# Dell™ Workgroup Laser Printer W5300

1	Standard output bin	5	On/Off switch
2	Operator panel	6	Power cord connector
3	Multipurpose feeder	7	Ethernet port
4	Standard tray (500 sheets)	8	USB port

If you purchased additional options, for example, paper trays, a duplex unit, or an envelope feeder, refer to the *User's Guide* (**Start → Programs or All Programs → Dell Printers → Dell Laser Printer W5300 → User's Guide**) for installation instructions.

# Notes, Notices, and Cautions

**NOTE:** A NOTE indicates important information that helps you make better use of your computer.

**NOTICE:** A NOTICE indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

**CAUTION:** A CAUTION indicates a potential for property damage, personal injury, or death.

## **CAUTION: SAFETY INFORMATION**

Use the following safety guidelines to help ensure your own personal safety and to help protect your system and working environment from potential damage.

- Your product uses a laser.

### **CAUTION: Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.**

- Your product uses a printing process that heats the print media, and heat can cause certain media to release emissions. You must understand the section in your operating instructions that discusses the guidelines for selecting appropriate print media to avoid the possibility of harmful emissions.

### **CAUTION: If your product is *not* marked with this symbol , it *must* be connected to an electrical outlet that is properly grounded.**

- The power cord must be connected to an electrical outlet that is near the product and easily accessible.
- Refer service or repairs, other than those described in the operating instructions, to a professional service person.
- This product is designed to meet safety standards with the use of specific Dell-authorized components. The safety features of some parts may not always be obvious. Dell disclaims liability associated with use of non-Dell-authorized components.

SECTION 1

# Set up for network printing

---

Selecting your printer network setup

Attaching locally to a print server

Attaching directly to the network (print server)

Attaching directly to the network (no print server)

# Selecting your printer network setup

Determine your network setup from the three options below.

- 1 Attach your printer to a print server (or other computer) with a USB cable. Go to page 13 for instructions.

- 2 Attach your printer directly to the network with an Ethernet cable, with the print server managing the print queue. Go to page 21 for instructions.

- 3 Attach your printer directly to the network with an Ethernet cable (no print server). Go to page 24 for instructions.

# Attaching locally to a print server

If you are connecting the printer to a print server with a USB cable and want to share the printer with multiple users on the network, use this method. In this section you will:

- Complete the Microsoft Plug and Play Wizard.
- Set up the queue on the print server.
- Install printer drivers for all clients connected to the print server.

## Complete Microsoft Plug and Play Wizard

When you turned on the printer and print server, the Found New Hardware Wizard screen appeared.

Use the table below to find instructions for the operating system on the print server.

Computer operating system	Go to page...
Windows XP	14
Windows 2000	14
Windows Me	15
Windows NT	16
Windows 98	16
Linux	18
Novell	19

**NOTE:** The Dell Laser Printer W5300 only supports Windows 95 with a network connection to a computer.

### Using Windows XP

- 1 Insert the *Drivers and Utilities* CD into your computer.  
The Wizard automatically searches for an appropriate driver.
- 2 Scroll through the list of drivers until you see D:\drivers\win\_2000\dkaag1da.inf selected in the Location column. Instead of **D:\** you will see the letter of your CD-ROM drive.
- 3 Click **Next**.  
The wizard copies all of the necessary files and installs the printer drivers.
- 4 Click **Finish** when the software is installed.
- 5 Go to “Set up the queue on the print server” on page 19.

### Using Windows 2000

- 1 Insert the *Drivers and Utilities* CD, and then click **Next**.
- 2 Select **Search for a suitable driver**, and then click **Next**.
- 3 Select **Specify a location only**, and then click **Next**.
- 4 Browse to the location of the printer driver on the *Drivers and Utilities* CD.  
**D:\Drivers\Win\_2000\**  
Replace D:\ with the letter of your CD-ROM drive (for example, type **D:\** where *D* is the drive letter of your CD).
- 5 Click **Open**, and then click **OK**.
- 6 Click **Next** to install the driver that is displayed.  
**D:\Drivers\Win\_2000\dkaag1da.inf**
- 7 Click **Finish** when the software is installed.
- 8 Go to “Set up the queue on the print server” on page 19.

## Using Windows Me

 **NOTE:** Depending on the software and printers already installed on your computer, your screens may vary from those in the instructions.

You must install both a USB port driver and a custom print driver.

- 1 Insert the *Drivers and Utilities* CD.  
The Wizard automatically searches for the USB driver on the CD and installs it.
- 2 After the USB port driver is found, click **Finish**.
- 3 Select **Automatic search for the best driver (recommended)**, and then click **Next**.  
The wizard searches for a printer driver.
- 4 Select your printer and driver from the list on the screen, and then click **OK**. Use the following table to identify the driver for your language.

If your computer uses this language	Select the driver from the list
	(Replace the D:\ in the table with the letter of your CD-ROM drive)
English	D:\DRIVERS\WIN_9X\ENGLISH\LMPCL5C.INF
French	D:\DRIVERS\WIN_9X\FRENCH\LMPCL5C.INF
German	D:\DRIVERS\WIN_9X\GERMAN\LMPCL5C.INF
Italian	D:\DRIVERS\WIN_9X\ITALIAN\LMPCL5C.INF
Spanish	D:\DRIVERS\WIN_9X\SPANISH\LMPCL5C.INF

- 5 Click **Next** to install the printer driver.
- 6 Click **Next** to complete installation.
- 7 Use the default printer name (for example, Dell Laser Printer W5300) or type a unique name for your printer, and then click **Next**.
- 8 Click **Yes (recommended)**, and then click **Finish** to print a test page.
- 9 After the test page prints, click **Yes** to close the window.
- 10 Click **Finish** to complete the installation and close the wizard.
- 11 Go to “Set up the queue on the print server” on page 19.

## Using Windows NT

**NOTE:** USB support is not available for Windows NT operating systems.

**NOTE:** You need administrative access to install printer drivers on your computer.

- 1 Insert the *Drivers and Utilities* CD.
- 2 Click **Install the printer for Use on this Computer only (Personal Installation)**.  
When all the files are installed on your computer, the Congratulations screen appears.
- 3 Click **Finish** to complete the installation and close the wizard.
- 4 Go to "Set up the queue on the print server" on page 19.

## Using Windows 98

**NOTE:** Depending on the software and printers already installed on your computer, your screens may vary from those in the instructions.

You must install both a USB port driver and a custom print driver.

When you attached the cable and turned on the printer and computer, the Add New Hardware Wizard screen appeared on your computer screen.

- 1 Insert the *Drivers and Utilities* CD, and then click **Next**.
- 2 Select **Search for the best driver for your device (recommended)**, and then click **Next**.
- 3 Select **CD-ROM drive only**, and then click **Next**.
- 4 After the wizard finds the USB port driver, click **Next**.
- 5 When the USB port driver is installed, click **Finish**.  
The wizard prompts you to search for new drivers.
- 6 Click **Next** to search for a printer driver.
- 7 Select **Search for the best driver for your device (recommended)**, and then click **Next**.
- 8 Select **Specify a location only** and browse to the location of the printer driver on the *Drivers and Utilities* CD.

