

MicTube Solo

MONO TUBE MICROPHONE PREAMPLIFIER

NATURAL TUBE WARMTH FOR ANY MIC OR INSTRUMENT. Add warm, vintage tone to any mic or instrument with the MicTube Solo preamplifier. Ideal for any recording or live setup, the MicTube Solo features an easy-to-use control layout and one of the most classic sounding, lowest-noise vacuum tubes: the legendary 12AX7. Aside from the tube, the MicTube Solo features a minimized circuit path, so it preserves the essence of the signal coming from the microphone faithfully.

FEATURES

- › Tube microphone preamplifier with 12AX7 low-noise vacuum tube for warmth and musicality
- › 20 dB Pad, phase reverse, and 80Hz HPF
- › Minimized signal path for clarity
- › 48V Phantom Power for condenser mics
- › 1/4" high-impedance DI input for instruments
