- Quick and easily remove bands from 2D gels
- Available in 3 sizes

NEW OneTouch Manual Spot Picker for 2D Gels

This New OneTouch Spot Picker is designed to effortlessly excise bands from 2D gels and dispense them into microtitre plates or tubes. No more cumbersome scalpels or blades and no more gel cutting! Simply find the band you want, press down, and the band will be cleanly removed from the gel.

Catalog No.	\$	Product
BS4 72-6590		OneTouch 2D Gel Spot Picker, 1.5 mm
BS4 72-6591		OneTouch 2D Gel Spot Picker, 3.0 mm
BS4 72-6592		OneTouch 2D Gel Spot Picker, 5.0 mm

- Quick and easily remove and dispense bands from gels
- Available in 2 sizes with disposable tips

NEW OneTouch Plus Spot Picker with Disposable Tips

This New OneTouch Plus Spot Picker excises bands from polyacrylamide or agarose 2D gels and dispenses them into microtitre plates or tubes in one motion. The OneTouch Plus uses disposable tips to avoid contamination between samples. The unit uses specially designed thin walled, sharp tips with floating filters to eject the gel plug from the tip. Available in 1.5 mm and 3.0 mm diameters. Tips are packaged in 10 racks of 96 tips.

- Quick and easily excise bands from 1D gels

NEW PowerPicker 1D Band Picker

This PowerPicker 1D Band Picker is ideal for the removal of 1D bands from acrylamide and agarose gels. The PowerPicker is constructed of electropassivated surgical grade stainless steel. The cutter is 5 mm x 1.5 mm, roughly the size of a band in a 1D gel lane.

- Permits photography of a wide range of images without dark room

The Polaroid DS-34 is a fixed focal length camera with a variety of hood options, permitting photography of a wide range of image areas without a darkroom.

The hoods contain lenses of calibrated diopters which set the focal length to accommodate the image area, resulting in sharp pictures without focusing. A set of threaded glass filters for lens mounting is also available. They combine with any of the transilluminators to make an instant photo documentation system.
