Model # AEN-U35SAB

#### Package Contents:

- 3.5" SATA Enclosure with Stand
- Power adapter
- USB 2.0 Cable
- Quick Installation Guide
- Screwdriver and screw set

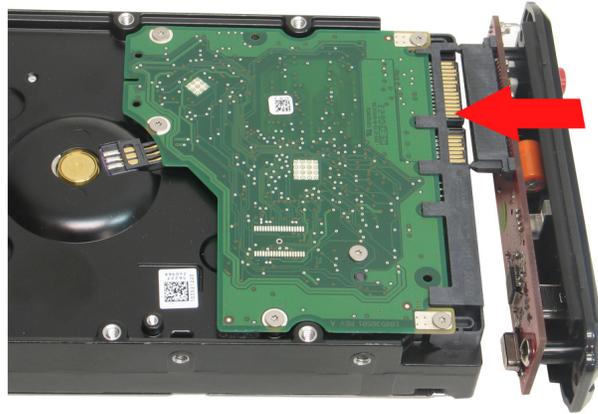

## Section 1

### Hard Drive Installation

**Step 1** Use the provided screwdriver to remove the two screws on the right side of the enclosure. Pull out the right panel.

**Step 2** Attach the SATA connectors to your hard drive.

**Step 3** With the hard drive label facing up, attach the guides to both sides of the hard drive.

The picture below shows how the guide being attached to the hard drive correctly. If the guides are not properly installed, the hard drive cannot be inserted into the enclosure case.

**Step 4** Line up the guides with the case, and slide the hard drive back in. The enclosure should slide shut.

**Step 5** Secure the two screws that were removed in step 1.

**Step 6** Connect one end of the power cord to the back of the enclosure and connect the other end to a power outlet.

**Step 7** Connect one end of the USB cable to the enclosure and the other end to your computer.

**Step 8** Press the power button to turn the power ON.

The hard drive is now ready to use and you can find it under “My Computer”.

**Congratulations! The hard drive installation is complete.**

Note: If you do not see your hard drive under My Computer, please continue on Section 2.

