

ADC Value-Added Modules

FMT Drawers Featuring MicroVAM Modules

Designed to make the most of your fiber network, ADC's FMT Drawers for MicroVAM modules add flexibility and functionality to the optical transport system. This versatile platform lays the foundation for the optical distribution frame of the future, enabling service providers to easily incorporate optical components into the network.

ADC's unique FMT Series provides flexible access to MicroVAM modules. MicroVAMs allow flexible addition of splitting as well as signal monitoring of Wavelength Division Multiplexing (WDM), Coarse Wave Division Multiplexing (CWDM) or Dense Wave Division Multiplexing (DWDM).

- Cost-Effective – Ensures optimal performance from the existing fiber network
- Future-Proof -- Supports efficient service deployment, management and technology upgrades. Modules can be added as needed—even one at a time
- Flexible – Built to maximize the space and performance of your network
- Innovative – Features the first 1 RU drawer on the market
- Exceptional Fiber Management – Incorporates ADC's unique cable management components

Features

- All FMT Drawer VAM chassis accept standard MicroVAM modules
- 1 and 2 RU models available
- Drawers feature sliding "rails" for MicroVAM modules
- Allows easy access for connecting and cleaning
- Ensures that any fibers can be installed or removed without inducing microbends
- Features sliding radius limiters for cable management of incoming and outgoing fibers
- All-front access
