Warnings

WARNING: The appliance and its accessible parts become hot during use. Care should be taken to avoid touching heating elements. Children less than 8 years of age shall be kept away unless continuously supervised. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.

Never use steam cleaners or pressure cleaners on the appliance.

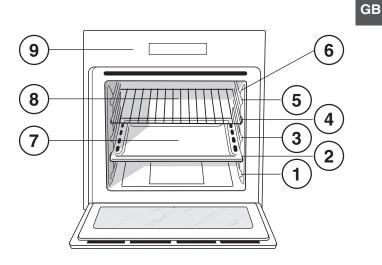

WARNING: Ensure that the appliance is switched off before replacing the lamp to avoid the possibility of electric shock.

Installation

Please keep this instruction booklet in a safe place for future reference. If the appliance is sold, given away or moved, please make sure the booklet is also passed on to the new owners so that they may benefit from the advice contained within it.

Please read this instruction manual carefully: it contains important information concerning the safe operation, installation and maintenance of the appliance.

Positioning

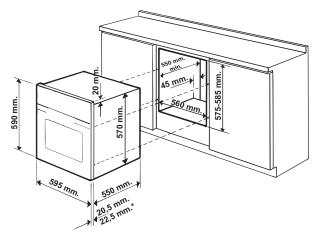

! Do not let children play with the packaging material; it should be disposed of in accordance with local separated waste collection standards (see Precautions and tips).

The appliance must be installed by a qualified professional in accordance with the instructions provided. Incorrect installation may damage property or cause harm to people or animals.

Built-in appliances

Use an appropriate cabinet to ensure that the appliance operates properly:

- · The panels adjacent to the oven must be made of heatresistant material.
- Cabinets with a veneer exterior must be assembled with glues which can withstand temperatures of up to 100°C.
- To install the oven under the counter (see diagram) or in a kitchen unit, the cabinet must have the following dimensions:

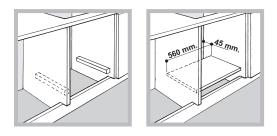

* Stainless steel models only

I The appliance must not come into contact with electrical parts once it has been installed.

The indications for consumption given on the data plate have been calculated for this type of installation.

Ventilation

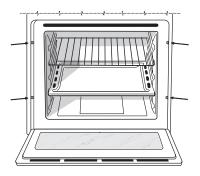

To ensure adequate ventilation, the back panel of the cabinet must be removed. It is advisable to install the oven so that it rests on two strips of wood, or on a completely flat surface with an opening of at least 45 x 560 mm (see diagrams).

Centring and fixing

Secure the appliance to the cabinet:

- Open the oven door.
- Remove the 4 rubber plugs covering the fixing holes on the perimeter frame.
- Fix the oven to the cabinet using the 4 wood screws.
- · Replace the rubber plugs.

All parts which ensure the safe operation of the appliance must not be removable without the aid of a tool.

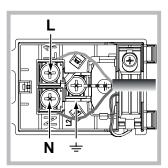

Electrical Connection

The electrical connection to the mains must be made on the appliance. The power voltage and frequency are as indicated on the rating plate.

! THIS APPLIANCE MUST BE EARTHED.

Fitting the power supply cable

1. Open the terminal board by inserting a screwdriver into the side tabs of the cover. Use the screwdriver as a lever by pushing it down to open the cover (see diagram)

2. Install the power supply cable by loosening the cable clamp screw and the three wire contact screws $L-N-\frac{L}{2}$.

Connect the wires to the corresponding terminals: the Blue wire to the terminal marked (N), the Brown wire to the terminal marked (L) and the Yellow/Green wire to the terminal marked - (see diagram).

3. Secure the cable by fastening the clamp screw.

4. Close the cover of the terminal board.

Electrical Connection:

Voltage Frequency: see data plate Fuse Section: 16A Supply cable: 3x1.5mm²

You can connect your oven to the system means of a terminal board. Refer to above information for the minimal cable sections and the calibration of the protective elements according to the connection.

