WHY TO BUY

The device for a total freedom of movement without losing the connection. Easy to be installed and fast and flexible, with I-Fly Wireless PCMCIA Card there is no more obligation for a fixed working place: you can easily work or navigate for fun from your own garden or in different rooms of your office, always in wireless connection.

Thanks to advanced security functions which are integrated and thanks to the throughput of the protocol IEEE802.11G you are going to have a fast and flexible wireless net, hacker safe.

The chipsets fully support Wi-Fi Protected Access (WPA) and the IEEE 802.11i draft security standards in hardware and high-speed encryption engines for both the Temporal Key Integrity Protocol (TKIP) and the Advanced Encryption Standard (AES) with no performance degradation.

Last, but not least, this product implements Atheros Super G™ (available for devices with chipset Atheros) capabilities to deliver 108 Mbps raw data rates and 90 Mbps TCP/IP throughput for 802.11g wireless LANs (Real-time hardware data compression, Dynamic transmit and modulation optimization and Standards-compliant bursting mode adapts to the network).
