Not just another box in the living room. The Nokia Mediamaster 210 S is the most demanding eye.

Free-to-air TV, pay-TV, digital radio and more. In one receiver.

Here's a digital satellite receiver at its best. The Nokia Mediamaster 210 S brings you a huge variety of content; entertainment, music, sports, news, movies... altogether thousands of digital TV and radio channels.

Thanks to its multi-access concept, you'll have access to both free-to-air channels and the pay-TV channels you wish to subscribe to. And it will all be with amazing digital picture and sound quality.

Thousands of digital TV- and radio channels – the choice is yours.

The beauty of the Nokia Mediamaster 210 S is that it is so easy to use and install. Simply plug it into your satellite connection, enter your language, time and satellite dish settings and start zapping through up to 3000 digital TV and radio channels.

Using a motorized dish will make finding different satellite positions really easy. All you need to do is to define your favourite channels and the motorized dish will be able to select pre-programmed satellite positions automatically as you change TV and radio channels.

The Nokia Mediamaster 210 S is also particularly handy for people living abroad. Watching programmes from your native country couldn't get any easier than this!

Not just quantity, but quality.

The Nokia Mediamaster 210 S gives you access to all available free-to-air digital TV and radio channels, but that's not all. It also has an embedded Viaccess™ descrambler as well as a Common Interface slot that enables you to subscribe to any available pay-TV bouquet of your choice.

There's no need to worry about getting mixed up with your channels either. The on-screen Nokia Navi™ Bars user menu makes zapping very easy. And fast. You and your family can create your own personal favourite lists – for sports, films or documentaries... it's up to you. You will also enjoy

210 S is designed to please even

a fully automatic channel set up and there is a handy electronic programme guide (EPG) at your service, too.

And then of course, you benefit from the digital picture (normal ratio or wide-screen) and Dolby Digital™ supported sound – setting a whole new standard in TV entertainment.

Why not listen to digital radio? Or play a few games?

With your Nokia Mediamaster 210 S you can also receive digital satellite radio channels. Being digital, they'll sound that way too, and plugging the Nokia Mediamaster 210 S into your stereo will greatly enhance your listening.

And should you feel like playing a few games, the classic Nokia Snake, Tic-Tac-Toe and a new game, Card Deck will keep you entertained.

With everything changing so fast, is this really a good time to get digital TV – or the Nokia Mediamaster 210 S?

Absolutely. When you see it, you'll believe it. What's more, with the Nokia Mediamaster 210 S you're covered for the future too, as you get updates when new functions and services come available. The same goes for all Nokia home entertainment products and solutions.

Your dealer will be happy to give you more information on digital television as well as the Nokia Mediamaster 210 S

– and our other, exciting Nokia home entertainment products. There's no place like home.

A motorized dish will make finding different satellite positions very easy.

The Nokia Navi™ Bars user menu: Your personal guide to digital home entertainment. Zap through channels, create favourite lists and ask for help – with a touch of a button. It's not only smart, but fast too.

Many good things in a small package: you'll have access to all digital free-to-air and pay-tv channels of your choice.