If the appliance is installed with a junction box, an omnipolar circuit breaker - with a minimum contact opening of 3mm - should be installed between the appliance and the mains.

Power cable supply connection to the electrical mains:

We recommend you use a power supply cable which is long enough to allow you to take the oven out of its recess in the event of maintenance operations (only use HAR - H 05 - RRF quality cables fitted with a plug conforming to the regulations in force.

The plug must be accessible at all times.

Unplug the appliance before all operations, even when replacing the oven lamp.

Using the appliance without correct earthing is highly dangerous.

! After connecting the appliance to the flexible cable, tighten all the screws on the terminal board.

** Only for models with wire rails.

Start-up and use

! When inserting the shelf make sure the backstop is at the rear of the cavity (see image).

I The first time you use your appliance, heat the empty oven with its door closed at its maximum temperature for at least half an hour. Make sure that the room is well ventilated before switching the oven off and opening the oven door. The appliance may emit a slightly unpleasant odour caused by protective substances used during the manufacturing process burning away.

Starting the oven

- 1. Select the desired cooking mode by turning the SELECTOR knob.
- 2. Select the desired temperature with the THERMOSTAT knob. See the Cooking advice table for cooking modes and the suggested cooking temperatures (*see Cooking Modes*).
- 3. When lit, the THERMOSTAT indicator light indicates that the oven is heating up to the temperature set.
- 4. You may do the following during cooking:

change the cooking mode by turning the SELECTOR knob.
change the temperature by turning the THERMOSTAT knob.

- stop cooking by turning the SELECTOR knob to the "0" position.

! Never put objects directly on the oven bottom to avoid damaging the enamel coating.

! Always place cookware on the rack(s) provided.

Cooling ventilation

In order to cool down the external temperature of the oven, some models are fitted with a cooling fan that blows out air between the control panel and the oven door.

! Once the cooking has been completed, the cooling fan remains on until the oven has cooled down sufficiently.

Oven light

It goes on when selecting - , with the SELECTOR knob. It stays on when a cooking mode is selected.

How to use the timer*

- 1. To set the buzzer, turn the TIMER knob clockwise almost one complete revolution.
- Turn the knob anticlockwise to set the desired time: align the minutes shown on the TIMER knob with the indicator on the control panel.
- 3. The timer operates in minutes: when the selected time has elapsed, a buzzer will sound.

! The timer does not turn the oven on or off.

Modes

I In order to guarantee wonderfully soft and crunchy foodstuffs, the oven releases – in the form of water vapour - the humidity naturally withheld in the food itself. In this way, optimal cooking results can be achieved for all types of food.

! A temperature value can be set for all cooking modes between 60°C and Max, except for

- GRILL (recommended: set only to MAX power level);
- GRATIN (recommended: do not exceed 200°C).

Both the top and bottom heating elements will come on. With this traditional cooking mode, it is best to use one cooking rack only; if more than one rack is used, the heat will be distributed unevenly.

MULTI-COOKING mode

All the heating elements (top and bottom), as well as the fan, will come on. Since the heat remains constant throughout the oven, the air cooks and browns food uniformly. A maximum of two racks may be used at the same time.

