

Projector-Laptop Setup

Instructions for connecting
Toshiba data projector (LCD) to Laptop

Connect VGA cable

1. Plug in the power cables for projector and laptop
2. Connect one end of the VGA cable to the **RGB** port of the data projector
3. Connect other end of VGA cable to **blue** video port of the laptop

Turn on Equipment

- Completely boot up the laptop. No password needed
- Push the rocker switch on the back of the projector
- Push the **standby/on** button on the projector

If no image displays ...

- Continue pushing the input button on the data projector until **RGB** displays on the screen
- Push the **Fn** key and the **LCD/CRT** key on the laptop simultaneously. Wait a moment. If you get an image on the screen but no image on the laptop, repeat the process

Focus & Shut down

- Focus the projector using the focus knob on front of the projector
- Push the **Standby/On** button to shut down the data projector. *Wait for fan to stop before unplugging power cord*
