and answer the new call or add the incoming caller into your conversation. Call Waiting Deluxe function keys, noted by the functions listed below, are only active during a Call Waiting call, otherwise the default key functions of MESSAGE, FLASH, REDIAL and MUTE apply.

## **HOLD PLEASE KEY**

When a Call Waiting call is received, by pressing this key a message is automatically played to the waiting caller asking them to hold. When you complete your existing conversation, you can then switch over to the Call Waiting caller on hold.

## **CALL WAITING KEY**

With Call Waiting, if a call comes in while you're on the line, a brief tone signals you that another caller is trying to get through. The brief Call Waiting tone is easily recognizable while you're on the phone. When you hear it, you have the option to take the new call or not. To switch over to the new call, just press and release the CALL WAITING button. To switch back to the first call, press and release the CALL WAITING button again. You can also deactivate Call Waiting on an as-needed basis – for example, before placing an important call or connecting to the Internet. Just hit \*70 before dialing the number to ensure you are not interrupted during the call.

## **JOIN CALL KEY**

When a Call Waiting call is received, by pressing this key the waiting caller is automatically joined into your existing conversation creating a three-way call.

## DROP CALL KEY

When a Call Waiting call is received, by pressing this key the existing call will be dropped and you will be connected with the new call waiting caller.

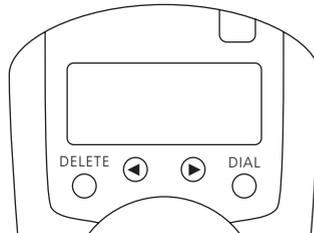

## SEND TO VOICEMAIL KEY

When a Call Waiting call is received, by pressing this key the waiting caller is automatically routed to voice mail.

## CALLER ID SERVICE

The phone is designed to be used with Caller ID service offered by BellSouth. The caller's information will be displayed after the first ring, provided that you have subscribed to Caller ID service. The phone can record information for up to 99 calls, including the time and date the call was received. The Caller ID information is stored from the most recent to the oldest call.

If you subscribe to Call Waiting Caller ID service, when a Call Waiting call is received, the new caller's name and phone number will be displayed.

Note that Call Waiting Caller ID information cannot be received by the PID99 phone if another telephone is simultaneously off-hook on the same telephone line. If a Call Waiting call comes in when two or more people are talking on separate telephones in the same location, you will hear the Call Waiting beep but the phone display will read EXT IN USE. This notifies you that the Caller ID information was sent by the phone company but because two or more phones were off-hook at the same time, the information could not be displayed.

## ARROW KEYS

Press the ARROW keys to scroll through the stored call entries. Calls are displayed in the order they were received.

The left ARROW key displays entries from newest to oldest (from 99 to 1).

The right ARROW key displays entries from oldest to newest (from 1 to 99).

When you reach the end of the call history, the screen displays END OF LIST.

## DELETE KEY

To erase the entry shown on the display press the DELETE key once. The display will show DEL and DEL ALL options. Press the ARROW keys to toggle the arrow to either delete the current record (DEL) or delete all records (DEL ALL). Once you have selected the delete option, press the DELETE key again. The display will show DELETED for one record or CALLS DELETED for all records.

- DEL – deletes current record
- DEL ALL – deletes all records

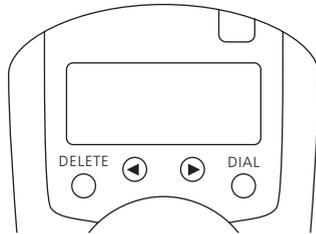

## DIAL KEY

To dial the phone number shown on the display, simply press the ARROW keys until the number you want to dial is displayed. Lift the handset and wait for a dial tone. Press the DIAL key once. The display will show DIAL and DIAL 1+ options. Press the ARROW key to toggle the arrow to either dial a local call (DIAL) or dial a long distance call (DIAL 1+). Once you have selected the dialing option, press the DIAL key again. The number will be dialed as shown on the display.

- DIAL – dials number for local call
- DIAL 1+ – dials number for long distance call

## NEW CALL AND MESSAGE WAITING LIGHT

- Green – if you have received new calls that have not been reviewed.
- Red – if you subscribe to Voice Mail service and you have at least one new message waiting.

