# When using in a car

Do not leave the unit on a surface that may become hot such as a dashboard. The unit is not heat-resistant so may malfunction.

The driver must not operate this unit while the vehicle is moving.  
Do not operate this unit where it can be viewed by the driver.  
Driver operation or viewing of this unit while the vehicle is moving will cause distraction which may result in serious accident and personal injury or property damage.

## DVD-LS85

Car DC Adaptor is **not included**. (Included rechargeable battery pack can be used.)

**DVD-LS90** **DVD-LS87** Use included Car DC Adaptor. (→ see below)

### ■ Connections

Before connection, consult your car owner's manual or your dealer.

- Connect to the cigarette lighter socket of a vehicle that has a 12 V battery. It is not compatible with a vehicle that has a 24 V battery.
- This is a special negative grounded Car DC Adaptor. Using this Car DC Adaptor with a plus grounded car can cause malfunction and lead to fire.

Left side of this unit (Place the unit on a stable surface.)

### ■ Replacing the fuse

Replace only with the specified 125 V/250 V, 2.5 A fuse. Use of any other type can cause fire.

#### 2 Replace the fuse. (125 V/250 V, 2.5 A type)

### ■ Cautions

#### ● To avoid draining your car battery

- Disconnect the Car DC Adaptor from the cigarette lighter after use. The Car DC Adaptor continues to consume some power even if it is not being used, and if a battery pack is attached to this unit, it will start recharging which uses more power.
- Do not use the Car DC Adaptor for long periods when the engine is not running.
- The Car DC Adaptor cannot be used to recharge the battery pack. Use the AC adaptor included with this unit.
- When starting an engine, pull Car DC Adaptor out of the cigarette lighter socket. Mishandling of the Car DC Adaptor can cause malfunction.
- No responsibility will be taken for damage that occurs due to faulty installation.
- Leave some slack in the cord.

## Tips for making WMA/MP3 and JPEG discs (For CD-R/CD-RW)

- Discs must conform to ISO9660 level 1 or 2 (except for extended formats).
- This unit is compatible with multi-session but if there are a lot of sessions it takes more time for play to start. Keep the number of sessions to a minimum to avoid this.
- If groups were created away from the root like "002 group" in the illustration below, the eighth one and onwards are displayed on the same vertical line in the menu screen.
- There may be differences in the display order on the menu screen and computer screen.
- This unit cannot play files recorded using packet write.

### Naming folders and files

(Files are treated as content and folders are treated as groups on this unit.)

At the time of recording, prefix folder and file names. This should be with numbers that have an equal number of digits, and should be done in the order you want to play them (this may not work at times).

Files must have the extension:

"WMA" or ".wma"

"MP3" or ".mp3"

".JPG", ".jpg", ".JPEG" or ".jpeg"

#### WMA

- You cannot play WMA files that are copy protected.
- This unit is not compatible with Multiple Bit Rate (MBR: a file that contains the same content encoded at several different bit rates).

#### MP3

- This unit is not compatible with ID3 tags.
- Compatible sampling rate: 8, 11.02, 12, 16, 22.05, 24, 32, 44.1, and 48 kHz

#### JPEG

- JPEG files taken on a digital camera that conform to the DCF Standard Version 1.0 are displayed.
  - Pictures taken using digital camera functions not supported by DCF like automatic picture rotation may not be displayed.
  - Files that have been altered, edited or saved with computer picture editing software may not be displayed.
- This unit cannot display moving pictures, MOTION JPEG and other such formats, still pictures other than JPEG (e.g. TIFF) or play pictures with attached audio.

e.g. MP3
