OCTOPUS

USB TV + Multimedia to PC

Watching TV on your laptop or PC.

Easily connect all your Audio/Video equipment and transfer the images to DVD.

Transfer your favourite video tapes to DVD.

MARMITEK®

OCTOPUS

Octopus

Remote

Software

- Watch TV on your laptop or PC with a USB connection, without even having to open up the PC.
- Transfer your favourite video tapes to DVD
- Octopus as PVR (Personal Video Recorder): record your favourite TV programmes. Time Shift allows you to pause TV programmes at any moment and watch them later.
- Connect an Audio/Video equipment (video recorder, camcorder, surveillance camera) to the front of the Octopus and easily copy images and sound to DVD.
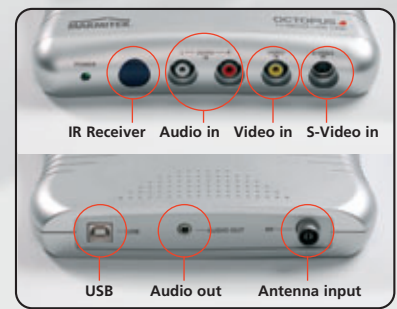

HOW DOES OCTOPUS WORK?

Connect Octopus to your PC, using the combined USB 2.0/Audio cable (included). Connect the coax/antenna cable to the back of Octopus. With the software included you can watch, record and copy TV images. You can also connect any A/V device (video recorder, camcorder, security camera) to the front of Octopus and easily transfer images and sound to your PC for editing, recording and archiving. A remote control for the Octopus TV function is included.