The New Call Indicator and Message Waiting Light flashes green when you have received any new calls that have not yet been reviewed. If you subscribe to Memory Call voice mail service through BellSouth, the light will flash red whenever you have a new voice mail message waiting. For Voice Mail subscribers, the PID99 phone detects both stutter dial tone and FSK / Visual Message Waiting Indication.

## DISPLAY MESSAGES

PRIVATE CALLER

The calling party is blocking name and number information.

UNKNOWN CALLER

BellSouth is unable to receive information about the caller's name and number.

LINE ERROR

An error occurred while receiving the Caller ID information.

MESSAGE WAITING

You have received new voice mail messages in your Voice Mail service.

5 NEW CALLS

The total number of new calls received.

EXT IN USE

A Call Waiting call has just come in while another telephone extension was off hook. Caller ID information could not be displayed.

## DATE AND TIME

When not showing Caller ID information, the current Date and Time will appear on the display. There is no need to enter the date and time as it is transmitted automatically when Caller ID data is sent from BellSouth. After receiving the first call, the current Date and Time will be entered and will automatically appear on the display.

## DISPLAY CONTRAST

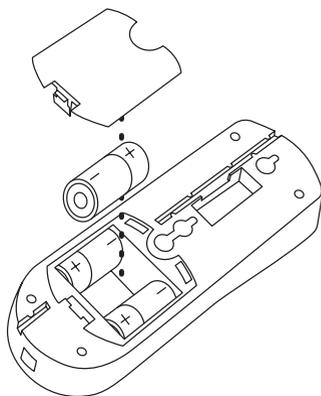

To adjust the contrast of the screen display, press and hold the DIAL key while repeatedly pressing the DELETE key to cycle through the contrast settings. Release the DIAL key to confirm the setting.

*Important: Do not press and hold the DELETE key without pressing the DIAL key. You could accidentally erase all the Caller ID entries if you press only the DELETE key.*

## BATTERY REPLACEMENT

Replace all three "C" size alkaline batteries when the display flashes LOW BATTERY. Use only high quality alkaline batteries for full operation of telephone features. (Batteries last for about one year, depending upon use).

- Remove the battery door.
- Remove the existing batteries and install three new "C" size alkaline batteries. Make sure to match the "+" and "-" of the batteries with the diagram inside the compartment.
- Put the cover back in its position and push gently until you hear the door snap securely into place.
- Batteries typically last about one year depending upon use.

## TROUBLESHOOTING TIPS

### Call cannot be connected even if dialed correctly.

- Check to confirm that the dialing mode of Pulse or Tone is set properly.

### The unit does not ring.

- The Ringer selector is set to Off. Set to High or Low.
- If there are several other telephones on the same line, try disconnecting some of the other telephones. Having too many telephones connected can also create problems such as low ringer volume or impaired sound quality during calls.

### Caller ID information does not display when the phone rings.

- Wait until the phone rings twice before answering.
- Make sure BellSouth has activated your Caller ID service.

### Information does not display when a Call Waiting call comes in.

- You must subscribe to Call Waiting Caller ID service for this feature to work. Call BellSouth to confirm you have signed up for Call Waiting Caller ID service.

### When you receive a call the display shows UNKNOWN CALLER or PRIVATE CALLER.

- In some calling areas, the name display service may not be available or the calling party has blocked the Caller ID data from being transferred with the call.

### There is no dial tone on the telephone.

- Check all cords to make sure that all connections are secure.
- Unplug the telephone and connect it to another modular jack. If it still does not work, and other telephones in your home are working, the problem is with this telephone.

### The LCD display is dim.

- Adjust the contrast control using the DELETE and DIAL keys to darken the display. See the DISPLAY CONTRAST section on Page 20 of this manual for instructions.

**Message Waiting Indicator Light does not flash and MESSAGE WAITING does not appear.**

- Make sure either Stutter Dial Tone or Visual Message Waiting Indication is offered by BellSouth and that it has been turned on.

