digital audio for your whole home...without the wires

Introducing Eos, the first digital wireless whole home speaker system for iPod. The Eos base speaker system broadcasts interference-free CD quality audio throughout your home, inside and out – up to 150 feet. The Eos system lets you add up to four digital wireless speaker satellites...so you can locate speaker satellites in any room of your home. Extraordinary acoustic engineering gives the Eos system an incomparable deep rich sound quality.

digital wireless whole home audio system

Base Station Speaker/Transmitter
(Model EOS-100T) iPod sold separately

The Eos base station combines a Wi-Fi friendly 2.4GHz digital wireless transmitter with incredible sounding 2.1 stereo surround sound speaker system with ported sub woofer. The base charges your iPod as it plays and broadcasts CD quality music to up to 4 satellite speakers throughout your home, inside or out -- and the Eos wireless remote allows you to control your the base and your iPod from up to 30 feet away. With the auxiliary input jack on the Eos base station you can play and broadcast audio from any audio source...not just your iPod.

- Eos system includes a base station speaker/transmitter and a wireless satellite speaker (model EOS-100-1). Additional satellite speakers available separately (Model EOS-100R)
- Wi-Fi friendly 2.4 GHz digital wireless audio with error correction assures interference-free reception
- Broadcasts CD quality sound over 150 feet throughout your home, inside and out
- Supports up to 4 individual wireless stereo satellite speakers
- Clean, powerful 2.1 stereo surround sound from advanced neodymium tweeters and a ported sub woofer
- SRS WOW! surround sound improves dynamic audio performance, expands the size of the audio image and improves low frequency sound
- True whole home audio brings music into every room of your home
- Auxiliary audio input allows you to broadcast from any audio source (home entertainment systems, cable and internet radio, satellite radio, computers, CD & MP3 players...)
- Integrated Universal Dock for iPod, supports 3G, 4G, Mini, Nano and the new 5G Video iPods

Wireless Satellite Speaker
(Model EOS-100R)

Revolutionary designed stereo satellite speakers feature a removable, integrated power supply that allows the speaker to mount directly on the wall power outlet or sit independently on a counter top or bookshelf. Put audio anywhere in your home without the hassle of wires -- each system supports up to 4 wireless stereo speakers. Each incredible sounding satellite speaker is fitted with an incredible sounding 2.1 stereo surround sound speaker system with ported sub woofer.
