Fender®

Amp Can™

The ultimate in battery powered portable amplifiers, this is the amp for musicians on the go. The Amp Can was created for the player looking for a small, rugged, high quality amp for acoustic guitar, voice, electric guitar, keyboard, etc.

- *specs:* 15 watts RMS, battery powered, one Fender® Special Design 6" speaker.
- *features:* Two fully independent channels (guitar and line-level with distortion/mic), line/mic channel has 1/4" input that will accept an assortment of microphones, synths, drum machines, etc. Battery charger included.

023-1260-000 Amp Can 230V™

Mini Amps

Great things come in small packages. These amps might be mini in stature but they are HUGE on tone! Just right for the bedroom, the living room, the hotel room, or backstage, and with the additional headphone socket you might even get away with a little practice in the jury box! One more way Fender® helps you to rock anywhere, anytime!

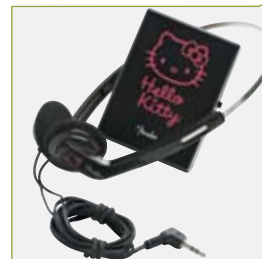

01 023-4808-000 Mini Tone-Master®

02 023-4810-000 Mini Deluxe Amp

03 023-4811-000 Mini '57 Twin-Amp™

Hello Kitty®

by Fender®

Headphone Amp

No matter where you go with your Fender Hello Kitty® Electric Guitar you can now take your amp with you. Introducing the Fender Hello Kitty® Headphone Amplifier, just plug in and go! This little amp features three modes of operation including: *Clean*, for your bluesy, smooth and acoustic feel/*O-Drive*, which emulates the sound of your favorite overdriven tube amplifier for soaring leads/*Dist*, for your all-out heavy metal-hard rock grind! Also included are a personalized set of Hello Kitty® headphones, a belt clip and 9 volt battery.

097-1200-000 Hello Kitty® Standard Headphone Amp

FENDER® TUBES

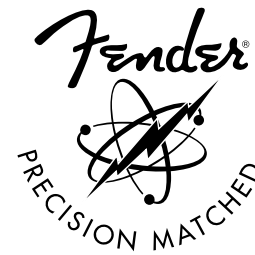

Classic, high-quality tubes at a great price! Fender tubes come available as singles, matched and balanced pairs, and matched and balanced quads to ensure you're provided with optimal tonal performance and lifespan!

099-4031-000	5Y3

Groove Tubes®

RED, WHITE & BLUE! You chose your groove! These are the very tubes that come as standard equipment on every Fender amplifier that leaves the factory! Groove Tubes matched sets are much easier to replace due to the color coding system, which eliminates the need to re-bias your amplifier at every tube change. Just match your color and then pull out the old and plug in the new! As you increase your amplifier's volume, Red tubes stay cleaner longer, and blue tubes begin to break up sooner. The white tubes are your middle of the road! Groove Tubes feature an improved harmonic balance; longer lifespan; matched gain to distortion ratio; and a wider frequency response!

USA Groove Tubes®

AMERICAN MADE, worldwide played! Manufactured in the U.S.A. with the highest quality materials, of which 70% are American components, these are an exact reproduction of original U.S.-built tubes. Because of that, you'll get the same stunning results you would expect from Fender® and Groove Tubes. Once again, they come with the same red, white, and blue color coding for simplified replacement without re-biasing and are matched for improved harmonic balance; longer lifespan; equalized gain to distortion ratios; and a wider frequency response!

099-4008-304	GT 6L6 GE Quartet—Blue

Groove Tubes Substitute

This completely revolutionary Groove Tubes design lets you convert any amplifier powered by 6L6 tubes into a low wattage EL84 powered scary-nasty-monster-hiding-under-your-bed-type-beast by dropping your output power by a whopping 70% and leaving you with the opportunity to really crank it up! Just plug an EL84 into the Substitute and then replace the original 6L6 with the Substitute/EL84 concoction! *Presto!* You're ready to frighten your neighbors! Of course, it also means you can play quietly at 2a.m. and still rock, but why would you want to do that?

099-4009-000	GT 6L6/EL84 Substitute
