Marshall

MG SERIES

Drawing on all the vast tonal experience of the Marshall design team, the Marshall MG Series amplifiers are built to the same exacting standards as all Marshall products.

Utilising new technologies, some of which were developed for our critically acclaimed AVT range, the new MG Series raises the standard for what can be expected from a value-for-money range of guitar amplifiers and defines a new benchmark.

Don't let their diminutive size fool you either - each one delivers a dynamic yet toneful punch and they're all suitable for a wide variety of purposes including rehearsal, recording and even live work. From bedroom to stadium, there is a Marshall MG model to suit your needs.

FREQUENCY DEPENDENT DAMPING

Our exclusive, groundbreaking FDD circuitry gives the MG Series the unbelievable depth of sound and unique 'feel' of our legendary all-valve amps. It does this by mimicking the way an all-valve power amp interacts with the speaker(s) it is driving. This radical new technology is incorporated on all MG Series guitar amplifiers.

All the MG Series are equipped with Marshall's proprietary speaker emulation system for the Headphone Out and Line Out. Combined with a CD input, each of these amplifiers is ideal for recording as well as practice.

Custom-voiced Chorus, Delay, Reverb and Flange effects give the warmth and feel of analogue stompboxes in a flexible and easy-to-use digital format.

MG SERIES 10CD

The mammoth roar of this 10 Watt, twin channel, mini monster has to be heard to be believed! Coupled with great features like FDD (see left), a CD input, Emulated Headphone jack and Emulated Line Out, this sturdy 1x6 1/2" combo is the perfect entry-level practice amp... and it's great for backstage warm-up too.

MG SERIES 15CD

Armed with two channels, a three band EQ, FDD and 15 Watts RMS of real Marshall power, the 1x8" MG15CD combo delivers superb tone - from pristine clean to out-and-out filth! The ultra flexible Contour control lets you fine-tune those all-important mids from woody and warm to scooped and slammin'...and all points in-between.

MG SERIES 15CDR

Already hailed as a classic, the MG15CDR adds a natural sounding Spring Reverb to all the outstanding features and tonal flexibility of the MG15CD.

MG SERIES 15DFX

This twin channel, 1x8" combo is the most affordable Marshall to ever house Digital Effects (DFX). Its impressive array of Reverb, Chorus, Flange and Delay effects are easy to dial-in and sound incredibly natural too. With its CD input, Emulated Headphone jack and Emulated Line Out, this feature-laden package is hard to beat!

MG SERIES 30DFX

30 Watts of power and a custom-voiced 10" speaker gives the MG30DFX all the girth and grind of its bigger brothers in a compact, rugged package. Footswitchable Clean and Overdrive channels with independent tone controls add to its already impressive features.

MG SERIES 50DFX

Delivering 50 Watts RMS of Marshall power through its custom-designed 12" speaker, the twin channel MG50DFX delivers the goods both at home and onstage. Its specially-voiced DFX section offers Chorus/Delay, Delay, Chorus or Flange effects plus a natural sounding, digital Reverb with its own individual level control. Add to this our revolutionary FDD, footswitchable channels, a Series FX loop and more, and you have an unbeatable package for the price.

MG SERIES 250DFX

Double the power of the feature loaded, versatile MG50DFX and you get the MG250DFX with its stereo, 50W + 50W, power amp driving 2x12" custom speakers - awesome!

MG100DFX

SERIES

This compact, gig-ready, 100 Watt, 1x12" combo is a powerhouse of killer tone. Its two, footswitchable channels offer a pair of selectable modes – Clean/Crunch on the Clean channel and OD1/OD2 on the Overdrive channel. Each channel has independent tone controls for Bass, Middle and Treble, and the Overdrive channel also features our critically acclaimed Contour control to ensure maximum tonal versatility.

The MG100DFX's specially-voiced DFX section offers Chorus/Delay, Delay, Chorus or Flange effects plus a natural sounding, digital Reverb with its own individual level control. Add in our revolutionary FDD technology, a Parallel FX Loop (with switchable level and an FX Mix control), custom voiced speaker, CD input, Emulated Headphone jack, Emulated Line Out plus a Master Volume control, and you have a world-beating combo.

MG100HDFX

SERIES

Boasting the same impressive features and staggering versatility of the MG100DFX combo, this awesome, 100 Watt head will drive any cabinet from the Marshall range, but is best suited to the MG412A (angled) and MG412B (straight) 120W 4x12" cabinets. Unbelievable tone, feel and projection come as standard.

MG15MSII MICROSTACK

SERIES

The MG15MSII Microstack is a complete Marshall stack that will fit into any room. The amplifier is based around the MG15CDR and features two channels, spring reverb and Marshall's proprietary FDD (frequency dependent damping) technology. Supplied with two 1x10" speaker cabinets it looks and sounds great. The dream of owning a Marshall stack has now become a reality!
