ELECTRIC RANGE

LG Design

This range is comprised with an abundance of stainless steel for a striking presentation. The stainless steel backsplash, control panel, cooktop surface, door and handle all add to the contemporary and modern look.

Spacious 5.6 cu.ft. Capacity

Cooking for a full house is no longer a tight squeeze with LG's 5.6 cu.ft. electric range. Not only can you cook a large turkey, but you'll have room for biscuits and a casserole too. The elegant blue interior complements the exterior styling and gives your range a more premium look.

Dual Convection System

Twin Fan and dual heating elements delivers a 30% faster preheat time* and insures even heat distribution for uniform baking.

IntuiTouch™ Control System

Easy to use and easy to clean, the IntuiTouch™ Control System makes operating your range a snap. The left side of the panel mirrors the cooktop elements, while the right side controls the oven functions.

Warming Drawer

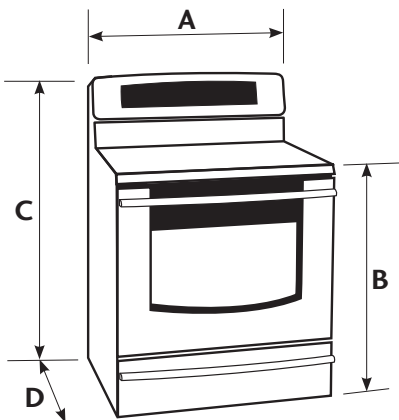

While preparing the rest of your meal, the warming drawer can be used to keep already cooked foods at serving temperature. With 5 heat settings, you can warm everything from rolls to porkchops so they can be served hot and fresh.

* Based on testing results comparing standard LG convection range to the dual convection range (325°F) mode.

Installation Reference

(see chart at right for measurements)
