# The TruFlat™ Tube Difference

**TruFlat™ tube design reduces peripheral screen reflections by over 60%.**

TruFlat models reduce the reflected image field by greater than 60% compared with standard tubes, while allowing a totally visible screen, even when viewed off-axis. This means placing the television in your home just became easier. Viewers sitting off-angle now see less reflection, less glare, and all viewers have a wider viewing angle allowing the entire screen to be seen.

Using specialized phosphors and improved circuitry, detail clarity with any TruFlat model, particularly with DVD images, adds on-screen realism. Combined with RCA's new Cross-Bridge Unified Chassis designs, modern cabinets, and the latest sound enhancement systems, TruFlat technology will amaze.

**The TruFlat™ design offers a wider effective viewing area from any angle.**

## TruFlat™ Engineering Performance

RCA engineers developed an extensive quality control and evaluation program for the new TruFlat models. Using RCA worldwide research and development personnel, a new comprehensive test program was developed for each TruFlat model. As further support for the quality, a limited one year parts and labor warranty\* is provided with all TruFlat models, 20" and larger.

\*Please see RCA dealer or visit [www.rca.com](http://www.rca.com) for complete details.

## Sound

- **181-Channel Tuning Capability<sup>1</sup>**

Digitally controlled frequency synthesis tuning system "locks on" to cable and standard signals with unsurpassed accuracy.

- **HQ Video Processing**

Special recording and playback circuitry enhances video characteristics, producing high-quality pictures.

- **MTS Broadcast Stereo Reception**

Receive and record stereo sound from MTS (Multichannel Television Sound) stereo TV broadcasts, where available.

- **Second Audio Program (SAP)**

Decodes the second audio program available on some broadcasts.

- **Separate Bass/Treble Control**

Customize audio sound output to specific room environment or personal preference via on-screen menu adjustment.

## Remote

- **Glo Remote CRK76TY1**

## Convenience

- **Trilingual On-Screen Display**  
Allows the on-screen menu system to be displayed in one of three languages (English, French, or Spanish).
- **On-Screen Menu System**  
On-screen displays make it easy to adjust most picture, sound, and convenience features from either the remote control or the TV front panel buttons.
- **Caption Vision  Closed Caption Capability<sup>2</sup>**  
Assists the hearing impaired, helps children learn to read, and aids in the teaching of English as a second language. Built-in Closed Caption Decoder displays the audio portion of a program as text on the TV screen (when program is aired with the encoded signal).
- **Auto Channel Search**  
The system automatically scans for and locks active channels into channel memory.
- **Programmable Timer System**  
Convenient scheduling system can be used in a variety of ways:
  - **Sleep Timer**  
Automatically turns off the TV after a preset time period—for those times when you drift off to sleep in front of the television.
  - **Alarm Timer**  
Wake up to your favorite morning show or turn on your television automatically to catch your favorite program.
- **Auto Clock Set<sup>3</sup>**  
The Auto Clock Set<sup>3</sup> circuitry reads the XDS broadcast signal containing time of day and date information, automatically setting the clock during initial setup as well as after most power interruptions.

## VCR Capabilities

- **6-Head System**  
Four video recording and pick-up heads on a single head drum provide improved special effect performance. With the new SFX design, you can visually pause on the tape at any speed, and slow-motion effects are clearer and more jitter-free. Two additional AFM audio heads allow Stereo Hi-Fi recording and playback. The combination of six heads allows full theatre video and audio, and allows full stereo performance copying from all high-level consumer and professional camcorders. Using a T-160 tape, up to eight hours of stereophonic audio can be recorded for extended playback, or six hours with any standard T-120 VHS tape.
- **8-Event/1-Month Programmable Timer**  
The built-in timer memory can be preset up to one month in advance to record as many as eight different programs automatically.
- **Simplified On-Screen Programming**  
With the RCA remote control and on-screen displays, all timer programming can be done from the convenience of your chair. On-screen instructions guide the viewer through each programming sequence.
- **Auto Repeat**  
Automatically rewinds at the end of the tape and then begins replay.
- **Real-Time Counter**  
Displays exactly how long the tape has played or recorded to make locating segments easier.
- **Digital Auto Tracking Plus**  
Combines the best performance of an automatic digital tracking scan system, which automatically “locks” on the best signal, with the added convenience of manual override. Manual up/down tracking is sometimes preferred when rental tapes have been damaged or recorded on older recorders with tracking out of adjustment.
- **Auto Power On, Auto Play, Auto Rewind**  
Simply inserting a cassette in the VCR turns it on (Auto Power On). When a prerecorded cassette is inserted in the VCR, it automatically starts to play (Auto Play). When the end of the tape is reached, Auto Rewind automatically rewinds the tape.
- **Quality Slow Motion**
- **Zero Search**  
Allows quick return to a timer counter reading of 0:00:00. Convenient for watching a segment of tape several times.
- **One Touch Recording (OTR)**  
Simplifies the recording of a TV show in progress. One button begins recording and sets the program length, so that the VCR records and switches off automatically.

## Connections

- Front and Rear Audio/Video Inputs**  
 Allows quick, easy access for direct audio and video connections for additional VCR, video game or video source.

- Fixed Audio Outputs**  
 Connect TV to an external AV receiver or power amplifier to create a true home theater setup.
