

# CamPocket Pixel camera bags

**A sporty camera bag for digital equipment**

The CamPocket Pixel serves to protect all digital equipment. In the large, cushioned main compartment a digital, APS or auto-focus camera (or mobile phone) is protected from all sides.

The additional front pockets offers more room for further accessories such as batteries, rechargeables etc, meanwhile the two integrated pockets can safely transport memory cards.

The CamPocket Pixel can be transported using the removable shoulder strap or the button-activated belt loop.

Our CamPocket Pixel is made of a robust and heavy-duty material in a sporty design, available in black & orange.
