IMPORTANT SAFEGUARDS

For your protection, please read these safety instructions completely before operating this appliance, and file for future reference.

INSTALLATION

**Water and Moisture** - Do not use near water

Ventilation - The slots and openings in the cabinet are provided for necessary ventilation.

- Never cover the slots and openings with a cloth or other materials.

Accessories - Do not place the appliance on an unstable surface.

Heat - Do not place the appliance where it can be exposed to direct sunlight or excessive heat.

- Never place the appliance in a confined space, such as a bookcase, or built-in cabinet, unless proper ventilation is provided.
S3125A
USE

Power Source - This appliance should be operated only from the type of powersource indicated on the marking label.

Overloading - Do not overload wall outlets, extension cords or convenience receptacles beyond their capacity, since this can result in fire or electric shock.

When not in use - Unplug the power cord of the appliance from the outlet when left unused for a long period of time.
To disconnect the cord, pull it out by grasping the plug. Never pull the plug out by the cord.

LASER

Lightening-For added protection for this appliance during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system.This will prevent damage to the appliance due to lightning and powerline surges.

Cleaning - Unplug the appliance from the wall outlet before cleaning or polishing it. Do not use liquid cleaners or aerosol cleaners. Use a cloth lightly dampened with water for cleaning the exterior of the appliance.

Object and Liquid Entry- Never push objects of any kind into the appliance through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the appliance.
SERVICE

Damage Requiring Service-Unplug the appliance from the wall outlet and refer servicing to qualified service personnel under the following conditions:
- When the power cord or plug is damaged or frayed.

- If liquid has been spilled or objects have fallen into the appliance.

- If the appliance has been exposed to rain or water.

- The appliance does not appear to operate normally or exhibits a marked change in performance. This indicates a need for service.

- If the appliance does not operate normally when following the operating instructions, adjust only those controls that are specified in the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the appliance to normal operation.
- If the appliance has been subject to excessive shock by being dropped, or the cabinet has been damaged.

Servicing - Do not attempt to service the appliance yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Trouble Shooting

No Video displayed on TV
- Make sure TV is turned on.
- Check the cable connections.
- Check the input selection on the TV is correct.

Player does not respond to remote
- Clear any obstacle between the remote and the player.
- Try moving closer or reduce the angle to the player.
- Check the condition of the batteries and replace if necessary.
- Clean the sensor panel on the player.

No audio during DVD/file playback
- Check the audio output of the player is set correctly.
- If using external amplifier/speakers, ensure connections are correct and amp is turned on.
- Check input on TV/Monitor.
- Check files audio track is supported by this player.

Disc playback is jerky
- Check the condition of the disc. If surface is damaged or scratched repair or replace if necessary.

Video file playback is jerky and stops
- Check the file is compatible with player.
- Check resolution of file. High Definition files may cause intermittent playback issues. Reduce resolution and bit rate of file to improve playback.

Abnormal Player operations
- Turn the player off and unplug the player from wall. Wait for 1 or 2 minutes and plug back in. Player should now function normally.

Disc is locked in player
- If the player will not eject disc. Turn the power OFF and then ON again. Immediately press the EJECT button (17) to open the tray.

Technical specifications