TOP OVEN mode

The top heating element comes on. This mode can be used to brown food at the end of cooking.

~~~~

**GRILL** mode

The top heating element comes on. The extremely high and direct temperature of the grill makes it possible to brown the surface of meats and roasts while locking in the juices to keep them tender. The grill is also highly recommended for dishes that require a high temperature on the surface: such as beef steaks, veal, rib steak, filets, hamburgers etc... Some grilling examples are included in the "Practical Cooking Advice" paragraph. Always cook in this mode with the oven door closed.

\* Only available in certain models.

PLEASE PHONE US TO REGISTER YOUR APPLIANCE AND ACTIVATE YOUR PARTS GUARANTEE ON 08448 24 24 24

GB

The top heating element, as well as the fan, will come on. This combination of features increases the effectiveness of the unidirectional thermal radiation of the heating elements through forced circulation of the air throughout the oven. This helps prevent food from burning on the surface, allowing the heat to penetrate right into the food. Always cook in this mode with the oven door closed.

#### Practical cooking advice

! Do not place racks in position 1 and 5 during fan-assisted cooking. Excessive direct heat can burn temperature sensitive foods.

! In the GRILL and GRATIN cooking modes, place the dripping pan in position 1 to collect cooking residues (fat and/or grease).

#### MULTI-COOKING

- Use position 2 and 4, placing the food that requires more heat on 2.
- Place the dripping pan on the bottom and the rack on top.

#### GRILL

- Insert the rack in position 3 or 4. Place the food in the centre of the rack.
- We recommend that you set the maximum power level. The top heating element is regulated by a thermostat and may not always be on.

#### PIZZA

- For best results when cooking pizza, use the MULTI-COOKING mode.
- Use a light aluminium pizza pan. Place it on the rack provided.
   For a crispy crust, do not use the dripping pan (prevents crust from forming by extending cooking time).
- If the pizza has a lot of toppings, we recommend adding the mozzarella cheese on top of the pizza halfway through the cooking process.

#### Cooking advice table

The cooking times listed above are intended as guidelines only and may be modified according to personal tastes.

## Hotpoint

## **Precautions and tips**

**!** This appliance has been designed and manufactured in compliance with international safety standards. The following warnings are provided for safety reasons and must be read carefully.

#### **General safety**

- The appliance was designed for domestic use inside the home and is not intended for commercial or industrial use.
- The appliance must not be installed outdoors, even in covered areas. It is extremely dangerous to leave the appliance exposed to rain and storms.
- When moving or positioning the appliance, always use the handles provided on the sides of the oven.
- Do not touch the appliance while barefoot or with wet or damp hands and feet.
- The appliance must be used by adults only for the preparation of food, in accordance with the instructions provided in this booklet. Any other use of the appliance (e.g. for heating the room) constitutes improper use and is dangerous. The manufacturer may not be held responsible for any damage caused as a result of improper, incorrect and unreasonable use of the appliance.
- Do not touch the heating elements or certain parts of the oven door when the appliance is in use; these parts become extremely hot. Keep children well away from the appliance.
- Make sure that the power supply cables of other electrical appliances do not come into contact with the hot parts of the oven.
- The ventilation and heat dispersal openings must never be obstructed.
- Always grip the oven door handle in the centre: the ends may be hot.
- Always use oven gloves when placing cookware in the oven or when removing it.
- Do not use aluminium foil to line the bottom of the oven.
- Do not place flammable materials in the oven: if the appliance is switched on accidentally, the materials could catch fire.
- When unplugging the appliance, always pull the plug from the mains socket; do not pull on the cable.
- Do not perform any cleaning or maintenance work without having disconnected the appliance from the electricity mains.
- If the event of malfunctions, under no circumstances should you attempt to perform the repairs yourself. Contact an authorised Service Centre (see Assistance).
- Do not rest objects on the open oven door.
- · Do not let children play with the appliance.
