

Security and safety
solutions for
multi-family
properties.

It's time for a Vulnerability Survey.

Knowing where your building's security and safety is vulnerable can help you make informed decisions about where and when to make upgrades or changes. We will evaluate every door opening in your building for potential trouble spots, and recommend replacements or improvements specific to each door and its function. Our team will also implement a multi-level system that protects your people, property and assets, while minimizing installation, operation and maintenance costs.

To find out how to schedule your Vulnerability Survey contact your Ingersoll Rand representative at securitytechnologies.ingersollrand.com

Von Duprin Exit Devices

Dor-O-Matic Closers

Ingersoll Rand provides security solutions for every door opening in your building.

Multi-family buildings come with a unique set of access control challenges. That's why Ingersoll Rand delivers a full spectrum of safety and security services ranging from basic key systems to advanced electronics and everything in between. But we also know that no two buildings are alike, so we'll work closely with you to develop a smart solution tailored to your building's needs.

Service and support that makes your job easier.

Because we're experts in safety and security, we make your job easier by showing you exactly the solutions you need to meet building and life safety codes, as well as your budget and style needs.

- Door and hardware specification writing
- Preparation of hardware sets with door schedules
- Review and editing of product submittals
- AIA continuing education
- Review of project drawings and application options
- Budget estimating
- Security and safety vulnerability assessments
- Product and code consulting
- Key system management

VON DUPRIN®

Von Duprin designs and manufactures exit devices according to ISO 9001 standards, and meets or exceeds accepted US domestic and international standards. Our exit devices are sleek, tough and built to last. Choose from a complete series of innovative exit devices, as well as electronic access control systems and accessories.

LCN

LCN closers have set the industry standard for years of trouble-free performance. In fact, some of our closers have been in service for over 40 years. High quality materials and constant innovation have made LCN the premium door closer in the industry.

STEELCRAFT

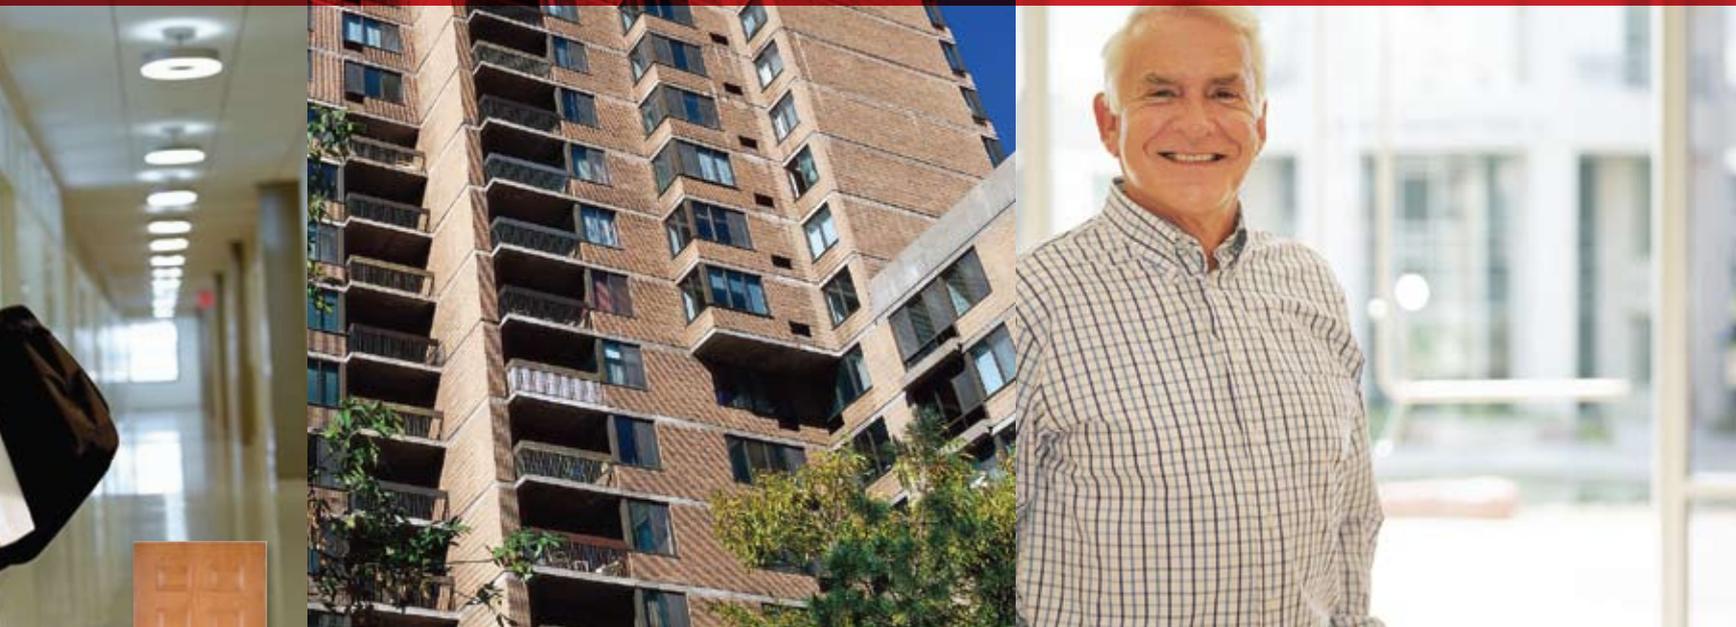

Steelcraft doors and frames are built to fill openings with needs ranging from light commercial to maximum duty performance. With full-glass, half-glass, narrow-lite, vision-lite and flush panel styles available, Steelcraft provides the industry's highest quality frames, doors and components, in the widest selection of sizes, styles and designs.

FALCON Falcon Monarch Dor-O-Matic

Falcon locks, closers and exit devices are built using high quality materials that deliver durability, convenience and unmatched value for multi-family applications.

- **Falcon** deadbolts, knobs and levers come with standard or interchangeable core cylinders for total versatility and convenience
- **Monarch** exit devices are sleek, functional, durable and meet or exceed all life safety and building code requirements
- **Dor-O-Matic** exit devices complement aluminum and glass construction and are your best choice for narrow stile aluminum doors
- **Dor-O-Matic** closers are designed to fit virtually any new construction commercial application and, in many cases, provide an identical footprint that's also ideal for retrofit
