The easiest to use 3-in-1 remote on the market

Pick up the SBC RU630 and feel how comfortably it sits in your hand. Notice how the ridged base and curved shape, sculpted to the human hand, provides a firm grip, yet gives you easy access to all the buttons, whether you use one or both hands. Notice also how all of the function keys are big, clearly marked and logically placed for maximum ease of use. And see how only the keys you need are automatically back-lit when you pick up the remote. This means no searching for the keys, even in the most dimly lit of rooms. You can also arrange to have all of the keys back-lit when you pick it up. It's features like these that make life so much easier for you, and make the Philips' SBC RU630 the easiest-to-operate three-in-one replacement remote control on the market today.

Makes your life easier

If your TV, VCR and satellite receiver or cable box is a Philips' brand you can start using the SBC RU630 immediately. If it's a different brand, you'll find a three-digit code for your equipment in the SBC RU630's Instructions For Use booklet which you can install by following a simple set-up procedure. If you can't find a code for your equipment let the SBC RU630 find it for you by using an auto-search method. The SBC RU630's library of codes is bigger and better than ever, and provides unsurpassed coverage of almost all TVs, VCRs and satellite receivers and cable boxes in Europe. This of course means less returns for you. The SBC RU630 features Teletext functions, as well as subtitle and sleep-timer facilities for equipment that supports these functions. It also features an extra-strong, widespread signal which means you don't have to point the SBC RU630 directly at your equipment to operate it.

A work of art

The SBC RU630 is as beautiful to look at as it is to operate. Its two-tone dark-blue housing gives it a chic, high-quality appearance that adds class to any living-room table. Someday all remotes will look like this. And if you have any queries regarding the SBC RU630 there's a telephone help-line available seven days a week to help you.