- The appliance should not be operated by people (including children) with reduced physical, sensory or mental capacities, by inexperienced individuals or by anyone who is not familiar with the product. These individuals should, at the very least, be supervised by someone who assumes responsibility for their safety or receive preliminary instructions relating to the operation of the appliance.
- The appliance is not intended to be operated by means of an external timer or separate remotecontrol system.

#### Disposal

- When disposing of packaging material: observe local legislation so that the packaging may be reused.
- The European Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE), requires that old household electrical appliances must not be disposed of in the normal unsorted municipal waste stream. Old appliances must be collected separately in order to optimise the recovery and recycling of the materials they contain and reduce the impact on human health and the environment. The crossed out "wheeled bin" symbol on the product reminds you of your obligation, that when you dispose of the appliance it must be separately collected.

Consumers should contact their local authority or retailer for information concerning the correct disposal of their old appliance.

#### Respecting and conserving the environment

- You can help to reduce the peak load of the electricity supply network companies by using the oven in the hours between late afternoon and the early hours of the morning. The cooking mode programming options, the "delayed cooking" mode (see Cooking modes) and "delayed automatic cleaning" mode (see Care and Maintenance) in particular, enable the user to organise their time efficiently.
- Always keep the oven door closed when using the GRILL and GRATIN modes: this will achieve improved results while saving energy (approximately 10%).
- Check the door seals regularly and wipe them clean to ensure they are free of debris so that they adhere properly to the door, thus avoiding the dispersal of heat.

## Maintenance and care

#### Switching the appliance off

Disconnect your appliance from the electricity supply before carrying out any work on it.

#### Cleaning the appliance

- Slight differences in colour on the front of the oven are due to the different materials used, i.e. glass, plastic or metal.
- Any shady areas resembling grooves on the oven door glass are caused by reflections from the oven light.
- The enamel is branded at very high temperatures. This
  process may cause colour variations. This is normal and
  will not affect appliance operation in any way. The thin
  edges of the sheet metal cannot be entirely enamelled
  and may therefore appear to be unfinished. This will not
  affect the rust protection.
- The stainless steel or enamel-coated external parts and the rubber seals may be cleaned using a sponge that has been soaked in lukewarm water and neutral soap. Use specialised products for the removal of stubborn stains. After cleaning, rinse and dry thoroughly. Do not use abrasive powders or corrosive substances.
- The inside of the oven should ideally be cleaned after each use, while it is still lukewarm. Use hot water and detergent, then rinse well and dry with a soft cloth. Do not use abrasive products.

#### PLEASE PHONE US TO REGISTER YOUR APPLIANCE AND ACTIVATE YOUR PARTS GUARANTEE ON 08448 24 24 24

- GB
- All accessories can be washed like everyday crockery, and are even dishwasher safe.
- We recommend that detergents are not sprayed directly onto the control panel, but that a sponge is used instead.

I Never use steam cleaners or pressure cleaners on the appliance.

#### Cleaning the oven door

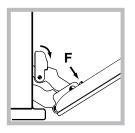

Clean the glass part of the oven door using a sponge and a non-abrasive cleaning product, then dry thoroughly with a soft cloth. Do not use rough abrasive material or sharp metal scrapers as these could scratch the surface and cause the glass to crack.

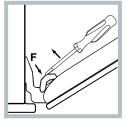

For more thorough cleaning purposes, the oven door may be removed:

1. Open the oven door fully (see diagram).

2. Use a screwdriver to lift up and turn the small levers **F** located on the two hinges (see diagram).

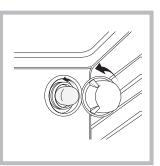

3. Grip the door on the two external sides and close it approximately half way. Unlock the door by pressing on the clamps **F**, then pull the door towards you lifting it out of its seat (*see diagram*). To replace the door, reverse this sequence.

#### Inspecting the seals

Check the door seals around the oven regularly. If the seals are damaged, please contact your nearest Service Centre (see Assistance). We recommend that the oven is not used until the seals have been replaced.

#### Replacing the light bulb

To replace the oven light bulb:

1. Remove the glass cover of the lamp-holder.

2. Remove the light bulb and replace it with a similar one: Wattage 25 W, cap E 14.

