

DataVac Electric Duster

Safely blows dust from hard to reach places!

The compact, handheld Data-Vac ELECTRIC DUSTER is far less expensive and safer for the environment than canned air. It quickly and easily blows dust, lint, and debris off keyboards, computers, printers, disk drives, fax machines, photographic and other high-tech equipment. That helps prevent costly downtime and computer malfunctions. The Data-Vac ELECTRIC DUSTER is inexpensive and easy to operate. It costs less than 5 cans of air refills. That means it pays for itself in less than two hours of continuous use. So, never buy canned air again. Just plug in the ELECTRIC DUSTER and go to work. ...AND IT'S SAFE FOR THE ENVIRONMENT, TOO! Canned air canisters are dangerous and can contain fluorocarbons (CFCS), halons, carbon tetrachloride, and methyl chloroform that are destructive to our environment. Data-Vac ELECTRIC DUSTER eliminates the need for canned air that emits harmful gasses into the atmosphere. Plus, there are no wasteful empty cans to throw away.

SPECS	Electric Duster ED-3
Construction	Sturdy all steel
Motor	.5 HP Motor
AMPS	1.73
Cost	less than 5 cans of air refills
CFM/FPM	25/10,000
Weight	2 lbs.
Volts	220/110 available
Cord	12' UL approved
Attachments	Air Pin Pointer, Powerizer Air Maximizer™
Warranty	1 year limited
