Swann Communications warrants this product against defects in workmanship and material for a period of one (1) year from it's original purchase date. You must present your receipt as proof of date of purchase for warranty validation. Any unit which proves defective during the stated period will be repaired without charge for parts or labour or replaced at the sole discretion of Swann. The end user is responsible for all freight charges incurred to send the product to Swann's repair centres. The end user is responsible for all shipping costs incurred when shipping from and to any country other than the country of origin.

The warranty does not cover any incidental, accidental or consequential damages arising from the use of or the inability to use this product. Any costs associated with the fitting or removal of this product by a tradesman or other person or any other costs associated with its use are the responsibility of the end user. This warranty applies to the original purchaser of the product only and is not transferable to any third party. Unauthorized end user or third party modifications to any component or evidence of misuse or abuse of the device will render all warranties void.

By law some countries do not allow limitations on certain exclusions in this warranty. Where applicable by local laws, regulations and legal rights will take precedence.

■ FCC Verification:

NOTE: This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and the receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

■ IMPORTANT NOTE: Prohibition against eavesdropping

Except for the operations of law enforcement officers conducted under lawful authority, no person shall use, either directly or indirectly, a device operated pursuant to the provisions of this Part for the purpose of overhearing or recording the private conversations of others unless such use is authorized by all of the parties engaging in the conversation.

■ WARNING: Modifications not approved by the party responsible for compliance could void user's authority to operate the equipment.

■ IMPORTANT SAFETY INSTRUCTIONS:

- Make sure product is fixed correctly and stable if fastened in place
- Do not operate if wires and terminals are exposed

Problem: I can't see the camera on my TV.

Solution: Ensure the camera is plugged in and the TV or VCR is tuned to the correct input channel.

Problem: The image is too far away.

Solution: Change the lens to the larger telephoto lens for a zoomed in image. Unscrew the attached lens and replace with telephoto lens.

Problem: The BNC Extension Cable will not connect to my TV.

Solution: Connect the BNC to RCA adapter to the end of the Extension Cable and plug into the TV.

Problem: On my Swann DVR, Video Loss appears where my camera should be.

Solution: Check the Extension cable is securely connected to the camera and check the connection is secure on the back of the DVR. Also ensure the camera has power by trying a second power outlet.

Viewing the Camera on Your TV or VCR

■ Viewing the PNP-50 on a TV

After connecting the PNP-50 Camera directly to your TV and powering it on as described on page 4, tune the TV to the correct input channel.

On your TV's remote control, the input button is usually labelled as Input, Source, AV, Channel 0, AUX etc.*

■ Viewing and Recording the PNP-50 on a VCR

Connect the PNP-50 into an available input channel on your VCR in the same manner as the TV connection listed on page 4. Turn on your VCR and TV as if you were about to play a VCR tape.

On your VCR's remote control, find the input button with is usually labelled as L1, L2, Input, Source, AV, Channel, 0, AUX etc.* Insert a tape and push record to record the camera.

*Consult the TV or VCR instruction manual for details about changing input channels

Tips & Suggestions

Never aim the camera directly at the sun as it may damage the sensor

Test all connections and ensure the camera is working correctly prior to permanent installation

Install cameras high enough or out of reach to avoid tampering

Place Security Stickers in a visible location to alert potential thieves they are being monitored

Mix real cameras with dummy cameras to give the impression of increased security coverage

Purchase a Swann DVR to record multiple cameras simultaneously and easily monitor your property.

Place cameras in high traffic areas such as doorways to maximise security

Use only the included Power Supply and do not modify or cut wires