3. Replace the glass cover (see diagram).

Do not use the oven lamp as/for ambient lighting.

## Hotpoint

## **Afetr Sales Service**

No one is better placed to care for your Hotpoint appliance during the course of its working life than us – the manufacturer.

## **Essential Contact Information**

### **Hotpoint Service**

We are the largest service team in the country offering you access to 400 skilled telephone advisors and 1000 fully qualified engineers on call to ensure you receive fast, reliable, local service.

#### UK: 08448 224 224 Republic of Ireland: 0818 313 413 <u>www.hotpointservice.co.uk</u>

Please note: Our advisors will require the following information:

Model number:

Serial number:

#### Parts and Accessories

We supply a full range of genuine replacement parts as well as accessory products that protect and hygienically clean your appliance to keep it looking good and functioning efficiently throughout its life.

#### UK: 08448 225 225 Republic of Ireland: 0818 313 413 <u>www.hotpointservice.co.uk</u>

#### Appliance Registration

We want to give you additional benefits of Hotpoint ownership. To activate your free 5 year parts guarantee you must register your appliance with us.

UK: 08448 24 24 24 Republic of Ireland: 01 230 0800 <u>www.hotpointservice.co.uk</u>

Indesit Company UK Ltd. Morley Way, Peterborough, PE2 9JB Indesit Company Unit 49 Airways Industrial Estate, Dublin 17

#### **Recycling and Disposal Information**

As part of Hotpoint's continued commitment to helping the environment, Hotpoint reserves the right to use quality, recycled components to keep down customer costs and minimise material wastage.

Please dispose of packaging and old appliances carefully. To minimise the risk of injury to children, remove the door, plug, and cut the mains cable off flush with the appliance. Dispose of these parts separately to ensure that the appliance can no longer be plugged into mains socket, and the door cannot be locked shut.

### Guarantee

GB

#### 12 months Parts and Labour Guarantee

Your appliance has the benefit of our manufacturer's guarantee, which covers the cost of breakdown repairs for twelve months from the date of purchase.

This gives you the reassurance that if, within that time, your appliance is proven to be defective because of either workmanship or materials, we will, at our discretion, either repair or replace the appliance at no cost to you.

This guarantee is subject to the following conditions:

- The appliance has been installed and operated correctly and in accordance with our operating and maintenance instructions.

- The appliance is used only on the electricity or gas supply printed on the rating plate.
- The appliance has been used for normal domestic purposes only.

- The appliance has not been altered, serviced, maintained, dismantled, or otherwise interfered with by any person not authorised by us.

- Any repair work must be undertaken by us or our appointed agent.
- Any parts removed during repair work or any appliance that is replaced become our property.
- The appliance is used in the United Kingdom or Republic of Ireland.

The guarantee does not cover:

- Damage resulting from transportation, improper use, neglect or interference or as a result of improper installation
- Replacement of any consumable item or accessory. These included but not limited to: plugs, cables, batteries, light bulbs, fluorescent tubes and starters, covers and filters.
- Replacement of any removable parts made of glass or plastic.

THIS GUARANTEE WILL NOT APPLY IF THE APPLIANCE HAS BEEN USED IN COMMERCIAL OR NON-DOMESTIC PREMISES.

#### **5 Year Parts Guarantee**

Hotpoint also offers you a free 5 year parts guarantee. This additional guarantee is conditional on you registering your appliance with us and the parts being fitted by one of our authorised engineers. There will be a charge for our engineer's time. To activate the extra parts warranty on your appliance, simply call our registration line on **08448 24 24 24 (Republic of Ireland 01 230 0800)** 

#### **Extended Guarantees**

We offer a selection of protection plans that enable you to fully cover yourself against the expense of repair bills for the life of your policy. To find the ideal plan for you please call our advice line on **08448 226 226 (Republic of Ireland 01 230 0233).** 

#### **Free Helpdesk Service**

We have a dedicated team who can provide free advice and assistance with your appliance if you experience any technical difficulties within the first 90 days of ownership. Simply call our Hotpoint Service Hotline on **08448 224 224 (Republic of Ireland 0818 313 413)** for telephone assistance, or, where necessary, to arrange for an engineer to call.