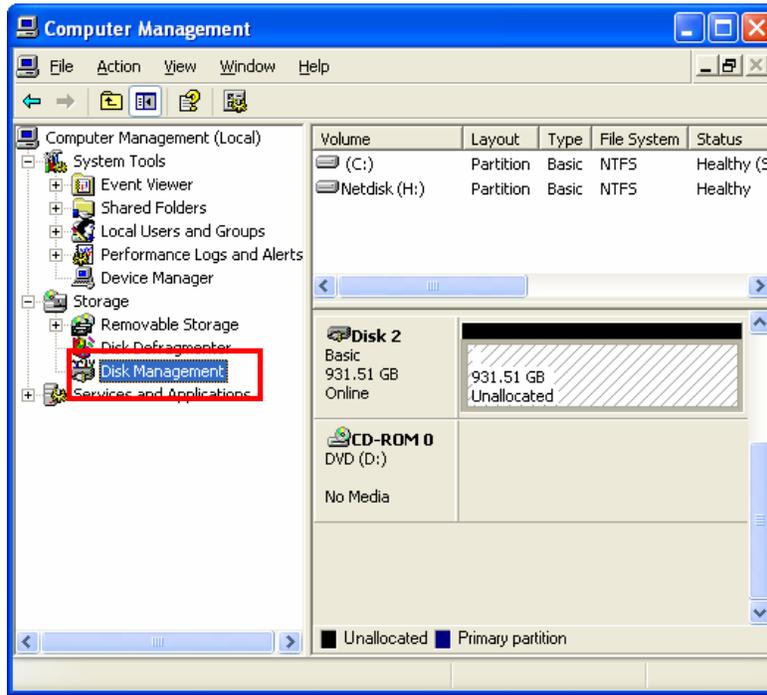

## Section 2

### Disk Management

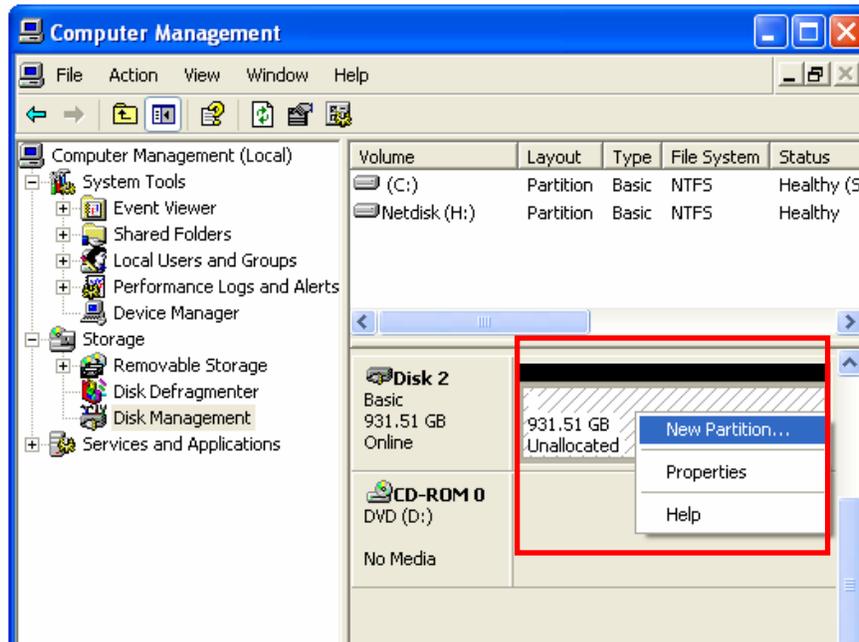

If your disk drive is brand new, you might not be able to see it under “My Computer” before it is formatted. Please go through the following steps to format the new drive.

**Step 1** Go to **Control Panel > Administrative Tools** or if you are at category view, go to **Control Panel > Performance and Maintenance > Administrative Tools**, double click on **Computer Management**.

**Step 2** Click on **Disk Management** on the left menu bar. The new disk information should be displayed on the right panel.