Use the following table to identify the driver for your language.

If your computer uses this language	Select the driver from the list  (Replace the D:\ in the table with the letter of your CD-ROM drive)
English	D:\DRIVERS\WIN_9X\ENGLISH\LMPCL5C.INF
French	D:\DRIVERS\WIN_9X\FRENCH\LMPCL5C.INF
German	D:\DRIVERS\WIN_9X\GERMAN\LMPCL5C.INF
Italian	D:\DRIVERS\WIN_9X\ITALIAN\LMPCL5C.INF
Spanish	D:\DRIVERS\WIN_9X\SPANISH\LMPCL5C.INF

- 9 Highlight the driver, and then select to install the updated driver (recommended).
- 10 Click **Next**.
- 11 Click **Next** to complete installation.
- 12 Use the default printer name (for example, Dell Laser Printer W5300) or type a unique name for your printer, and then click **Next**.
- 13 Select **Yes** to print a test page, and then click **Finish**. All the necessary files are installed on your computer.
- 14 After the test page prints, click **Yes** to close the message window.
- 15 Click **Finish** to complete the installation.

## Using Windows 95

**NOTE:** The Dell Laser Printer W5300 only supports Windows 95 with a network connection to a computer.

- 1 Insert the *Drivers and Utilities* CD, and then click **Next**.  
If a system-compatible driver is found on your operating system, the Wizard installs it.  
If no compatible system driver is found on your operating system, click **Other Locations**.
- 2 Browse to the location of the printer driver on the *Drivers and Utilities* CD, and then click **OK**.

Use the following table to identify the driver for your language.

If your computer uses this language	Select the driver from the list  (Replace the D:\ in the table with the letter of your CD-ROM drive)
English	D:\DRIVERS\WIN_9X\ENGLISH\LMPCL5C.INF
French	D:\DRIVERS\WIN_9X\FRENCH\LMPCL5C.INF
German	D:\DRIVERS\WIN_9X\GERMAN\LMPCL5C.INF
Italian	D:\DRIVERS\WIN_9X\ITALIAN\LMPCL5C.INF
Spanish	D:\DRIVERS\WIN_9X\SPANISH\LMPCL5C.INF

- 3 Highlight the appropriate driver, and then click **Finish**.  
The Add Printer Wizard screen appears.
- 4 Use the default printer name (for example, Dell Laser Printer W5300), or type a unique name for your printer.
- 5 Select whether or not to use this printer as the default printer.
- 6 Click **Next**.
- 7 You are prompted to insert the *Drivers and Utilities* CD. Click **OK**.  
A dialog box asks for the file “lexdrvln.exe”.
- 8 Browse to the appropriate folder on the *Drivers and Utilities* CD (for example, D:\Drivers\Win\_9x\English).
- 9 Click **OK**.
- 10 Click **OK** again.  
All the necessary files are installed on your computer.
- 11 Go to "Set up the queue on the print server" on page 19.

**Installing drivers in a Linux environment**

Your printer supports Red Hat Linux versions 7.1, 7.2, and 7.3, and SuSE Linux 7.2, 7.3, and 8.0. Refer to the Unix®/packages on the *Drivers and Utilities* CD for instructions on installing your printer in a Linux environment.

## Installing drivers in a Novell environment

Your printer supports Novell® NetWare® versions 3.x, 4.x, 5.x, and 6.x. For information on using your printer in a Novell environment, refer to your Novell documentation.

### Set up the queue on the print server

- 1 Click **Install the printer on the Network (Network Installation)** and then click **Next**.
- 2 Click **On a print server**, and then click **Next**.
- 3 Select both options to install the software and the *User's Guide* on the print server, and then click **Next**.
- 4 The box to share the printer is checked. Create a share name you want to use for the PCL driver and/or the PostScript driver. Make it an obvious name for clients to easily find when they are browsing for a shared printer.

 **NOTE:** You do not need to create share names for both drivers if you are only using one driver.

- 5 Click **Next**.
- 6 Select **TCP/IP**, and then click **Next**.

If your network also uses NetWare, click **NetWare Systems** as well.

- 7 Choose the port that corresponds to the hardware port you used when you connected the printer to the print server (or other computer). For example, USB001 represents the USB port on the print server.
- 8 Click **Finish**.

The Congratulations screen appears.

- 9 Click **Print a Test Page** to verify the driver is installed correctly.
- 10 Click **Finish**.

If you are sitting at the print server and want to install printer drivers on one client computer, you can go to that client computer, insert the *Drivers and Utilities* CD, and follow the steps on the screen, or you can install the drivers remotely (see “Install printer drivers on one or more remote client computers” on page 23).

## Install printer drivers on one client computer

If you are connecting one client computer to the print server, go to that client computer and insert the *Drivers and Utilities CD*.

- 1** Click **Install the printer on the Network (Network installation)**, and then click **Next**.
- 2** Click **On this client computer**.
- 3** Click **Next**.
- 4** Select the software or documentation you want your users to have access to.
- 5** Select the printer protocols you want to install, and then click **Next**.
- 6** Select the Universal Network Connection (UNC) port.
- 7** Type the name of the print server the printer is connected to as well as the name of the printer:  
\\Server Name\PrinterShareName.

To find out the print server name, right-click your mouse and choose **My Computer → Properties → Network Identification**.

- 8** Click **Finish**.

The Congratulations screen appears.

- 9** Click **Print a Test Page** to verify the driver is installed correctly.

- 10** Click **Finish**.

# Attaching directly to the network (print server)

If your print server is in one location (for example, a secure area) and the network printer is in another location (for example, a printer room), use this method to install software on one or multiple printers on the network.

In this section you will:

- Locate the IP address.
- Assign an IP address to the printer.
- Set up the queue on the print server.
- Install printer drivers for all clients connected to the print server.

## Locate the IP address

- 1 Print a network setup page.
  - a Press the menu button on the printer until you see **Utilities Menu**, and then press **Select**.
  - b Press the menu button on the printer until you see **Print Net Setup**, and then press **Select** to print the page.

- 2 Under the Standard Network Card heading on the network setup page, make sure Status is Connected.

If Status is Not Connected:

- Make sure the Ethernet cable is firmly plugged into the back of the printer.
- Plug the Ethernet cable into another wall outlet.

- 3 Find the IP address located under the TCP/IP heading. If the IP address equals 0.0.0.0, wait a few minutes and print the network setup page again.

If the IP address still shows 0.0.0.0, go to "Assign an IP Address" on page 24.

If the IP address is something other than 0.0.0.0, go to "Set up the queue on the print server" on page 22.

## Set up the queue on the print server

- 1 Insert the *Drivers and Utilities* CD, and then click **Next**.
- 2 Click **Install the printer on the Network** (Network installation), and then click **Next**.
- 3 Click **On a print server**, and then click **Next**.
- 4 Select both options to install the software and the *User's Guide* on the print server, and then click **Next**.
- 5 The box to share the printer is checked. Create a share name you want to use for the PCL driver and/or the PostScript driver. Make it an obvious name for clients to easily find when they are browsing for a shared printer.

