PX-Rose

Professional Cut & Hold secateur

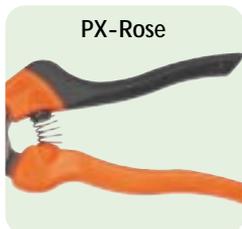

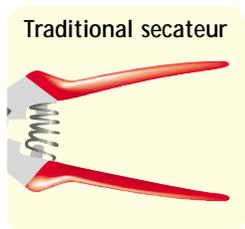

Original design
to improve your
working life

▶ Two angles to reduce pains and fatigue

▶ The dual inclination of the cutting head compensates the wrist bending and allows the hand to remain in a neutral position

▶ Handles designed to fit perfectly the geometry of the hand

Performance by design

PX-ROSE-M

● Smooth spring

● Upper handle elastomer coating to improve the handling

Always one step ahead

Ornamental horticulture

Bahco-Pradines brand name refers to a particular know-how that has been renowned for decades. We are now recognized for our incomparable expertise in designing professional pruning tools. Bahco-Pradines is continuously looking for advanced solutions in order to make the working life of professional users easier. We regularly launch innovative tools which help users of the ornamental horticultural industry to do a better job with optimal efficiency.

Bahco-Pradines broad range of products offers every user the opportunity of getting the tool that best fits specific requirements depending on its application. We design our tools together with professionals, which guarantee incomparable levels of performance and satisfaction. Our main concern is to deliver superior value through high quality tools that are designed and manufactured to meet highest levels of expectations.

Maintenance tips

- Unscrew the holder

- Resharpening :
Stroke the cutting hedge outward and off the tip, remove burrs on the back side

- Cleaning :
Moisten with SAP-X cleaner until it feels damp and wipe off with tissue

- Lubrifying :
Put a few drops of ECO-LUBE on to the blade towards the bolt and work the tool to spread the lubricant