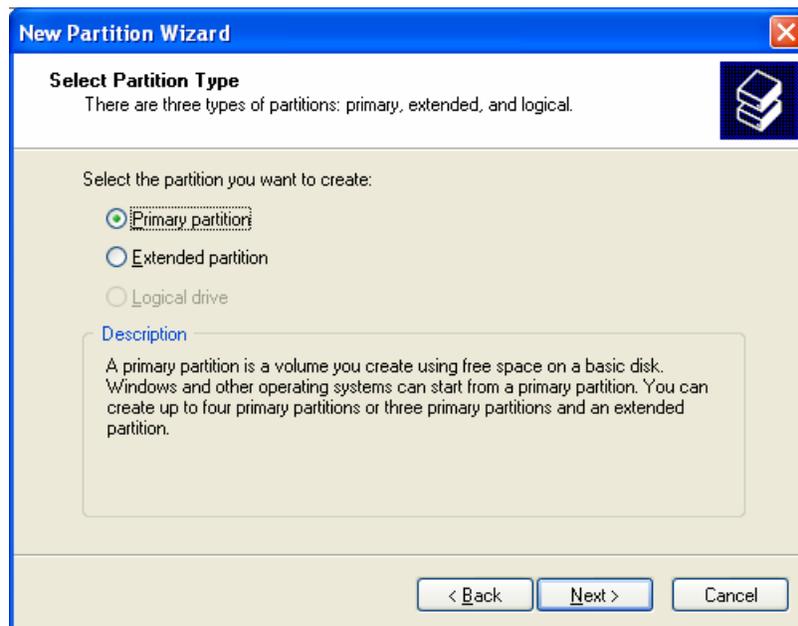

**Step 3** Right click on the Unallocated disk and select **New Partition** from the menu.

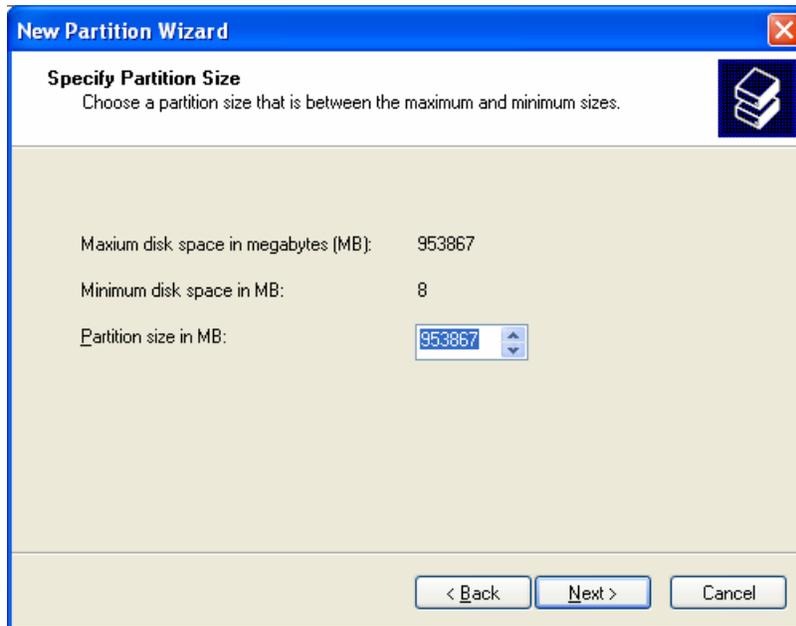

**Step 4** Click **Next** to start the New Partition Wizard.

**Step 5** Select the desired Partition Type and click **Next**.

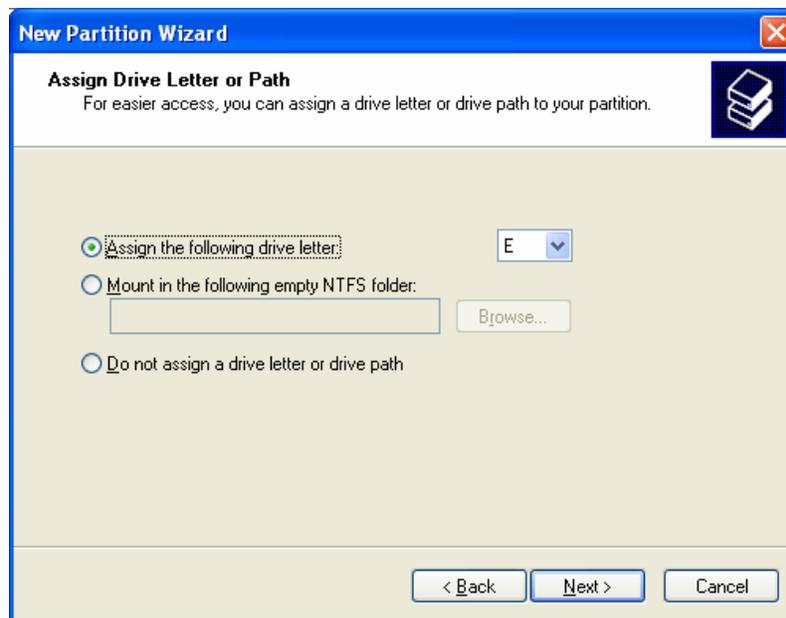

**Step 6** Enter the desired Partition Size and click **Next**.

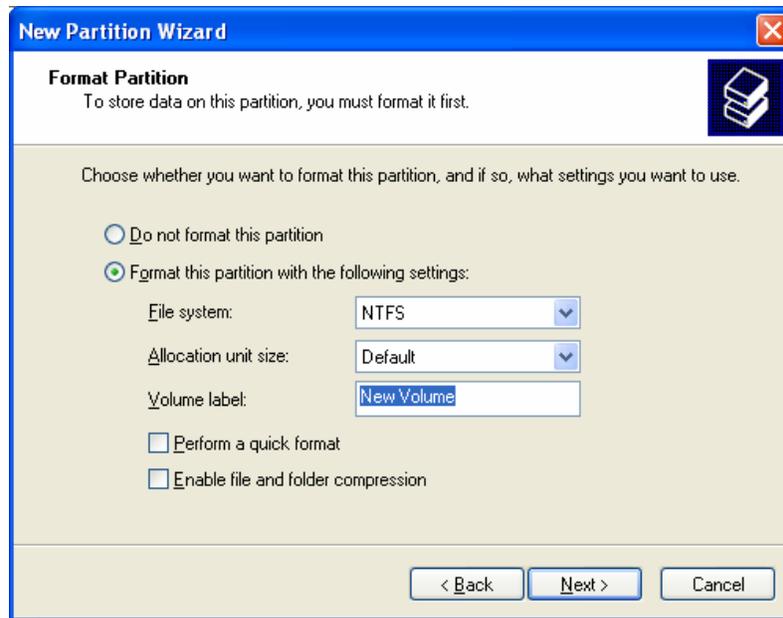

The screenshot shows the 'New Partition Wizard' dialog box with the title bar 'New Partition Wizard' and a close button. The main heading is 'Specify Partition Size' with a sub-instruction: 'Choose a partition size that is between the maximum and minimum sizes.' Below this, there are three rows of information: 'Maximum disk space in megabytes (MB): 953867', 'Minimum disk space in MB: 8', and 'Partition size in MB: 953867'. The '953867' is shown in a text box with up and down arrow buttons. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'.