**NOTICE:** You do not need to create share names for both drivers if you are only using one driver.

- 6 Click **Next**.
- 7 Select **TCP/IP**, and then click **Next**.

If your network also uses NetWare, click **NetWare Systems** as well.

- 8 Set **TCP/IP** as the Port Type.
- 9 Specify a port name. Make it an obvious name for clients to easily find when they are browsing for a shared printer.
- 10 Type the printer IP address, for example, **192.168.0.11**. If you don't know the IP address, see "Locate the IP address" on page 21.
- 11 Click **Finish**.

The Congratulations screen appears.

- 12 Click **Print a Test Page** to verify the driver is installed correctly.
- 13 Click **Finish**.

If you are sitting at the print server and want to install printer drivers on several client computers, follow the steps below. If you want to install drivers on one client computer, go to "Install printer drivers on one client computer" on page 20.

## Install printer drivers on one or more remote client computers

If you are connecting client computers to the print server, run the *Drivers and Utilities* CD installer again:

- 1 Go to **Start → Run → d:\setup.exe** (d represents the CD drive).
- 2 Click **Install the printer on the Network (Network installation)**, and then click **Next**.
- 3 Click **On one or more remote client computers**.
- 4 Click **Next**.
- 5 Type your Administrator user name and password.
- 6 Specify which client computers are allowed to print to the new Dell Laser Printer W5300.

Browse or type each client's computer name or IP address. You can specify as many clients as you wish.

- 7 When you are finished adding clients, click **Next**.
- 8 Select the software or documentation you want your users to have access to.
- 9 Select the printer protocols you want to install, and then click **Next**.
- 10 Select the Universal Network Connection (UNC) port.
- 11 Click the **Browse for Printer** button or type the name of the print server the printer is connected to as well as the name of the printer:  
`\\Server Name\PrinterShareName`.

To find out the print server name, right-click your mouse and choose **My Computer → Properties → Network Identification**.

- 12 Click **Finish**.

The Congratulations screen appears.

- 13 Click **Finish**.

# Attaching directly to the network (no print server)

If you are sharing your network printer in a small workgroup environment and are not using a print server, use this method.

In this section you will:

- Locate the IP address.
- Assign an IP address to the printer.
- Install printer drivers on each client that needs to print to the new printer.

## Locate the IP address

- 1 Print a network setup page.
  - a Press the menu button on the printer until you see the **Utilities Menu**, and then press **Select**.
  - b Press the menu button on the printer until you see **Print Net Setup**, and then press **Select** to print the page.

- 2 Under the Standard Network Card heading on the network setup page, make sure Status is Connected.

If Status is Not Connected:

- Make sure the Ethernet cable is firmly plugged into the back of the printer.
- Plug the Ethernet cable into another wall outlet.

- 3 Find the IP address located under the TCP/IP heading. If the IP address equals 0.0.0.0, wait a few minutes and print the network setup page again.

If the IP address still shows 0.0.0.0, go to "Assign an IP Address" on page 24.

If the IP address is something other than 0.0.0.0, go to "Install printer drivers" on page 26.

## Assign an IP Address

**NOTE:** Assigning a STATIC IP Address is considered an advanced function and is normally performed by your system administrator.

An IP Address is a unique string of numbers consisting of four (4) Octets, each Octet separated using a period. Example: 192.168.1.108. Assigning an IP address already in use can cause serious network performance issues.

See page 56 for details on using the Operator Control Panel.

To setup the printer to use a STATIC IP address:

- 1 Make sure the printer is on and the **Ready** message appears.
- 2 Press the **Menu** button until you see **Network Menu**, and then press **Select**.
- 3 Under **Network Menu**, the item **Standard Network** appears. Press **Select**.
- 4 Under **Standard Network**, press the **Menu** button until you see the item **STD NET SETUP**, and then press **Select**.
- 5 Under **STD NET SETUP**, press the **Menu** button until you see the item **TCP/IP**, and then press **Select**.
- 6 Under **TCP/IP**, press the **Menu** button until you see the item **Enable BOOTP**, and then press **Select**.
- 7 Press the **Menu** button to select **No**, and then press **Select**. The word **SAVED** will briefly display.
- 8 Repeat steps 6 & 7 to select No for the items **ENABLE DHCP** and **ENABLE RARP**.
- 9 Under **TCP/IP**, press the **Menu** button until you see the item **Set IP Address**, and then press **Select**.
- 10 The number in the 1st Octet is flashing. Using the **Menu** button, cycle the 1st Octet of the IP Address to the number desired, and then press **Select**.
- 11 The number in the 2nd Octet is flashing. Using the **Menu** button, cycle the 2nd Octet to the number desired, and then press **Select**.
- 12 The number in the 3rd Octet is flashing. Using the **Menu** button, cycle the 3rd Octet to the number desired, and then press **Select**.
- 13 The number in the 4th Octet is flashing. Using the **Menu** button, cycle the 4th Octet to the number desired, and then press **Select**. The word **SAVED** will briefly display.
- 14 Under **TCP/IP**, press the **Menu** button until you see the item **Set IP Netmask**, and then press **Select**.
- 15 Repeat steps 10 through 13 to set each Octet for Netmask.
- 16 Under **TCP/IP**, press the **Menu** button until you see the item **Set IP Gateway**, and then press **Select**.

- 17** Repeat steps 10 through 13 to set each Octet for Gateway.

A Static IP Address has been assigned to the printer. You can verify the settings by opening a web browser on any computer on the same network and entering the IP address into the Address line of the browser. Example: <http://192.168.1.108>. If the IPS address was setup correctly, the browser should display a Web page provided by the Dell Laser Printer W5300.

## Install printer drivers

- 1** Insert the *Drivers and Utilities* CD.
- 2** Click **Install the printer on the Network (Network Installation)**.
- 3** Click **On one or more remote client computers**.
- 4** Type your Administrator user name and password.
- 5** Specify which client computers are allowed to print to the new Dell Laser Printer W5300.

Browse or type each client's computer name or IP address. You can specify as many clients as you wish.

- 6** When you are finished adding clients, click **Next**.
- 7** Select the software and documentation you want your users to have access to.
- 8** Select **TCP/IP**, and then click **Next**.

If your network also uses NetWare, select **NetWare Systems** too.

- 9** Set **TCP/IP Port** as the Port Type.
- 10** Specify a port name that is meaningful in your environment. The port name establishes a logical link between the printer and each client.
- 11** Type the printer IP address, for example, **192.168.0.11**. If you don't know the IP address, see "Locate the IP address" on page 24.
- 12** Click **Finish**.

The Congratulations screen appears.

- 13** Click **Finish**.

Now all of the clients connected to this printer can select this printer to print their jobs.

