\* Figure will vary considerably with floor plan, house layout and heat loss of the house. Due to on-going product development, product appearances and specifications are subject to change without notice. These units must be installed by a qualified dealer. Enviro pellet stoves have been approved for mobile home installations once certain criteria are met.

Approved for sale in Canada, the United States and in Europe  
UL-1482/ULC S627; CSAB366.2M/ULC S628; UL907/UL-127 ULC S610.

On the outside, you'll love how the traditional design of the Meridian is beautifully complemented with an elegantly arched bay door. You'll appreciate how the large bay window provides a wide view of the fire and be pleased at how the generously proportioned pellet hopper and ash pan maximize the enjoyment of your stove. You'll also be thrilled that the easily opened, full width door utilizes an air wash system to help keep the window clear.

Flame path of optional composite log set

Still more awaits you on the inside. The specially designed cast iron brick liner is both durable and attractive — hidden from view is our unique heavy-duty heat exchanger and quiet 160 CFM convection fan, which combine to efficiently deliver a whopping 45,000 BTU's of heating comfort into your home! Fully automatic, the Meridian has full thermostat control capability — whether in hi/lo or on/off mode — and can also be used with a remote controller.

Not content to just stand out from our competitors with exceptional standard features, we've also designed the Meridian with options that will allow you to match your stove with almost any room setting — choose from different door covers and body trims in antique copper, pewter, gold and painted. As well, the optional composite log set adds the final touch to a truly realistic looking fire.

Sit back and relax as the Meridian pellet stove delivers what you really want — quiet, inexpensive and efficient heating comfort with low maintenance and the durability to last for generations!
