

Polycom® Vortex® EF-IR11

Remote Infrared Controller for Vortex Products

Benefits

Control equipment from across the room –
Works up to 50 feet (15.2 meters) from receiver

Easy to use – Comfortable, familiar control device allows all levels of users to manage Vortex products during meetings

Productivity-enhancing features –
Ability to execute up to 35 macros (cascading commands in Vortex units) with the single press of a button

Controlling your Vortex voice conferencing products is as simple as the push of a button. With a variety of controls at your fingertips, the Vortex EF-IR11 controller makes it easy to adjust volume, bring a telephone call into the conference, or execute custom commands.

Users of Vortex voice conferencing products frequently need to move around the room. For example, a teacher in a distance learning classroom might be moving between a whiteboard and lectern, as well as walking up and down the aisles in the classroom. Users such as these benefit from simple handheld controllers such as the Vortex EF-IR11.

The EF-IR11 provides direct control of the Vortex EF2280, EF2201, EF2211 and EF2241 products. With the EF-IR11, a user can adjust volume, mute and unmute audio, activate a phone line, dial out or answer calls, or execute any of 35 macros that are user-programmed into the Vortex units. Macros could include instructions for codec controls, muting and unmuting of telephone callers or executing a preset in a Vortex unit. Dedicated buttons for two speed dial numbers (programmed into a Vortex telephone interface) make it easy to connect to frequently-called locations.

An EF-IR11 consists of the handheld device (shown above) and a small infrared receiver which connects to the RS-232 port on a Vortex unit. The receiver translates infrared signals to RS-232 commands, which are then passed to all linked Vortex units in the system.

The direct-link audio choice for The Polycom Office™

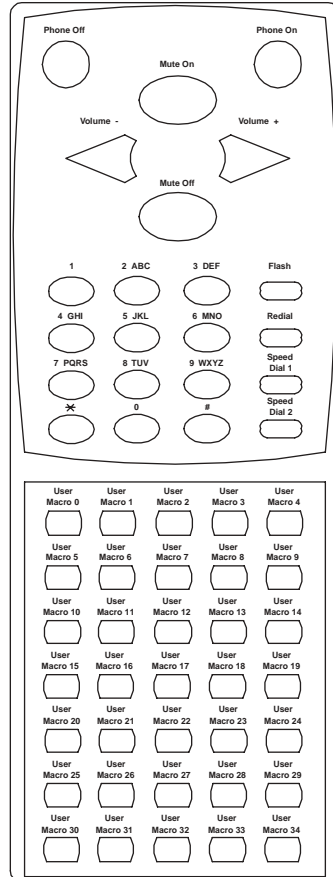

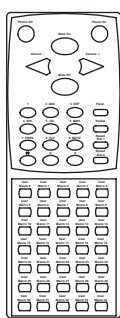

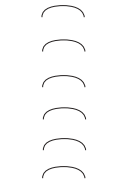

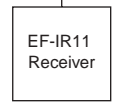

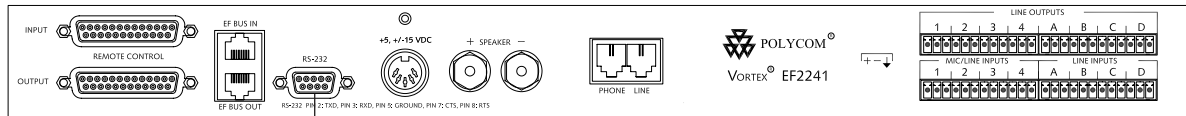

With integrated video, voice, data, and Web capabilities, The Polycom Office is the only solution that offers you an easy way to connect, conference, and collaborate any way you want. The Polycom Office is our commitment to making distance communications as natural and interactive as being there. Work faster, smarter, and better with the Polycom Vortex EF-IR11 and The Polycom Office.

Video Voice

Connect. Any Way You Want.

Typical Installation and Button Layout

Polycom Vortex EF-IR11 Technical Specifications

Dimensions - Transmitter

- 7.56" H x 2.25" W x 0.94" D (19.2 cm x 5.71 cm x 2.38 cm)

Dimensions - Receiver

- 1.00" H x 2.38" W x 2.25" D (2.54 cm x 6.03 cm x 5.71 cm)

Weight

- 0.57 lb. (0.26 kg) dry, 1 lb. (0.45 kg) shipping

Connectors - Receiver

- RS-232: DB9M with 6' (1.83 m) cable

Power - Transmitter

- 4 AAA batteries; est. life 1 year

Power - Receiver

- External supply (provided); 120 VAC, 60 Hz

Transmitter Frequency

- 38 kHz Infrared

Receiver Data

- Baud Rate 9600 bps; no flow control

System Range

- Maximum 50' (15.2 m) between transmitter and receiver

Angle of Acceptance

- 90 - 120 degrees