## Install printer drivers on one client computer

- 1 From the client computer, insert the *Drivers and Utilities* CD.
- 2 Click **Install the printer on the Network (Network installation)**, and then click **Next**.
- 3 Click **On this client computer**.
- 4 Click **Next**.
- 5 Select the software or documentation you want your users to have access to.
- 6 Select the printer protocols you want to install, and then click **Next**.
- 7 Set **TCP/IP Port** as the Port Type.
- 8 Specify a port name that is meaningful in your environment. The port name establishes a logical link between the printer and each client.
- 9 Type the printer IP address, for example, **192.168.0.11**. If you don't know the IP address, see "Locate the IP address" on page 24.
- 10 Click **Finish**.  
The Congratulations screen appears.
- 11 Click **Print a Test Page** to verify the driver is installed correctly.
- 12 Click **Finish**.

SECTION 2
-----------

# **Install optional memory cards**

---

Accessing the printer system board

Installing printer memory

Replacing the shield

You can increase printer memory capacity and connectivity by purchasing additional printer memory or option cards.

 **NOTE:** Memory options designed for other Dell printers may not work with your printer.

## Accessing the printer system board

 **NOTE:** Use a small Phillips screwdriver to remove the system board access cover and to install some of the cards.

 **CAUTION:** Before performing any of the procedures listed below, read and follow the safety instructions.

- 1 Turn the printer off and unplug the power cord before continuing.
- 2 Press latch 1 to open the lower door. Press latch 2 to open the upper door.

- 3** Press down on the side door latches and open the side door.

- 4** Use a small Phillips screwdriver to loosen, but not remove, the six screws on the shield.

- 5 Use the tabs to slide the shield up until the top three screws fit into the three keyholes on the shield.

1 Keyhole	2 Tabs
-----------	--------

- 6 Hold the shield by the tabs and lift it off.

# Installing printer memory

 **NOTICE:** Electronic components can be damaged by static electricity. Touch something metal on the printer before you touch the memory option.

Your printer comes with 80MB memory. You can buy optional memory cards to increase printer memory up to 336MB.

 **CAUTION:** Before performing any of the following procedures, read and follow the safety instructions.

Optional Memory Cards
7Y762 KIT, PTR, MEM, UM, 16MB
7Y763 KIT, PTR, MEM, UM, 32MB
7Y764 KIT, PTR, MEM, UM, 64MB
7Y765 KIT, PTR, MEM, UM, 128MB

- 1 Unpack the optional printer memory card. Avoid touching the connection points along its edge.

- 2 Open both latches on the connector completely.

---

1 Memory connector 1

---

2 Memory connector 2

---

- 3 Align the notches on the memory card with the ridges on the connector.

---

1 Ridge

---

2 Notch

---

- 4** Push the memory card straight into the connector until it *snaps* into place. Make sure each latch fits over the notch located on either side of the memory card.

---

**1** Latch

---

**2** Notch

---

## Replacing the shield

Follow these steps to reattach the shield and close the doors.

**⚠ CAUTION:** Before performing any of the procedures listed below, read and follow the safety instructions.

- 1 Grasp the shield by the tabs and align the three keyholes on the shield with the top three screws. Holding the shield by the tabs, slide it down onto the screws. Tighten all six screws.

- 2 Close the side door.
- 3 Close the upper door and the lower door.

- 4 Plug in the power cord and turn on the printer.

SECTION 3

# Set up for local printing

---

Installing printer drivers

A local printer is a printer attached to your computer using a USB cable. *If your printer is attached to a network instead of your computer, go on to “Set up for network printing” on page 11.*

## Installing printer drivers

A printer driver is software that lets your computer communicate with your printer. To obtain all the features described in “Utilizing additional software tools” on page 61, use the *Drivers and Utilities* CD to install them. Use the following table to find the instructions you need for your operating system.

Computer operating system	Go to page...
Windows XP	39
Windows 2000	40
Windows Me	41
Windows NT	42
Windows 98	43

**NOTE:** The Dell Laser Printer W5300 only supports Windows 95 with a network connection to a computer.

You need to complete Microsoft’s Plug and Play before installing the custom driver from your printer drivers CD.

## Using Windows XP

**NOTE:** Business versions of Windows XP require that you have administrative access to install printer drivers on your computer.

When you attached the cable and turned on the printer, the Found New Hardware Wizard appeared on your computer screen.

- 1 Insert the *Drivers and Utilities* CD into your computer.

The Wizard automatically searches for an appropriate driver.

- 2 Scroll through the list of drivers until you see D:\drivers\win\_2000\dkaaglda.inf selected in the Location column. Instead of D:\ you will see the letter of your CD-ROM drive.

- 3 Click **Next**.

The wizard copies all of the necessary files and installs the printer drivers.

- 4 Click **Finish** when the software is installed.

- 5 Launch the *Drivers and Utilities* CD: click **Start** → **Run** and browse your CD drive (for example, type **D:\** where *D* is the drive letter of your CD).

- 6 Select **SETUP.EXE**, and then click **OK**.

- 7 When the Dell *Drivers and Utilities* CD screen appears, click **Install the printer for Use on this Computer only (Personal Installation)** to install the additional software for your printer.

When all of the files are installed on your computer, the Congratulations screen appears.

- 8 Click **Print a Test Page** to verify printer setup.

- 9 Click **Finish** when the test page prints successfully.

- 10 Click **Exit** on the *Drivers and Utilities* CD screen.

## Using Windows 2000

When you attached the cable and turned on the printer and computer, the Found New Hardware Wizard screen appeared on your computer screen.

- 1 Insert the *Drivers and Utilities* CD, and then click **Next**.
- 2 Select **Search for a suitable driver**, and then click **Next**.
- 3 Select **Specify a location only**, and then click **Next**.
- 4 Browse to the location of the printer driver on the *Drivers and Utilities* CD.

**D:\Drivers\Win\_2000\**

Replace D:\ with the letter of your CD-ROM drive (for example, type **D:\** where *D* is the drive letter of your CD).

- 5 Click **Open**, and then click **OK**.
- 6 Click **Next** to install the driver that is displayed.

**D:\Drivers\Win\_2000\dkaag1da.inf**

- 7 Click **Finish** when the software is installed.
- 8 When the Dell Drivers and Utilities screen appears, choose **Install the printer for Use on this Computer only (Personal Installation)** to install the additional software for your printer.
- 9 If the *Drivers and Utilities* CD does not automatically launch, click **Start → Run** and browse your CD drive (for example, type **D:\** where *D* is the drive letter of your CD). Select **SETUP.EXE**, and then click **OK**.

When all the files are installed on your computer, the Congratulations screen appears.

- 10 Click **Print a Test Page** to verify printer setup.
- 11 Click **Finish** when the test page prints successfully.
- 12 Click **Exit** on the *Drivers and Utilities* CD screen.

# Using Windows Me

 **NOTE:** Depending on the software and printers already installed on your computer, your screens may vary from those in the instructions.

You must install both a USB port driver and a custom print driver.

When you attached the cable and turned on the printer and computer, the Add New Hardware Wizard screen appeared on your computer screen.

- 1 Insert the *Drivers and Utilities* CD.  
The Wizard automatically searches for the USB driver on the CD and installs it.
- 2 After the USB port driver is found, click **Finish**.
- 3 Select **Automatic search for the best driver (recommended)**, and then click **Next**.  
The wizard searches for a printer driver.
- 4 Select your printer and driver from the list on the screen, and then click **OK**. Use the following table to identify the driver for your language.

