

WM-Q™**mini wall speaker**

The WM-Q™ is an excellent sounding wall-mounted speaker, perfect in rooms where distributed ceiling speakers are not practical. In classrooms with solid or low ceilings (less than 9 feet), the WM-Q is an ideal alternative. When configured properly, four speakers produce crystal-clear audio throughout the entire classroom with no crossover.

**overview**

Four WM-Q speakers will cover classrooms of up to 1600 square feet with 8 to 12 foot ceilings.

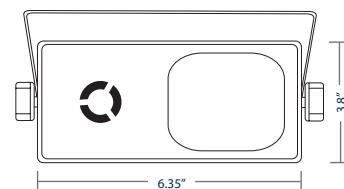

- Excellent sound even in classrooms with low ceilings.
- Pivoting wall bracket allows the speaker to be directed to an ideal point in the room.

room coverage
