Wood in its natural state comes with variations in color and grain, so not all pieces of wood will match in color and grain. These variations are compounded when you try to match a number of pieces of wood, such as you would have when making a piece of furniture. This is normal.

- Always test any polish in a discrete location first, such as the back of the stand, to make sure that there is no adverse reaction.
- Dust frequently with a soft cloth.
- Never slide objects across surfaces. Lift objects from the top surface rather than dragging them across the finish when moving them.
- Do not expose your stand to direct sunlight, drying heat sources, or dampness.

## Glass

- Use a commercial liquid glass cleaner and a soft cloth.
- Do not use harsh powders or any other abrasive substances as they will scratch the glass.
- Clean spills immediately with a soft, damp cloth.
- Protect surfaces by using felt, leather, or cork under accessories.
- Use a protective pad when using your stand as a writing surface (especially when using a ballpoint pen).