If your computer uses this language	Select the driver from the list (Replace the D:\ in the table with the letter of your CD-ROM drive)
English	D:\DRIVERS\WIN_9X\ENGLISH\LMPCL5C.INF
French	D:\DRIVERS\WIN_9X\FRENCH\LMPCL5C.INF
German	D:\DRIVERS\WIN_9X\GERMAN\LMPCL5C.INF
Italian	D:\DRIVERS\WIN_9X\ITALIAN\LMPCL5C.INF
Spanish	D:\DRIVERS\WIN_9X\SPANISH\LMPCL5C.INF

- 5 Click **Next** to install the printer driver.
- 6 Click **Next** to complete installation.
- 7 Use the default printer name (for example, Dell Laser Printer W5300) or type a unique name for your printer, and then click **Next**.
- 8 Click **Yes (recommended)**, and then click **Finish** to print a test page.
- 9 After the test page prints, click **Yes** to close the window.
- 10 Click **Finish** to complete the installation and close the wizard.
- 11 Launch the *Drivers and Utilities* CD: click **Start** → **Run** and browse your CD drive (for example, type **D:\** where *D* is the drive letter of your CD).
- 12 Select **SETUPEXE**, and then click **OK**.
- 13 When the Dell *Drivers and Utilities* screen appears, click **Install the printer for Use on this Computer only (Personal Installation)** to install the additional software for your printer.  
  
When all of the files are installed on your computer, the Congratulations screen appears.
- 14 Click **Exit** on the *Drivers and Utilities* CD screen.

### Using Windows NT

**NOTE:** USB support is not available for Windows NT operating systems.

**NOTE:** You need administrative access to install printer drivers on your computer.

- 1 Insert the *Drivers and Utilities* CD.
- 2 Click **Install the printer for Use on this Computer only (Personal Installation)**.  
When all the files are installed on your computer, the Congratulations screen appears.
- 3 Click **Finish** to complete the installation and close the wizard. You are now ready to print.
- 4 Close the *Drivers and Utilities* CD screen.

## Using Windows 98

 **NOTE:** Depending on the software and printers already installed on your computer, your screens may vary from those in the instructions.

You must install both a USB port driver and a custom print driver.

When you attached the cable and turned on the printer and computer, the Add New Hardware Wizard screen appeared on your computer screen.

- 1 Insert the *Drivers and Utilities* CD, and then click **Next**.
- 2 Select **Search for the best driver for your device (recommended)**, and then click **Next**.
- 3 Select **CD-ROM drive only**, and then click **Next**.
- 4 After the wizard finds the USB port driver, click **Next**.
- 5 When the USB port driver is installed, click **Finish**.

The wizard prompts you to search for new drivers.

- 6 Click **Next** to search for a printer driver.
- 7 Select **Search for the best driver for your device (recommended)**, and then click **Next**.
- 8 Select **Specify a location only** and browse to the location of the printer driver on the *Drivers and Utilities* CD.

Use the following table to identify the driver for your language.

If your computer uses this language	Select the driver from the list  (Replace the D:\ in the table with the letter of your CD-ROM drive)
English	D:\DRIVERS\WIN_9X\ENGLISH\LMPCL5C.INF
French	D:\DRIVERS\WIN_9X\FRENCH\LMPCL5C.INF
German	D:\DRIVERS\WIN_9X\GERMAN\LMPCL5C.INF
Italian	D:\DRIVERS\WIN_9X\ITALIAN\LMPCL5C.INF
Spanish	D:\DRIVERS\WIN_9X\SPANISH\LMPCL5C.INF

- 9 Highlight the driver, and then select to install the updated driver (recommended).
- 10 Click **Next**.
- 11 Click **Next** to complete installation.

- 12** Use the default printer name (for example, Dell Laser Printer W5300) or type a unique name for your printer, and then click **Next**.
- 13** Select **Yes** to print a test page, and then click **Finish**.  
All the necessary files are installed on your computer.
- 14** After the test page prints, click **Yes** to close the message window.
- 15** Click **Finish** to complete the installation.
- 16** Launch the *Drivers and Utilities* CD: click **Start** → **Run** and browse your CD drive (for example, type **D:\** where *D* is the drive letter of your CD).
- 17** Select **SETUP.EXE**, and then click **OK**.
- 18** When the Dell *Drivers and Utilities* CD screen appears, click **Install the printer for Use on this Computer only (Personal Installation)** to install the additional software for your printer.  
If you are prompted to restart your computer, click **Yes**.  
Otherwise, the Congratulations screen appears.
- 19** Click **Exit** on the *Drivers and Utilities* CD screen.

SECTION 4

# Load paper

---

Loading paper and transparencies

Loading envelopes

# Loading paper and transparencies

## In the standard tray

Load the print media you use for the majority of your print jobs in the standard tray.

- 1 Remove the tray.

- 2 Squeeze the width guide tab and the side of the guide as shown. Slide the width guide to the far right side of the tray.

- 3 Squeeze the length guide lever and slide the length guide to the correct position for the size of print media you are loading.

Before loading print media, flex the sheets back and forth to loosen them, and then fan them. Do not fold or crease the print media. Straighten the edges of the stack on a level surface.

- 4 Place the print media into the tray with the recommended print side face down for single-sided printing and face up for double-sided printing.

Do not exceed the maximum stack height indicated by the label in the tray. Overfilling the tray may cause jams.

- 5 Squeeze the width guide tab and the side of the guide together. Slide the width guide to the left until it lightly rests against the edge of the print media stack.

- 6 Insert the tray.

**NOTE:** If you load any print media other than plain letter or A4 paper into the tray, make sure you change the Paper Type and Paper Size settings for that tray from your software application.

## In the multipurpose feeder

The multipurpose feeder can hold several sizes and types of print media, such as transparencies, postcards, note cards, and envelopes. It is useful for single page printing on letterhead or colored paper.

The icons on the multipurpose feeder show you how to load the multipurpose feeder with paper, how to turn an envelope for printing, and how to load letterhead paper for simplex or duplex printing. If you purchased a duplex option, refer to the *User's Guide* (Start → Programs or All Programs → Dell Printers → Dell Laser Printer W5300 → User's Guide).

- 1 Push the lower release latch. The multipurpose feeder door drops open.

- 2 Locate the metal bar in the recessed area on the multipurpose feeder. Pull the bar out far enough to accommodate the print media you will be using.

- 3** Slide the width guide to the far right.

- 4** Load paper or transparencies with the left edge of the stack against the stack height limiter and with the recommended print side face up.

---

**1** Stack height limiter

---

- 5 Gently slide the print media into the multipurpose feeder as far as it will go. Forcing the print media may cause it to buckle.

- 6 Slide the width guide to the left until it lightly touches the stack of print media. Do *not* bend the print media.

