

Palladio ISDN

DESCRIPTION

Top performance with your Laptop over ISDN lines (128Kbit/s)

PALLADIO ISDN is an active ISDN modem for Euro-ISDN lines.

It complies with several Operating System: Windows®, Mac® OS and Linux.

You can connect to the Internet at 64/128 Kbps and, thanks to the software available on the market, you can also carry out PC remote connections (ISDN-ISDN with V.120 or ISDN-GSM with V.110 protocol).

These connections are guaranteed by the TAPI drivers provided with the modem, so you can use CAPI incompatible communication programs.

RVS With the bonus Pack "RVS-COM lite", Windows® users can send/receive fax Gr.4 (64 Kbps), send/receive fax Gr.3 (14.4/9.6 Kbps), transfer files (X.75 Eurofile Transfer) and use the voice features.

Palladio ISDN is Plug & Play and can be connected and disconnected when the computer is ON (Hot Insertion).

Code: 8D5449

- ISDN Connection: Basic Rate Interface Euro-ISDN
- AT commands
- Autobaud up to 115200 bit/s
- PPP/MLPPP protocols for 64/128 Kbps Internet connections
- V.120 protocol for ISDN-ISDN connections
- V.110 protocol for ISDN-GSM connections
- V.42bis Data Compression
- Caller ID function
- Multi Subscriber Number (MSN) and Sub-Addressing (SUB)
- CLIP
- International line interface (EuroISDN)
- Operating System: Windows®, Macintosh®, Linux
