

marantz®

The Marantz MA-6100 monoblock power amplifier is ideal for use in a wide variety of high performance multi-channel home theater and audiophile music systems. Its compact size and external control input make it perfect for custom installation applications, or for adding additional channels of amplification to expand an existing system. The THX Ultra® certified MA-6100 provides a generous 125-watts (into 8 ohms) of high-current power, to reproduce the most demanding movie soundtracks and music with unsurpassed clarity and impact.