- 7 Select the source, size, and type from your software application and select print media size and type from the printer operator panel.
  - Make sure the Paper Size and Paper Type for the multipurpose feeder (MP Feeder Size and MP Feeder Type) are set to the correct value for the print media you are loading.
  - Press **Go** to return to **Ready**.

For tips on recommended papers, solving printing problems, and clearing jams, refer to the *User's Guide* (Start → Programs or All Programs → Dell Printers → Dell Laser Printer W5300 → User's Guide).

# Loading envelopes

You can load envelopes in the multipurpose feeder or the optional envelope feeder. If you purchased the optional envelope feeder, refer to the *User's Guide* for loading instructions.

## In the multipurpose feeder

Load envelopes flap side down with the stamp area and flap on the left. The end of the envelope with the stamp area enters the multipurpose feeder first.

 **NOTICE:** Never use envelopes with stamps, clasps, snaps, windows, coated linings, or self-stick adhesives. These envelopes may severely damage the printer. The stamp is shown in the illustration only for placement.

 **NOTE:** If envelopes jam while printing, try reducing the number of envelopes in the multipurpose feeder.

## Closing the multipurpose feeder

- 1 Remove print media from the multipurpose feeder.

- 2 Push the metal bar straight back to collapse the multipurpose feeder to its short-length position.

- 3 Close the multipurpose feeder door.

SECTION 5
-----------

## **Use your printer**

---

Changing the language on the operator panel

Using the operator panel to change printer settings

Printing a job

Canceling a job from the printer operator panel

Utilizing additional software tools

Replacing the toner cartridge

## Changing the language on the operator panel

To display a different language on the operator panel:

- 1 Press and release **Menu** until you see **Setup Menu**, and then press **Select**.
- 2 Press and release **Menu** until **Display Language** appears, and then press **Select**.
- 3 Scroll through the languages to choose the one you want, and then press **Select**.

## Using the operator panel to change printer settings

The diagram on page 59 shows the menu items in each menu. For detailed explanations of the menus, refer to the *User's Guide* (**Start** → **Programs** or **All Programs** → **Dell Printers** → **Dell Laser Printer W5300** → **User's Guide**).

You can select menu items and corresponding values from the operator panel. When you first enter the printer menus from the operator panel, you see an asterisk (\*) next to a value in the menus. This asterisk indicates the *factory default setting*. These settings are the original printer settings. (Factory defaults may vary for different countries.)

When you select a new setting from the operator panel, the **Saved** message appears. When the Saved message disappears, an asterisk appears next to the setting to identify it as the current *user default setting*. These settings are active until new ones are selected or the factory defaults are restored.

To select a new value as a setting:

- 1 Make sure the printer is on and the **Ready** message appears on the display.
- 2 Press the **Menu** button on the printer. The menu names appear.
- 3 Continue to press and release **Menu** until you see the menu you need.
- 4 Press **Select** to select the menu or menu item on the second line of the display.
  - If the selection is a menu, the menu is opened and the first printer setting in the menu appears.
  - If the selection is a menu item, the default setting for the menu item appears. (The current user default setting has an asterisk [\*] beside it.)

Each menu item has a list of values for the menu item. A value can be:

- A phrase or word to describe a setting
- A numerical value that can be changed
- An On or Off setting

- 5 Press **Menu** to scroll to the value you need.
- 6 Press **Select** to select the value on the second line of the operator panel. An asterisk appears beside the value to indicate that it is now the user default setting. The new setting appears for one second, clears, displays the word **Saved**, and then displays the previous list of menu items.
- 7 Press **Return** to go back to previous menus. Make additional menu selections to set new default settings. Press **Go** if this is the last printer setting you want to change.

User default settings remain in effect until you save new settings or restore the factory defaults. Settings you choose from your software application can also change or override the user default settings you select from the operator panel.

## Restore factory default settings

To restore the original printer factory default settings:

- 1 Make sure the printer is on and the **Ready** message appears.
- 2 Press the **Menu** button on the printer until you see **Utilities Menu**, and then press **Select**.
- 3 Press **Menu** until you see **Factory Defaults**, and then press **Select**.
- 4 Restore appears on the second line of the display.
- 5 Press **Select**.