**LINE ERROR message is displayed.**

- LINE ERROR appears on the display if the phone detects anything other than valid Caller ID information during the silent period after the first ring. If the telephone is answered between the first and second ring, the Caller ID information may not be received properly.
- LINE ERROR may indicate the presence of noise or static on your telephone line. If this condition persists, call the BellSouth service center.

**Caller ID information stored in memory is deleted**

- The Caller ID information showing on the display will be erased when the DELETE button is pressed.
- All Caller ID information stored in memory will be lost when the batteries run down.

**MAINTENANCE**

Clean the outside of the phone with a soft damp cloth. Do not use any type of abrasive pad, scouring powder or solvent such as alcohol or benzene as they may damage the finish of the phone cabinet.

**HEARING AID COMPATIBILITY**

The PID99 is compatible with inductively coupled hearing aids.

**FCC INFORMATION**

This product is registered with the Federal Communications Commission and is in compliance with parts 15 and 68, FCC Rules and Regulations.

To comply with FCC regulations, the following conditions must be met:

**This device complies with Part 68 of the FCC rules.**

The label on the bottom of this device contains the FCC registration number and ringer equivalence number.

If requested by the telephone company, the FCC registration number of this device and the ringer equivalence number must be reported. USOC jack RJ11. For reliable operation, the sum of the ringer equivalence numbers for devices connected to a single telephone line should not exceed five. This device must not be installed on coin operated telephone lines or party lines.

**Rights of the Telephone Company**

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance, (2) afford you the opportunity to correct the situation and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations.

The telephone company may make changes in its communications facilities, equipment, operations of procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service.

**This device complies with Part 15 of the FCC rules.**

Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Repair work on this device must be done by Consumerware, Inc. or an authorized repair station.

## LIMITED WARRANTY

BellSouth warrants this product to be free from manufacturing defects for a period of one year from the original date of consumer purchase. This warranty is limited to the repair or replacement of this product only and does not extend to consequential or incidental damage to other products that may be used with this unit. This warranty is in lieu of all other warranties expressed or implied. If the unit should prove defective within the warranty period, please call the BellSouth Customer Service Center at

1-800-733-2355 for product return information.

## SAFETY INFORMATION

This symbol is to alert you to important operating or servicing instructions that may appear in this user's manual. Always follow basic safety precautions when using this product to reduce the risk of injury, fire, or electric shock.

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
4. Do not use this product near water, for example, near a bathtub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table. This product may fall, causing serious damage to the product.
6. Install this product in a protected location where no one can step on or trip over the line cord. Protect cords from damage or abrasion.
7. Slots or openings in the cabinet and the back and bottom are provided for ventilation, to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, or other similar surface. This product should never be placed near or over a radiator or heat register.
8. To reduce the risk of electric shock, do not disassemble this product, but take it to a qualified serviceperson when some service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
9. Unplug this product from the wall jack and refer servicing to qualified service personnel under the following conditions:
  - a) When the telephone line cord is damaged or frayed.
  - b) If liquid has been spilled into the product.
  - c) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions because improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
  - d) If the product has been exposed to rain or water.
  - e) If the product has been dropped or the cabinet has been damaged.
  - f) If the product exhibits a distinct change in performance.

10. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
11. Do not use the telephone to report a gas leak in the vicinity of the leak.

**If Your Product Utilizes Batteries, The Following Additional Precautions Should Be Observed:**

1. Use only the type and size battery(ies) specified in the user manual.
2. Do not dispose of the battery(ies) in fire. They may explode. Check with local codes for possible special disposal instructions.
3. Do not open or mutilate the battery(ies). Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling batteries in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
5. Do not attempt to recharge the battery(ies) provided with or identified for use with this product that are not intended to be charged. The batteries may leak corrosive electrolyte or explode.
6. Do not attempt to rejuvenate the battery(ies) provided with or identified for use with this product by heating them. Sudden release of the battery electrolyte may occur causing burns or irritation to eyes or skin.

**SAVE THESE INSTRUCTIONS.**

**For questions regarding the operation of this product, call the BellSouth Customer Service Center at 1-800-733-2355.**
