Warning: Choking hazard with small parts. Keep out of reach of small children.

Position/Mount Camera

- Select location up to 15 feet from desired subject or area.
- Follow enclosed instructions for **Adding a VueZone Camera** to sync with your system.
- Use with VueZone camera mounts for wall, window or table & ceiling.
- Camera can be mounted in VueZone Outdoor Shell.
- Use Night Vision viewer settings to enable and adjust light levels.

Position/Mount IR Lamp

- Select location up to 25 feet from desired subject.
- Follow instructions on bottom of lamp base to securely mount on a wall, ceiling or surface.
- Aim lamp at subject area as if pointing a spotlight, or bounce light from wall/ceiling.
- Connect lamp to AC Adapter and plug into wall outlet.
- Lamp turns on automatically in darkness – and off automatically in normal light.

FAQs

- Q:** Can the Infrared Lamp also be used outdoors?
- A:** No – the lamp is not rated for outdoor use.
- Q:** Is the IR Lamp always on?
- A:** No – a sensor will turn the lamp on/off as light levels darken/brighten.
- Q:** Do the Night Vision camera and IR Lamp need to be side-by-side?
- A:** No – the IR Lamp just needs to illuminate the subject area where the camera is pointed.