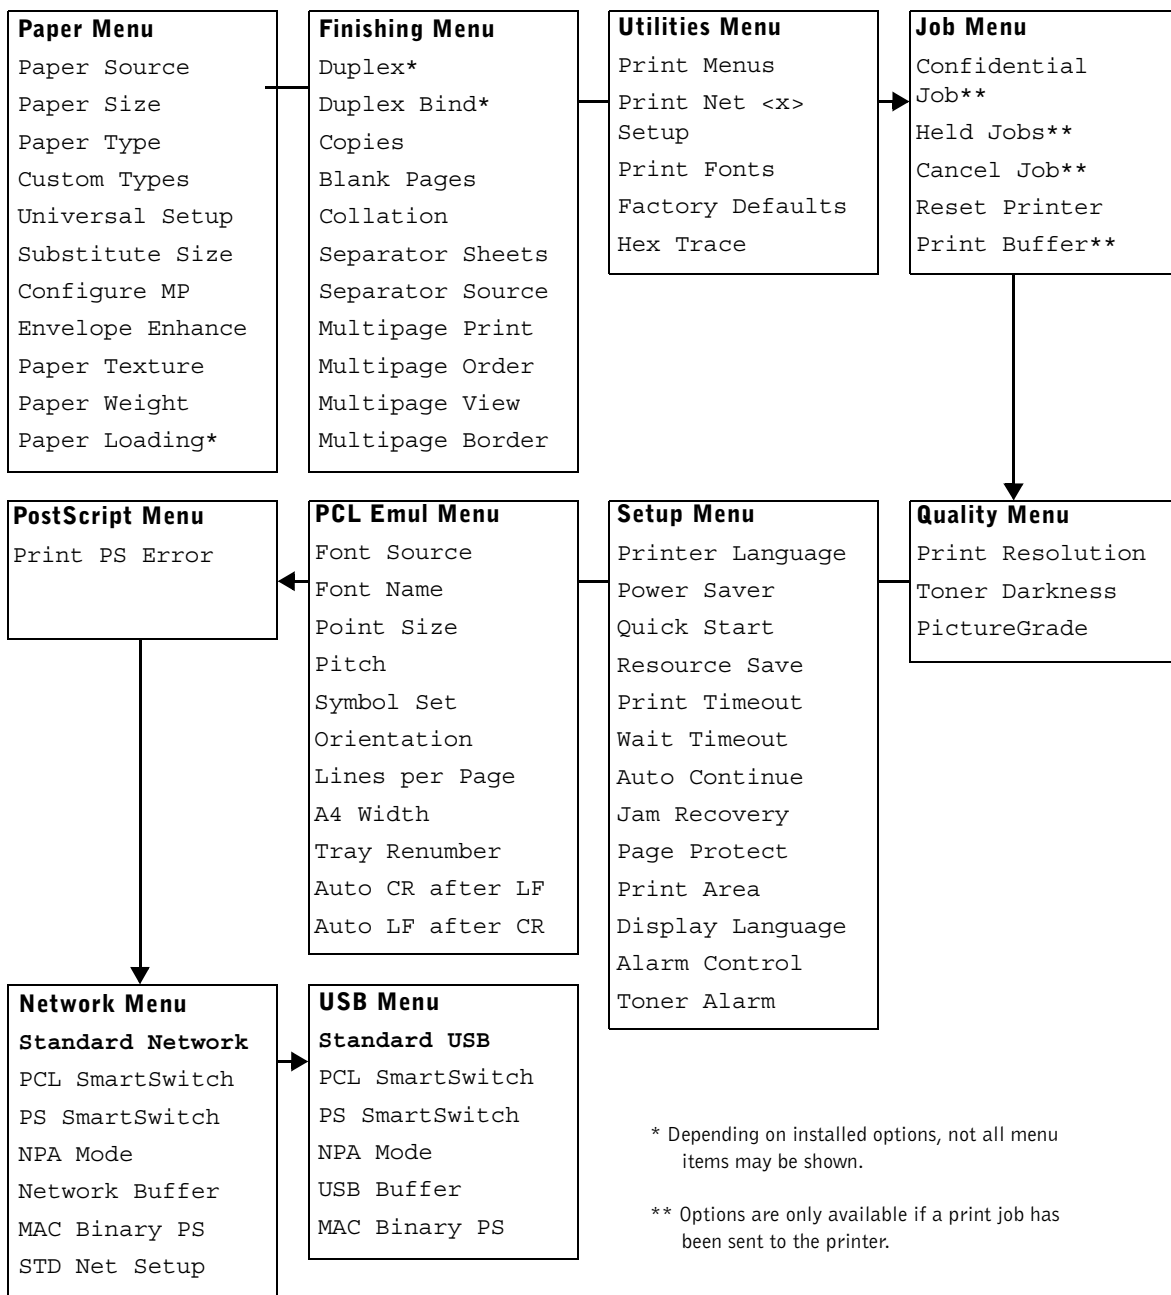

The message **Restoring Factory Defaults** appears, followed by the **Ready** message.

When you select Restore:

- No other button actions are available on the operator panel while Restoring Factory Defaults appears.
- All downloaded resources (fonts, macros, and symbol sets) in printer memory (RAM) are deleted. (Resources residing in flash memory or on the optional hard disk are unaffected.)
- All menu settings are returned to the factory default values, except:
  - The operator panel Display Language setting in the Setup Menu.
  - All settings in the Network Menu and USB Menu.

### **Disable menus**

- **Menus Disabled** may appear when you press the **Menu** button from the **Ready** state. Disabling the menus prevents users from inadvertently changing a printer default that has been set by the person managing the printer. You can still clear messages and select items from the Job Menu when printing a job, but you cannot change other printer settings. You can, however, use your printer driver to override printer defaults and select settings for individual print jobs.

## Printing a job

To print a job from a typical Microsoft® Windows® application:

- 1 Open the file you want to print.
- 2 From the File menu, select **Print**.
- 3 Verify that the correct printer is selected in the dialog box. Modify the printer settings as appropriate (such as the pages you want to print or the number of copies).
- 4 Click **Properties** or **Setup** to change printer settings not available from the first screen, and then click **OK**.
- 5 Click **OK** or **Print** to send the job to the printer.

## Canceling a job from the printer operator panel

To cancel a print job after it has started printing:

- 1 Press the left arrow on the **Menu** button once. **JOB MENU** and **Cancel Job** are displayed.
- 2 Press **Select**. **Canceling Job** is displayed.

# Utilizing additional software tools

Use the *Drivers and Utilities* CD that came with your printer to install a combination of software applications, depending on your operating system.

Operating System	Status Monitor	Status Monitor Center	Dell Toner Reorder Window	Dell Printer Software Uninstall	Driver Profiler
Windows 2000, Windows XP	Y	Y	Y	Y	Y
Windows NT	Y	Y	N	Y	Y
Windows 95, Windows 98, Windows Me	Y	N	N	Y	Y

**NOTE:** If you purchased your printer and computer separately, you must use the Drivers and Utilities CD to install these software applications.

## Status Monitor

The Status Monitor alerts you when an error or warning occurs, for example, when the top cover is open or toner is running low.

The Status Monitor launches when you send a print job to the printer and only appears on the computer screen when an error or warning occurs.

## Status Monitor Center

Use the Status Monitor Center to manage multiple Status Monitors.

- Select a printer from the drop-down list and then select **Run** to open a Status Monitor for a particular printer.
- Select **Update** to change the appearance of the list of printers.
- Select **Help** to read the online help.

## Printing Status window

The Printing Status window displays the status of the printer (Printer Ready, Printer Offline, and Error—Check Printer) and the name of the job when you send a job to print. The Printing Status window also displays the level of toner so you can:

- Monitor the toner level for your printer.
- Click **Order Toner** to order replacement toner cartridges.  
See **Order Toner Reorder window** for more information.

## Dell Toner Reorder Window

The Order Toner Cartridges dialog box can be launched from the Printing Status window, the Programs window, or the desktop icon.

You can order toner by phone or from the Web.

- 1** Click **Start → Programs or All Programs → Dell Printers → Dell Laser Printer W5300 → Dell Printer Supplies—Laser**.  
The Order Toner Cartridges window appears.
- 2** If ordering from the Web:
  - a** Choose your printer model from the drop-down list on the screen.  
Enter your Dell printer Service Tag number in the field provided.  
Your Service Tag number is located inside the front door of your printer.
  - b** Click **Visit Dell's cartridge ordering website**.
- 3** If ordering by phone, call the number that appears under the By Telephone heading.

## Dell Printer Software Uninstall

Use the Uninstall software utility to remove any currently installed printer software or printer objects. You can access the Uninstall software utility two ways:

- 1** For Windows XP only: Click **Start → Control Panel → Printers and Other Hardware → Printers and Faxes**.  
For all others: Click **Start → Settings → Printers**.
  - a** Select the printer object to uninstall, and then right-click the mouse.
  - b** Select **Dell Software Uninstall**.
  - c** Select the components to uninstall, and then click **Next**.

- d Click **Uninstall Now**.
  - e Click **OK** when the uninstall is complete.
- 2 Click **Start → Programs or All Programs → Dell Printers → Dell Laser Printer W5300**.
  - a Select **Dell Printer Software Uninstall**.
  - b Select the components to uninstall, and then click **Next**.
  - c Click **Uninstall Now**.
  - d Click **OK** when the uninstall is complete.

## Driver Profiler

Use the Driver Profiler to create driver profiles that contain custom driver settings. A driver profile can contain a group of saved printer driver settings and other data for things such as:

- Print orientation and N-Up (document settings)
- Installation status of an output tray (printer options)
- User-defined paper sizes (custom papers)
- Simple text and watermarks
- Overlay references
- Font references
- Form associations

## Replacing the toner cartridge

**CAUTION:** Before performing any of the procedures listed below, read and follow the safety instructions.

To order replacement toner cartridges, contact Dell online or by phone (see “Order toner cartridges” on page 2).

