

BELKIN® | KVM Switch

Control up to four PS/2 computers
using one monitor, keyboard and mouse

Quick Installation Guide

F1DJ102P-B
F1DJ104P-B

Introduction

This sheet will guide you through the basic steps needed to install the KVM Switch. If you have any problems during installation, please refer to the User Manual.

You will need the following items to install the KVM Switch:

- KVM Switch
- One (each) keyboard, monitor, and mouse
- One KVM cable kit per computer installed (included)

1

Connecting the Keyboard, Video, and Mouse to the Console Ports on the Switch

1. Power down all computers.
2. Connect your PS/2-type keyboard and mouse to the KEYBOARD and MOUSE ports located on the side panels of your Switch.

1

Connecting the Keyboard, Video, and Mouse to the Console Ports on the Switch

3. Take the video cable that is attached to your monitor and connect it to the VGA OUT port located on the side of the Switch.

2

Connecting Computers to the KVM Switch

1. Using an OmniView KVM Cable kit, take the VGA cable and connect the male end of the cable to the VGA port on the first computer. Connect the female end to the VGA 1 port on the side of the Switch.

2. Connect one end of the PS/2 keyboard KVM cable to the keyboard port on the computer and the other end to the KEYBOARD 1 port on the side of the Switch.

2

Connecting Computers to the KVM Switch

3. Connect one end of the PS/2 mouse KVM cable to the mouse port on your computer and the other end to the MOUSE 1 port on the side of the Switch.

Repeat Steps 1 through 3 for each additional computer to be connected to the Switch, connecting them to the corresponding CPU ports on the side.

3

Power on your Computers

You are now ready to use your Switch.

Please refer to your User Manual for additional information.
