Safety Instructions

Caution with Power Cord

Always pull the power cord out holding the plug. Never pull on the cord itself, and never pull out the power cord with wet hands as this may cause a short-circuit or electric shock. Do not place furniture, etc. on the power cord and take care that it does not become tangled. Never make a knot in the power cord and do not tie it together with other cables. The power cord should be positioned in such a way that nobody can stand on it. A damaged power cord can cause fire or electric shock. Check the power cord from time to time. If it is damaged, contact your nearest authorised customer service or dealer to replace it.

Devices using a power cord must only be connected to the type of power supply specified on its label.

Never apply brute force when inserting the power plug into the wall outlet. If you cannot connect the power adapter, the wall outlet may be obsolete. In this case, consult an electrician to replace the obsolete outlet.

Risk of electric shock by improper handling of electrical power.

Risk of electric shock: if the power cord has been visibly damaged, turn the device off immediately and unplug the power cord.

Never open the housing of the device, of the power adapter or the accessories as they contain no replaceable parts. By opening the housing you endanger your life through risk of electric shock.

Electrical Devices and Children

Do not allow children to use electrical devices when not under supervision. Children may not comprehend the presence of potential risks.

Batteries / rechargeable batteries can be lethal if swallowed. Keep batteries out of reach of children. If batteries are swallowed, seek medical advice immediately.

Keep the packaging away from children too. There is danger of suffocation.

The device should not be exposed to sprayed or dripping water. No objects filled with liquids such as vases or drinks should be placed on, above or near the device.

Setting the Device Up Safely

Position the device on a stable, flat surface. It has not been designed for

operation in very damp rooms (eg. bathrooms). Also, take care that

- Sufficient ventilation is always available (do not place the device on shelves or likewise).
- The device is not set up on a thick carpet or bed;
- Direct heat sources (eg. heating) do not affect the device;
- The device is not exposed to direct sunlight;
- Contact with sprayed and dripping water is avoided (place no objects filled with liquids, such as vases, on, above or near the device);
- The device is not placed in the immediate vicinity of magnetic fields (eg. loudspeakers);
- No open fire sources (eg. burning candles) are positioned on or near the device.
- Avoid also foreign bodies entering the device.

Before a storm and/or lightning disconnect the device from the power supply and pull out the antenna plug.

Disposal of Old Devices

If this symbol of a crossed out trash can appears on a product, it means that this product is subject to the European Directive 2002/96/EC.

All old electrical and electronic devices must be disposed of separately from household rubbish at designated places.

With the proper disposal of old devices you avoid damage to the environment and your personal health.

You can obtain more information on the disposal of old devices by contacting your municipal administration, the disposal office or the place where you bought the product.

CAUTION: Notices on Mains Disconnection

In order to disconnect the device fully from the mains power supply, the plug must be pulled out from the wall outlet. Therefore the equipment should be set up in such a way that unobstructed access to the wall outlet is always ensured, so that the plug can be immediately removed in an emergency situation. To avoid the danger of fire, the plug should always be removed when not being used for a long period of time from the wall outlet, such as during holidays.

Connect the product as described in the User's Manual.

Follow the instructions in the User's Manual of your computer.

Place the product away from humidity and avoid wet environments. Never use this device near water.

Any repair and maintenance of the devices must be performed by qualified service personnel only. Repair or maintenance is necessary when you observe any kind of damage (e.g. damaged power cord or plug, when liquids have entered the device, when objects have fallen onto the equipment, when the device has been dropped, when the device has been exposed to rain or moisture) or when you observe a reduced performance of the product.

To avoid the risk of electric shock, the case may only be opened by qualified service technicians.

Only use a soft, dry and fluff-free cloth or brush. Do not use any detergents, alcohol, benzene, furniture cleaner or any similar products.

Install all cables so that they cannot be tripped over.

1.Features:

- Large 3.5 x 6' TFT LCD
- Screen resolution: 480 x 234 (RGB)
- Supports popular memory cards: SD, MMC, USB
- JPEG file format reading
- Easy to use and operate
- Picture Auto Slide-showing and Auto-Circulation Function
- Picture rotation function
- Rotate the pictures in clockwise or counter-clockwise with different angles of 90degree/180degree/270degree
- Adjustable slideshow delay interval(3sec, 10sec, 1min, 2h)
- Zoom in and out the picture
- Landscape/Portrait positioning /wall mounting
- Power consumption: 6w
- Freely change starting logo
