

## No Manual Upper Body Calibration

### E Series TBT's

A range of E Series TBT's (Fig. 1, LED display and Fig. 2, embedded touch screen) with the ADT LCB (PN: 721-1176) will not be able to perform a manual upper body calibration with the software loaded from the factory.

Fig. 1

Fig.2

The range of serial numbers affected are: CTEN1010-U08841 to CTEN1010-U08941.

If an upper body calibration is needed on one of these units, use the automatic upper body calibration feature.

If a manual upper body calibration is required for the above mentioned serial number range, contact Customer Service at 800-503-1221 or 714-669-1660 or send an email to [support@startrac.com](mailto:support@startrac.com) to obtain the software needed to be loaded into the LCB.
