

# MaxAttach NAS 4000 Series Quick Start Card

*Thank you for choosing a Maxtor MaxAttach™ NAS 4000 Series file server. Take a moment to verify the contents in your box and note the serial number of your MaxAttach for future reference. The procedures outlined here assume that you are familiar with networking and system administration basics. If not, please refer to the Installation and Configuration Guide on the enclosed MaxAttach NAS 4000 Series CD.*

## Box Contents

- MaxAttach NAS 4000 Series file server
- Quick Start Card
- MaxAttach NAS 4000 Series End User License Agreement
- Power cord
- CAT-5 Ethernet cables (2)
- Mounting ears (2) with screws
- Rubber feet (4)
- MaxAttach NAS 4000 Series CD containing:
  - MaxNeighborhood™ Setup and Discovery Wizard
  - MaxAttach NAS 4000 Series documentation
- 1Safe™ for MaxAttach client backup software CD

## Unit Information

Please record the following information:

Model Number: \_\_\_\_\_

Serial Number: \_\_\_\_\_

## System Requirements

It will be necessary for your workstation to have the following:

- Windows 95/98/Me/NT(SP5)/2000
- Internet Explorer v5.01 SP1 or above
- Network Interface Card (NIC)
- Client for Microsoft Networks enabled over TCP/IP
- CD-ROM Drive

## Connect the MaxAttach to your Network

1. Connect one of the enclosed CAT-5 Ethernet cables to either 10/100 Base T Ethernet port on the back of your MaxAttach. Insert the other end of this cable into a 10/100 Ethernet connection on your network hub or switch. If you connect both Ethernet ports to your network, they are pre-configured to enable fail-over and load balancing. Use the power cord to connect the MaxAttach to a power source.
2. Make sure the main power On/Off rocker switch located at the back of the unit is in the On position. Next, press the soft-power button on the front panel. The power light will begin to flash and continue flashing for several minutes during the power-up cycle. When the power light stops flashing and remains on, your MaxAttach is ready to configure.

## Install the MaxNeighborhood Software

1. Insert the CD labeled MaxAttach NAS 4000 Series into your CD-ROM drive. If the MaxAttach menu does not appear shortly after insertion, use Windows Explorer to locate and launch the Setup file on the CD.
2. From the opening screen, select MaxNeighborhood Setup & Discovery Wizard, and then follow the on-screen instructions.
3. When the installation is complete, select the option to launch MaxNeighborhood, and then click on the FINISH button. A MaxNeighborhood window will appear with a "SEARCHING, Please Wait. . ." message. When the search is complete, the MaxAttach unit (s) on your network will be displayed in the window grid.

## Configure your MaxAttach

1. If you have a DHCP server operating on your network, skip to step 3 below.
2. Select the MaxAttach unit you just installed by single-clicking the factory default server name. The default server name will begin with the letters "MA". Select "Change Settings". Enter the desired IP Address, Net Mask, Gateway and set DHCP Client to Disabled. Clicking on the "Apply" button to commit the changes. The server will then automatically reboot. Close the "Change Settings" window. After the system has completed rebooting, press the "Refresh" button.
3. Double-click on the factory default server name appearing in the MaxNeighborhood window. The default server name will begin with the letters "MA". Your web browser will launch and display a login screen. Enter the login name "Administrator" (without quotes) and leave the password blank. Select "Administer this server appliance". A second identical login will be required.
4. The First Time Setup Wizard will help you set the date and time, assign the administrator password, setup E-mail alert notifications, and assign a name for your MaxAttach. Depending on the changes made, you may be instructed to reboot the system.
5. Once rebooted, your MaxAttach NAS 4000 Series server is ready for use.