**Step 7** Select **Assign the following drive letter** and select a letter for the new disk drive or you can select other options preferred. Click **Next**.

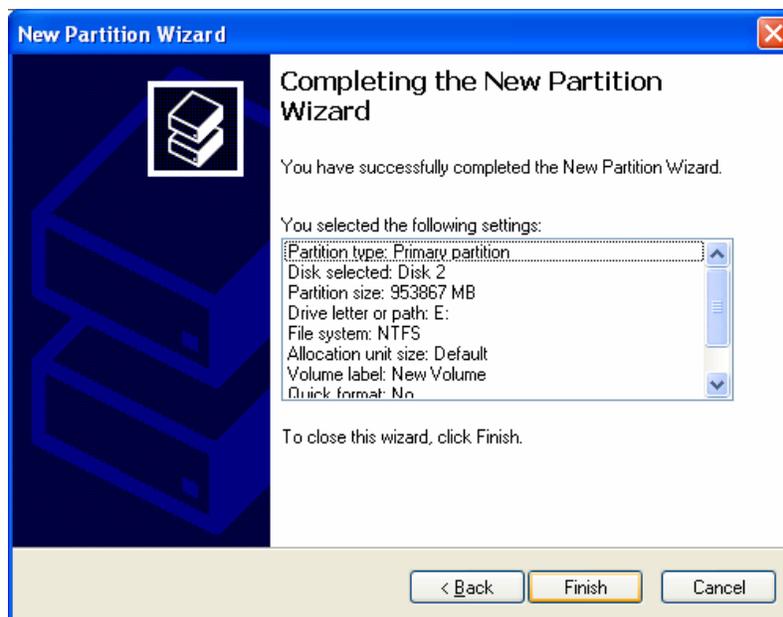

The screenshot shows the 'New Partition Wizard' dialog box with the title bar 'New Partition Wizard' and a close button. The main heading is 'Assign Drive Letter or Path' with a sub-instruction: 'For easier access, you can assign a drive letter or drive path to your partition.' Below this, there are three radio button options: 1) 'Assign the following drive letter:' with a dropdown menu showing 'E'; 2) 'Mount in the following empty NTFS folder:' with an empty text box and a 'Browse...' button; 3) 'Do not assign a drive letter or drive path'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'.

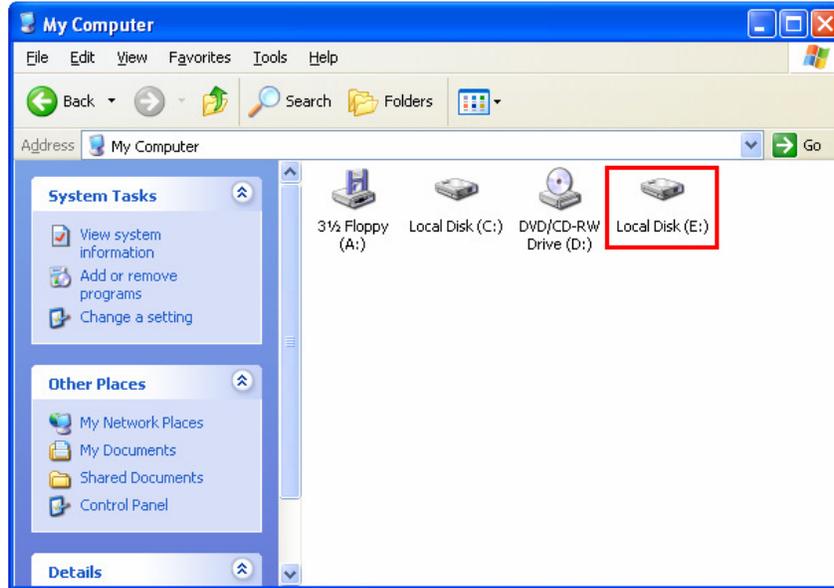

**Step 8** Select the File system and change the Volume label or you can select other options preferred. Click **Next** to start formatting the hard drive.

**Step 9** Click **Finish** after the New Partition Wizard completed.

Go to **My Computer**, the new drive should be listed there.
