Invacare® Xterra™ Series GT™ Power Wheelchair

Yes, you can.™

The Invacare® Xterra™ GT™ power wheelchair has it all—unmatched styling, speed, maneuverability and power. It's the only choice for consumers who want to be noticed. And the GT's incredible power will help them lead, not follow. With the Xterra GT, your clients can finally get high-speed, center-wheel-drive performance in a package that screams excitement.

*Shown with the new vinyl van seat.*

#### FEATURES

- Hot new styling with a very durable 2" steel tube frame is designed for users who want to be active
- 16" aluminum machined wheels feature automotive styling and construction
- New high-power, 4-Pole motors provide 850 watts of power and a speed of 7.5 mph—generating enough power to make it possible for the GT to get over rougher terrain
- Transitions, thresholds and obstacles are no problem with the new SureStep™ suspension, which lifts the front wheels to elegantly handle the situation
- Center-wheel drive provides very intuitive driving, as positioning most of the weight over the drive wheels gives exceptional traction and permits a very tight turning radius of less than 20", for accessibility in tight spaces
- MKIV™ electronics bring the whole package together with all the control, feel and options you've come to expect from Invacare

## SureStep™ Suspension

The Xterra™ GT™ was designed with a new approach to climbing, handling uneven terrain and making transitions.

*The frame is allowed to flex and pivot around a spring suspension.*

*The high torque of the new motors lifts the front wheels to facilitate the change in pitch.*

*Weight is transferred to the drive wheels, providing both traction and motor strength to elegantly pull the user and chair over the obstacle.*

**SURE STEP**

*The six wheels of the GT remain in contact with the ground for maximum stability, safety and traction when negotiating uneven terrain.*

## Electronics

MKIV-R11 80-amp (standard)

MKIV-A (optional)

- The MKIV™ controller is the foundation of the most advanced power chair driving system in the industry
- The MKIV provides a wealth of programming options to help virtually any user drive safely and confidently
- The MKIV-R11 80-amp controller is the newest member of the MKIV family. This controller has one drive and accommodates a joystick, while providing the current needed to handle the GT's performance
- The MKIV-A interfaces with an incredible range of driver inputs, including multiple-size joysticks, Touchpad technology, Peachtree proportional head control, Sip N' Puff controls and all ASL non-proportional driver controls
- Windows®-based MKIV one2one software provides invisible and intuitive programming by converting even the most advanced clinical and functional questions into driving programs

## Battery Access

*By releasing the latch under the seat, the GT seat frame pivots rearward, allowing access to the 22NF batteries.*

*The individual batteries can easily be lifted out of the base, using straps.*

Yes, you can.™

## Accessories and Hardware

The GT is available with many options to customize the fit and function to your client's needs. These are just a few of those options in seating and rigging.

New low-profile cage rigging remains permanently attached to the frame at an 85° angle. This option slides into the tele-tubes of the ASBA seat and is retrofittable.

Available with a range of center pivot-style riggings.

The GT is a great solution for your pediatric needs, as it is available in junior seat frame sizes as small as 14" x 14".

## Specifications

Maximum speed	7.5 mph	
Overall turning radius*	< 20"	
Dimensions		
Overall base width	25"	
Overall length**	36.5"	
With cage rigging	40"	
Seat-to-floor height	at 0° tilt	at 3° tilt
Widths from 14" to 18"	17.1"	18"
Widths from 19" to 20"	17.75"	18.75"
Seat adjustability		
Width (1" increments)	14" to 20"	
Depth (1" increments)	14" to 20"	
Back angle (5° increments)	80° to 115°	
Drive wheels		
Pneumatic (standard)	16" x 3"	
Foam-filled (optional)	16" x 3"	
Front casters		
Semi-pneumatic	8" x 2"	
Rear casters		
Semi-pneumatic	6" x 2"	
Seat selection		
ASBA seat		
Van seat		
Semi or full recline		
Grey cloth		
Grey vinyl
