VisionPRO® IAQ
Total Home Comfort System

This...

A thermostat and more. One control for all of your home comfort solutions.

Replaces all this!

Separate controls for temperature, ventilation, air filtration and humidification — each with it's own styling and method of operation.

Total Home Comfort System
Effortless Control From One Point In Your Home

THERMOSTATS | ZONING | AIR CLEANERS | HUMIDIFIERS | DEHUMIDIFIERS | ULTRAVIOLET SYSTEMS | VENTILATION | WATER SOLUTIONS

VisionPRO® IAQ

Total Home Comfort System

Control comfort and Indoor Air Quality (IAQ) throughout your entire home with Honeywell's VisionPRO IAQ Total Home Comfort System. VisionPRO IAQ eliminates the need for multiple controls in your living space, by managing your home's temperature, humidification, dehumidification, ventilation and air filtration - all from a single, effortless touchscreen control.

Customize your Total Home Comfort System

Include individual Honeywell Indoor Air Quality solutions to your heating and cooling system, or integrate them all as part of a Total Home Comfort System for your home. Honeywell makes it easy, giving you control of any or all of these solutions from a single device - VisionPRO IAQ.

Touchscreen Interaction — Easy-to-follow menu-driven operation simplifies programming by responding to your choices.

Energy Savings — Program to save up to 33% on annual heating and cooling costs

All-in-One Control — Thermostat connects with Equipment Interface Module or Zone Panel to control Temperature, Humidification, Dehumidification, Ventilation and Air Filtration from a central point in the home.

OR

Whole-House Zoning System — Works with dampers in your ductwork that open and close as needed based on each zone's thermostat setting to let you control comfort in individual rooms (or zones). Contains system intelligence that communicates between zones for improved home comfort.

Smart Change/Check Reminders — Let you know when to service or replace filters, UV bulbs (based on actual usage) and humidifier pads.

Precise Comfort Control (+/- 1°F) — Maintains consistent comfort to the highest level of accuracy.

Outdoor Temperature Sensor — Displays the outdoor temperature at the thermostat. (50022037-001 required for use with W8835 panel.)

Heating & Cooling Equipment — VisionPRO IAQ is compatible with and controls the operation of almost every brand of heating and cooling equipment.

Whole-House Humidifier — Works to automatically maintain a proper humidity level throughout all rooms in your home - moisturizing air to prevent symptoms of dryness and protect hardwood flooring and woodwork.

Whole-House Dehumidifier — Works to automatically sense and lower humidity levels throughout all rooms in your home - to help prevent dampness, stickiness and odors (symptoms often associated with air that is too moist).

Whole-House Ventilation — Works to remove air pollutants by bringing in a continuous exchange of fresh, filtered air and sending out stale air - just like having an open window.

Whole-House Telephone Access — Works with your existing telephone line to offer control of your home's temperature and indoor air quality over the phone. Call ahead to have the temperature and humidity levels where you want them before you arrive.

The system will also call to alert you if there's a problem (temperature drops), and you can add optional sensors for flood and door contact. Perfect for people with vacation or second homes.

Whole-House Ultraviolet Treatment — Works to zap surface mold and airborne pacteria passing by the UV light to make sure they don't survive in your duct system and move into your homes air.

Whole House Air Cleaner — Works to trap and filter airborne particles and contaminants passing through the duct system to make sure that cleaner air is distributed to all rooms within your home. Also helps maintain the performance of your furnace and air conditioner.

VisionPRO IAQ Total Home Comfort System:

Part Numbers	Description
TH9421C1004	Thermostat Only
THM5421C1008	Equipment Interface Module Only
YTH9421C1002	Thermostat and Equipment Interface Module
YTH9421C1010	Thermostat, Equipment Interface Module and Outdoor Temperature Sensor
Y8835A1044	Networked Zoning Kit: Zone Panel and 2 Thermostats
Y8835A1028	Networked Zoning Kit: Zone Panel and 3 Thermostats
W8835A1004	Zone Panel Only
C7089U1006	Outdor Temperature Sensor (50022037-001 required for use with W8835 panel).
