Package Contents

- 1x GWU627 client adapter
- 1x USB power cable
- 1x Ethernet cable
- 1x Power adapter with USB port
- 1x User Manual
- 1x Warranty Card

System Requirements

- Operating System
 - Windows XP, Windows Vista, Windows 7
 - Mac OS X v10.4 and above
- Wireless network with WPS setup
- · Wireless network without WPS setup and computer

Product Overview

1. Ethernet Port	The Ethernet port allows a LAN connection through Cat 5 cables. Supports auto-sensing at 10/100M speed, half/ full duplex.
2. Mini USB Power	The Mini USB cable provides power.
3. WPS Button	Push and hold the WPS button for 5~10 seconds to enable the WPS feature.
4. Reset Button	Push and hold the reset button for 5~10 seconds to reset the adapter to factory default settings.

LED Indicator State Description

1. Power LED	On - The WLAN Broadband Router is powered on. Off - The WLAN Broadband Router is powered off.
2. WLAN LED	Flashing - WLAN is transmitting or receiving data. Off - WLAN is off
3. WPS LED	Flashing - The WPS feature is enables and in use. Off - The WPS feature is not in use.
4. LAN LED	Flashing - Data is transmitting or receiving on the LAN interface. On - Port linked. Off – No link.

Installation

Wireless Setup with WPS

Step 1: Power on your Universal WiFi Adapter using either of these methods:

• Connect the mini-USB cable to a device that provides Type A USB connection. Make sure that the device where you connect the USB cable is powered on.

• Connect the WiFi adapter to an electrical outlet with the included power adapter.

Note: It will take about 50 seconds to complete the boot-up sequence. When complete, PWR (power) LED will be active, and the WLAN Activity LED will be blinking to show the WLAN interface is enabled.

Step 2: Use the included RJ-45 Ethernet cable to connect the WiFi adapter with your device such as Blu-ray player, HDTV, or game console.

Step 3: Refer to your wireless router's user manual to enable the WPS function, then press "WPS" button on the top of WiFi adapter.

Your installation is complete. If asked for the type of connection, make sure "WIRED" is selected on your device.

Installation without WPS - Windows XP

Step 1: Turn off your computer's wireless connection (if applicable) and disconnect the Ethernet cable currently connect to your computer (if applicable).

Step 2: Use both the included RJ-45 Ethernet cable and the USB cable to connect the WiFi adapter with your computer.

Step 3: Set your computer with a static IP address.

a. Right click on "My Network Places" and select "Properties".

b. Next, right click on "Local Area Connection" and select "Properties".

c. Select "Internet Protocol (TCP/IP)" then select "Properties".

🕹 Local Area Connection 2 Properties 🛛 🕐 🔀

Federal Communications Commission (FCC) Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential setting. This product generates, uses, and can radiate radio frequency energy and, if not installed and used as directed, it may cause harmful interference to radio communications. Although this product complies with the limits for a Class B digital device, there is no guarantee that interference will not occur in a particular installation.

CE Compliance

This device has been tested and found to comply with the following European Union directives: Electromagnetic Capability (89/336/EMC), Low Voltage (73/23/EEC) and R&TTED (1999/5/EC).