In addition to the toner level indicator that is displayed each time you send a job to print, an **88 Toner Low** message appears on the operator panel to alert you it’s time to order a new toner cartridge.

To use the remaining toner, remove the toner cartridge, shake it gently back and forth, and reinsert it. When the print fades or no longer prints satisfactorily, replace the toner cartridge.

**NOTE:** Dell does not recommend that you use toner cartridges from a third-party refiller. Print quality and printer reliability cannot be guaranteed if you do. For best results, use Dell supplies.

### Removing the used toner cartridge

**NOTE:** Remove any print jobs from the output bin before opening the upper front door.

Before performing any of the procedures listed in this section, read and follow the safety information on page 9.

- 1 Press latch 1 to open the lower door. Press latch 2 to open the upper door.

- 2 Grasp the toner cartridge by the handle and pull it up and out.

## Cleaning the printer

Using a clean, lint-free cloth, gently clean the shaded areas by wiping toward the front of the printer.

**NOTICE:** Do not touch the transfer roller.

1 Transfer roller

### Installing the new toner cartridge

Remove the new cartridge from the packaging. Pull the tabs on each side of the plastic strap to remove the packaging foam from the toner cartridge.

 **NOTICE:** Do not touch the photoconductor drum on the underside of the toner cartridge.

- 1 Gently shake the cartridge to distribute the toner.

- 2 Align the arrows on either side of the toner cartridge with the corresponding arrows in the printer.

- 3 Guide the toner cartridge in until it *snaps* into place.

- 4 Close the upper door, and then the lower door.
- 5 Turn the printer on.

Contacting Dell

Dell Software License Agreement

# Contacting Dell

To contact Dell electronically, you can access the following websites:

- [www.dell.com](http://www.dell.com)
- [support.dell.com](http://support.dell.com) (technical support)
- [premiersupport.dell.com](http://premiersupport.dell.com) (technical support for educational, government, healthcare, and medium/large business customers, including Premier, Platinum, and Gold customers)

For specific web addresses for your country, find the appropriate country section in the table below.

**NOTE:** Toll-free numbers are for use within the country for which they are listed.

When you need to contact Dell, use the electronic addresses, telephone numbers, and codes provided in the following table. If you need assistance in determining which codes to use, contact a local or an international operator.

# Dell Software License Agreement

This is a legal agreement between you, the user, and Dell Products, L.P. ("Dell"). This agreement covers all software that is distributed with the Dell product, for which there is no separate license agreement between you and the manufacturer or owner of the software (collectively the "Software"). By opening or breaking the seal on the Software packet(s), installing or downloading the Software, or using the Software that has been preloaded or is embedded in your computer, you agree to be bound by the terms of this agreement. If you do not agree to these terms, promptly return all Software items (disks, written materials, and packaging) and delete any preloaded or embedded Software.

You may use one copy of the Software on only one computer at a time. If you have multiple licenses for the Software, you may use as many copies at any time as you have licenses.

"Use" means loading the Software in temporary memory or permanent storage on the computer. Installation on a network server solely for distribution to other computers is not "use" if (but only if) you have a separate license for each computer to which the Software is distributed. You must ensure that the number of persons using the Software installed on a network server does not exceed the number of licenses that you have. If the number of users of Software installed on a network server will exceed the number of licenses, you must purchase additional licenses until the number of licenses equals the number of users before allowing additional users to use the Software. If you are a commercial customer of Dell or a Dell affiliate, you hereby grant Dell, or an agent selected by Dell, the right to perform an audit of your use of the Software during normal business hours, you agree to cooperate with Dell in such audit, and you agree to provide Dell with all records reasonably related to your use of the Software. The audit will be limited to verification of your compliance with the terms of this agreement.

The Software is protected by United States copyright laws and international treaties. You may make one copy of the Software solely for backup or archival purposes or transfer it to a single hard disk provided you keep the original solely for backup or archival purposes. You may not rent or lease the Software or copy the written materials accompanying the Software, but you may transfer the Software and all accompanying materials on a permanent basis if you retain no copies and the recipient agrees to the terms hereof. Any transfer must include the most recent update and all prior versions. You may not reverse engineer, decompile or disassemble the Software. If the package accompanying your computer contains compact discs, 3.5" and/or 5.25" disks, you may use only the disks appropriate for your computer. You may not use the disks on another computer or network, or loan, rent, lease, or transfer them to another user except as permitted by this agreement.

## **Limited Warranty**

Dell warrants that the Software disks will be free from defects in materials and workmanship under normal use for ninety (90) days from the date you receive them. This warranty is limited to you and is not transferable. Any implied warranties are limited to ninety (90) days from the date you receive the Software. Some jurisdictions do not allow limits on the duration of an implied warranty, so this limitation may not apply to you. The entire liability of Dell and its suppliers, and your exclusive remedy, shall be (a) return of the price paid for the Software or (b) replacement of any disk not meeting this warranty that is sent with a return authorization number to Dell, at your cost and risk. This limited warranty is void if any disk damage has resulted from accident, abuse, misapplication, or service or modification by someone other than Dell. Any replacement disk is warranted for the remaining original warranty period or thirty (30) days, whichever is longer.

Dell does NOT warrant that the functions of the Software will meet your requirements or that operation of the Software will be uninterrupted or error free. You assume responsibility for selecting the Software to achieve your intended results and for the use and results obtained from the Software.

DELL, ON BEHALF OF ITSELF AND ITS SUPPLIERS, DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, FOR THE SOFTWARE AND ALL ACCOMPANYING WRITTEN MATERIALS. This limited warranty gives you specific legal rights; you may have others, which vary from jurisdiction to jurisdiction.

IN NO EVENT SHALL DELL OR ITS SUPPLIERS BE LIABLE FOR ANY DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, OR OTHER PECUNIARY LOSS) ARISING OUT OF USE OR INABILITY TO USE THE SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Because some jurisdictions do not allow an exclusion or limitation of liability for consequential or incidental damages, the above limitation may not apply to you.

## **U.S. Government Restricted Rights**

The software and documentation are "commercial items" as that term is defined at 48 C.F.R. 2.101, consisting of "commercial computer software" and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212. Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4, all U.S. Government end users acquire the software and documentation with only those rights set forth herein. Contractor/manufacturer is Dell Products, L.P., One Dell Way, Round Rock, Texas 78682.

## General

This license is effective until terminated. It will terminate upon the conditions set forth above or if you fail to comply with any of its terms. Upon termination, you agree that the Software and accompanying materials, and all copies thereof, will be destroyed. This agreement is governed by the laws of the State of Texas. Each provision of this agreement is severable. If a provision is found to be unenforceable, this finding does not affect the enforceability of the remaining provisions, terms, or conditions of this agreement. This agreement is binding on successors and assigns. Dell agrees and you agree to waive, to the maximum extent permitted by law, any right to a jury trial with respect to the Software or this agreement. Because this waiver may not be effective in some jurisdictions, this waiver may not apply to you. You acknowledge that you have read this agreement, that you understand it, that you agree to be bound by its terms, and that this is the complete and exclusive statement of the agreement between you and Dell regarding the Software.
